Nick,
Thanks for the note. In regards to the analytical suite, I did forget to remove the chlorinated VOCs, PCBs and creosote from the list based on the lab analytical reports conducted on the well water and well free phase. That leaves metals and SVOCs, and the fuel VOCs and TPHg, TPHd, TPHss, TPHo. You can use this email to document this change. Keep me posted as to the status of work at the site, especially the sonic rig. (really, WDC closed its doors??) Best,

Subject: Conditional Approval

Mark,
I just wanted to thank you for how quickly you did this work. I will make sure that everyone involved understands what a difficult and time consuming process this must have been, and how lucky we are to be able to get something like this approved this quickly.

Best Regards
Nick Patz
