Subject: RO0018 - Encinal 14th Street, LLC

Jerry,

I just uploaded the Encinal response to Technical Comments 11 through 14. I hope we have been able to supply enough information to deal with a couple of the items, the rest our construction group just dug up. We have excavated something around 1,500 cubic yards of soil and pumped over 40K gallons of water. We came close to Residential/Drinking Water ESLs.

Let me know if you have any questions.
