John,

Thank you for your quick response. I will include these in our permit tracking system and have the contractor include these comments on the plans. Once this is done I will email the plan back to you for your approval, or if you would like me to redline the three comments on the plans. Then I would need you to provide an approval status in Accela for LPFD. John please let me know what works for you. Again thank you for your help with the project.

Thank you

Frank,

I spoke with Jerry Wickham this morning. My conditions for this project are as follows...

- Demolition permit is for aboveground structures only,
- Contamination encountered will be located (logged), and the related removal and sampling reviewed and approved by ACEH and LPFD, and
- Piping encountered that could have contained hazardous materials or wastes be protected for review by ACEH and LPFD.

John

John,

Please see the attached plan for the demo of the six buildings. The contractor does have the following documents. Please let me know if you can read the plan attached.

Frank,

Good talking with you and thank you for checking in on this.

My department has no other requirements that would prohibit the City from issuing a demolition permit for the above referenced site.

Jerry,

It was nice talking to you today. As we discussed on the phone this afternoon, I would like to issue a demolition permit for six buildings or structures on the site concerning the address and your case number above. Is there anything Alameda County needs that would prohibit the city from issuing a demolition permit.

Thank you
