Subject: Landowner and Public Participation Notification for Case Closure Consideration; Fuel Leak Case No. RO0002973 and Geotracker Global ID T0619717287, Ambassador Laundry, 3623 Adeline St., Emeryville, CA 94608

Dear Ladies and Gentlemen:

Alameda County Environmental Health (ACEH) is reviewing the fuel case file for the above referenced site for potential case closure. As you are aware a site investigation and groundwater monitoring for underground storage tank leaks has been performed at the subject property to which you are named as the primary or active responsible party.

ACEH has reviewed the *Site Conceptual Model and Notice to Comply Response*, dated November 19, 2013, (submitted January 27, 2014, and resubmitted March 7, 2014), and the *Site Conceptual Model Addendum*, dated February 21 and 24, 2014. The documents appear to adequately address ACEH comments that have been discussed in previous letters, several meetings and conference calls.

Based on the review of the case file ACEH requests that you address the following technical comments and send us the documents requested below.

TECHNICAL COMMENTS

- 1) List of Landowners Form** - Pursuant to Section 25297.15 (a) of the California Health and Safety Code, Alameda County Environmental Health (ACEH), the local agency, shall not consider cleanup or site closure proposals from the primary or active responsible party, issue a closure letter, or make a determination that no further action is required with respect to a site upon which there was an unauthorized release of hazardous

substances from an underground storage tank subject to this chapter unless all current record owners of fee title to the site of the proposed action have been notified of the proposed action by the primary or active responsible party. ACEH is required to notify the primary or active responsible party of their requirement to certify in writing to the local agency that the notification requirement in the above-mentioned regulation has been satisfied and to provide the local agency with a complete mailing list of all record fee title owners.

To satisfy this requirement, please complete the enclosed *List of Landowners Form*, and mail it back to ACEH by the date identified below.

- 2) **Public Participation** - Public participation is a requirement for the Corrective Action Plan and case closure process. In order to notify potentially affected members of the public of the potential fuel leak case closure, ACEH requests that you distribute the attached Fact Sheet to the mailing list (Attachments B and C, respectively). Following distribution of the Fact Sheet, please provide your personal certification by e-mail or letter to ACEH, that the Fact Sheet was distributed by U.S. Mail to the attached mailing list no later than **March 21, 2014**. The *Invitation to Comment – Potential Case Closure* requests that landowners or residents submit any comments or questions to ACEH regarding potential case closure by **May 22, 2014**. ACEH will consider all comments from the public prior to potential case closure. Your comments, if any, must be considered prior to the proposed closure. Please respond within 60 days from the date of this letter for your comments to be considered.
- 3) **Site Management Plan** – As previously requested, a Site Management Plan (SMP) is required to manage risk and document procedures associated with residual contamination beneath the recently constructed building. The SMP will be available for quick implementation in the event that maintenance or construction requires entry into the subsurface and residual contamination beneath the site. The SMP is requested to provide a method to document standard contaminant sampling, handling, and management methodologies, and include but not be limited to details associated with:
 - i. Use of Photoionization Detectors (or equivalent) to identify impacted soil and to identify sampling locations;
 - ii. Appropriate sample collection procedures and preservation techniques;
 - iii. Appropriate excavation confirmation sampling;
 - iv. Segregation of impacted from non-impacted soil and documentation of segregation;
 - v. Appropriate stockpile best management practices;
 - vi. Protocols for off-site waste disposal at a permitted facility or protocols for soil reuse (either onsite or offsite) in accordance with the San Francisco Bay Regional Water Quality Control Board Draft Technical Reference Document entitled *Characterization and Reuse of Petroleum Hydrocarbon Impacted Soil as Inert Waste*, dated October 20, 2006; and
 - vii. Contaminated groundwater sampling, handling, and management procedures.

If contamination is encountered during maintenance or construction, the SMP is expected to notify ACEH within 24 hours. Handling contaminated soil &/or groundwater using the SMP protocols must be documented in a final report to be submitted to the County's ftp site.

Responsible Party(ies) Legal Requirements/Obligations

REPORT/DATA REQUESTS

These reports/data are being requested pursuant to Division 7 of the California Water Code (Water Quality), Chapter 6.7 of Division 20 of the California Health and Safety Code (Underground Storage of Hazardous Substances), and Chapter 16 of Division 3 of Title 23 of the California Code of Regulations (Underground Storage Tank Regulations).

ELECTRONIC SUBMITTAL OF REPORTS

ACEH's Environmental Cleanup Oversight Programs (Local Oversight Program [LOP] for unauthorized releases from petroleum Underground Storage Tanks [USTs], and Site Cleanup Program [SCP] for unauthorized releases of non-petroleum hazardous substances) require submission of reports in electronic format pursuant to Chapter 3 of Division 7, Sections 13195 and 13197.5 of the California Water Code, and Chapter 30, Articles 1 and 2, Sections 3890 to 3895 of Division 3 of Title 23 of the California Code of Regulations (23 CCR). Instructions for submission of electronic documents to the ACEH FTP site are provided on the attached "Electronic Report Upload Instructions."

Submission of reports to the ACEH FTP site is in addition to requirements for electronic submittal of information (ESI) to the State Water Resources Control Board's (SWRCB) Geotracker website. In April 2001, the SWRCB adopted 23 CCR, Division 3, Chapter 16, Article 12, Sections 2729 and 2729.1 (Electronic Submission of Laboratory Data for UST Reports). Article 12 required electronic submittal of analytical laboratory data submitted in a report to a regulatory agency (effective September 1, 2001), and surveyed locations (latitude, longitude and elevation) of groundwater monitoring wells (effective January 1, 2002) in Electronic Deliverable Format (EDF) to Geotracker. Article 12 was subsequently repealed in 2004 and replaced with Article 30 (Electronic Submittal of Information) which expanded the ESI requirements to include electronic submittal of any report or data required by a regulatory agency from a cleanup site. The expanded ESI submittal requirements for petroleum UST sites subject to the requirements of 23 CCR, Division, 3, Chapter 16, Article 11, became effective December 16, 2004. All other electronic submittals required pursuant to Chapter 30 became effective January 1, 2005. Please visit the SWRCB website for more information on these requirements: (http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/).

PERJURY STATEMENT

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6735, 7835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

UNDERGROUND STORAGE TANK CLEANUP FUND

Please note that delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

AGENCY OVERSIGHT

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.
