Mr. Langbin:

www.cardnoeri.com

At the request of ExxonMobil Environmental Services (EMES), on behalf of Exxon Mobil Corporation, Cardno ERI is notifying you of upcoming on-site activities scheduled for January 16, 2012. Cardno ERI will be installing on-site soil vapor extraction wells SVE1 through SVE3, on-site air sparge well AS1, and monitoring well MW3R at the subject site. This work is expected to take approximately four days to complete. The locations of the proposed wells are shown on the attached Generalized Site Plan.

Once the wells are completed, the driller will refinish the surface to match the surrounding area. Soil waste generated during field activities will be stored on site in 55-gallon drums pending removal from the site and transport to an EMES-approved disposal facility.

Cardno ERI will make every attempt to minimize disruptions to business operations. Cardno ERI will employ various pedestrian and vehicular traffic control measures (i.e., cones, delineators, and caution tape) to limit access to the work zones as necessary. These traffic control measures are designed to ensure the safety of our personnel, station personnel, and the general public.

Thank you for your cooperation. Please contact Ms. Paula Sime, Cardno ERI's project manager for this site, at paula.sime@cardno.com or at (707) 766-2000 with questions regarding the scheduled work.

Sincerely,

SCANNED
