Paresh,

Here is an update on the Soil and Groundwater Investigation Report. As we discussed, Pangea has incorporated a workplan for additional investigation into the report to help expedite site assessment and to help control regulatory oversight costs. Pangea provided a draft report/workplan to the responsible party on December 11, 2009, who is still reviewing it. Due to the holiday schedule, we anticipate receipt of RP comments in early January and report submittal by approximately January 15, 2010.

Sorry for the delay. Happy Holidays to you and your agency.

Hello Paresh,

Pangea respectfully requests an approximate 30-day extension until November 30, 2009 for submission of the requested Soil and Ground Water Investigation Report for the subject site. Pangea recently completed all the field work outlined in the workplan. The field work took a little longer than anticipated due to limited working hours allowed at FCI Dublin and background checks required for all personnel entering the facility. Fortunately, our investigation did not find significant contamination.

Should you have any questions, please feel free to call or email. We appreciate your understanding and consideration of this matter.
