Oakland, California 94609
ACEH Fuel Leak Case No. RO0002935 & Global ID T0619748201

Dear Mr. Chan:

On behalf of Mr. Glenn Logan, Pangea Environmental Services, Inc (Pangea) is requesting an extension for the technical reports requested by your May 4, 2007 letter for the subject site. Your letter requested a Conduit Study Report and a Work Plan for Contaminant Source Characterization. Mr. Logan is currently applying to the California Underground Storage Tank (UST) Cleanup Fund to seek reimbursement for corrective action costs incurred to satisfy regulatory directives. Due to Mr. Logan's limited financial resources, he would like to become accepted to the Cleanup Fund before initiating the requested work. Acceptance into the Cleanup Fund will allow Mr. Logan to perform the requested work in a more comprehensive and expedited manner.

Pangea anticipates that it will take up to 6 months for the Cleanup Fund to process Mr. Logan's application, to conduct their compliance audit, and to issue Mr. Logan a Letter of Commitment (LOC). Therefore, Pangea respectfully requests a 6-month extension until December 8, 2007 for technical report preparation requested by your May 4, 2007 letter.

Thank you in advance for your consideration. The letter will be submitted to the ACEH via uploading to the Alameda County ftp site. As requested, Pangea will not submit a hard copy to the ACEH.

If you have any questions or comments, please call me at (510) 435-8664 or email briddell@pangeaenv.com.

Sincerely,

Pangea Environmental Services, Inc.

Bob Clark-Riddell, P.E.
Principal Engineer
