discuss site

had a WP but Barney's ltr did not consider,  
original WP not submitted to ftp site (e-mailed), not in e-files, he will post to ftp site

can he proceed with implementing WP? I looked over proposed scope. Insufficient lat & vert characterization in source area. original borings only analyzed 1 sample per boring leaving vertical extent undefined. Also incomplete analytes suite in original work & proposed work.

addtl work proposes select borings for select analytes only -- insufficient, rationale for proposal is unclear. told him the WP needs to be reviewed & there will be significant comments. I had given him direction already re: WP, unfortunate he did not submit so it could have been reviewed as part of original directive ltr.

Okay, he will wait for case assignment.
