**Duration:** 24 minutes

Phone call from Alameda County Economic Redevelopment Agency (Mary Ordendahl).

- Wants to know about site closure. When? Inform her that ACEH cannot make determination, due to incomplete site characterization.
- What is next step in process. Inform her that ACEH will comment on WP, then next phase of work will be implemented. At which point ACEH will make determination based on data. Unlikely that site is impacted from an offsite source, given data from upgradient investigation. High concentrations in GW (10,000 ppb TCE). Thus far, unable to determine source of contamination, that is the purpose of the pending investigation.
- Mary wants to know what is procedure to determine when site can be considered for closure, and what is associated risk. Who makes determination as to when site closure is warranted.
- Her demeanor was critical and somewhat condescending. I inform her that I am not trying to be obstructionist, but ACEH has specific policies and the site is not a candidate for closure.
