PHASE I PRELIMINARY SITE
ASSESSMENT
FOR
PAPERMILL
EMERYVILLE, CALIFORNIA

I. INTRODUCTION

This report presents the results of a Phase I Preliminary Site Assessment (PSA) performed at the above referenced site. The site is located at 5750 Hollis Street in Emeryville, California. The site encompasses about 2 city blocks and the site vicinity is shown on the Site Vicinity Map, Figure 1.

The purpose of this investigation has been to assess conditions or activities on or near the site which could indicate the potential presence of hazardous materials in the shallow soil or ground water at the site. It is understood that the property owner, Papermill Properties, plans to refinance the subject property.

II. SCOPE OF SERVICES

Our scope of work included a site reconnaissance and interviews with property tenants, performed on May 4, and May 14, 1993; discussions with county and state government agency personnel and individuals familiar with the site, research of available documents, and review of stereoscopic aerial photographs. The research focused on present and past site and near-vicinity conditions and activities which could indicate the potential presence of hazardous materials in the on-site soil or ground water. Persons and agency representatives contacted, articles, documents and data reviewed, and a list of aerial photographs reviewed during this investigation, are presented at the end of this report. This investigation did not include an evaluation of the presence of asbestos-containing materials or radon gas at the site.

This investigation was performed by Tacia Miller, Staff Engineer/Environmental Specialist, under the direction of Randy Rowley, R.G./R.E.A., Senior Geologist. Mr. Rowley is registered as an Environmental Assessor by the State of California. The report was reviewed by Mr. Ronald L. Bajuniemi, P.E. The site reconnaissance was performed by Ms. Miller and Mr. Rowley on May 4, and May 14, 1993.

III. SITE DESCRIPTION

A. Site Description

The site (APN 49-1317-1-1 and 49-1315-1), is shown on the Site Plan, Figure 2, and encompasses about 2 city blocks. Doyle Street runs north/south and separates the western portion from the eastern

portion of the site. According to the owners the complete property encompasses a total area of 121,464 square feet. The western portion is occupied by a two-story concrete building and a masonry building. A parking area separates the concrete building and masonry building. The eastern portion of the site consists of a 10,000 square foot frame office/lab building, a paved parking lot, elevated water tower, and landscaped areas. The entire site is bounded by Powell Street to the north; a neighborhood park on City of Emeryville property and Stanford Street to the south; Hollis Street to the west; and Beaudry Street to the east.

At the time of the site reconnaissance, an underground storage tank (UST) was observed adjacent to the site along the northwest corner of Stanford Avenue and Doyle Street (Figure 2). It was later learned that the tank is an abandoned heating oil tank located on right-of-way property owned by the City of Emeryville.

The two-story concrete building located on the western portion of the site contains a basement used for storage by a silk-screen printing company and photography store. The basement has florescent lighting and contained several rooms with boxes of paper and old photography negatives and there is also an electrical room with 3 old transformers. PCB warning signs were posted on the door to the electrical room and on the transformers.

The eastern portion of the site, bounded by Doyle Street to the west and Beaudry Street to the east, houses an analytical testing laboratory with a small adjacent parking area. The northeastern portion of this property contains an elevated water storage tank.

B. Geology and Hydrogeology

Generally, the subsurface soils in the site vicinity consist of fill soils overlying relatively impermeable "Bay Mud". Underlying the "Bay Mud" are intermittent layers and lenses of clays, silts, and sands to bedrock. The "Old Bay Mud" underlying the site vicinity is part of a regional early Pleistocene geologic formation and is reported to extend to a depth of about 100 feet.

Based upon regional and local topography, ground water in the site vicinity flows in a general direction of west/southwest towards San Francisco Bay. This direction may be affected by tidal fluctuations because of the site's close proximity to the tidal waters of San Francisco Bay. Based on the site elevation of about 20 feet above mean sea level, we estimate that the depth to ground water at the site to be approximately 10 to 15 feet.

IV. SITE HISTORY

As we understand, the property was acquired by the present owners in 1976 from Moore Business Forms, Inc., who had built and used the facility to produce and print paper products. No environmental report has ever been obtained or required. Re-construction and conversion into a multi-tenant complex occurred, for the most part, in 1976-77; and the construction of the 10,000 square foot office/lab building (eastern portion of property) occurred in 1978. The initial work included demolition of a part of the building(s) that occupied the area now used for parking and access between the two buildings located on the Hollis Street parcel (western portion of property).

According to the present owner, there were no reports of any suspicious materials, odor or staining noted during the re-construction, which included major excavation work in the area where the building demolition occurred, or in the crawl space under the masonry building, or on the site where the office/lab building was built. All asbestos has reportedly been removed or encapsulated with the exception of inaccessible areas in the attic (where pipe wrapping contains asbestos).

A. Historic Land Use

We reviewed aerial photographs at Pacific Aerial Surveys in Oakland, California to assess the changes in land use since 1947, the date of the earliest available photograph. Based on the 1947 aerial photograph review, the site consisted of several industrial warehouses on the western portion and open space on the eastern portion. The surrounding area contained a warehouse, light industries, few residences and open spaces at the southeast. Southern Pacific railroad tracks and sidings were present on the south side. The industrial area to the north of the property, appeared to contain several above ground tanks. This facility could have been used as a storage and distribution facility. This site is currently Airco, a specialty gas distributor. No occurrences of spills have ever been reported for the site.

The photographs from 1953 show fewer tanks on the northern bordering site. The property to the southwest of the subject site no longer contains warehouses and shows an open-air storage on pallets. The residential development still exists to the southeast and the eastern portion has a tower and water tank on the northwestern corner. The remainder of the eastern site appears to have either a small orchard or landscaping. The western portion of the site remains industrial with large structures.

The 1969 photographs shows less structures and more parking area on the western portion of the subject site. The small orchard on the eastern site property is replaced with a parking area. Areas

surrounding the site contain industrial warehouse and residences. The above-ground tanks north of the site are removed. Photographs from the 1970s show no major changes to the site and surrounding areas. The property to the north of the site has become open space.

Photographs from the 1980s show the site with large buildings across most of the property. The above-ground water tank to the east still remains on the site. Surrounding property to the north is heavily trafficked with trucks and appears to be well worn with staining. The surrounding southern areas remain industrial and the property located to the southwest of the site, which is owned by PG&E, is covered with pallets of transformers and drums. The railroad tracks still exist along Stanford Street, south of the property.

The 1992 photographs show the area developed to its current level. The subject site has two large buildings and a parking area on the eastern portion and the western portion contains a single building, a parking area and an elevated water tower. The PG&E site to the southeast appears to be an open space. Industrial areas are located to the north and west of the subject site. The southern bordering sites contain a few warehouses. The area to the west appears to be residential.

During this investigation, an attempt was made to review Sanborn Fire Insurance Maps to aid in evaluating previous site history. We were, however, unable to locate any Sanborn map coverage for the subject area.

V. ENVIRONMENTAL CONDITIONS

A. Site Environmental Conditions

Our site reconnaissance, interviews with occupants of the buildings on the subject property, and review of aerial photos and public files, revealed a few site conditions of environmental concern.

At the time of the site reconnaissance, the building tenants at the site consisted of:

| | |
|--------------------------------------------|------------------|
| -BASIS Inc. | -Hero Arts |
| -Bensen & Associates | -Italian Ceramic |
| -Bel Aire Graphics | -Pay Attention |
| -Brown & Caldwell Analytical Laboratory | -Rice/Ehrens |
| -Computer Currents | -Silverstone |
| -Esperanto League | -Support Systems |
| -Fisher Photo | -Wildflower |

At the time of the site reconnaissance, the tenants of the two-story concrete building, located along Hollis Street, consist of a desktop publishing company, computer software company, hospital bed burn-unit service company, silk-screen printing company, photograph retail store and photograph development lab, and several small independent businesses. The tenants in the masonry building, along Doyle Street, consist of a rubber stamp assembly warehouse, ceramic tile distributor, photograph and computer video outlet, clothing designer and a retail Christmas ornament outlet.

Our reconnaissance of the site, and interviews with the tenants, discovered some areas in the buildings of possible environmental concern. It should be noted that Brown & Caldwell Analytical Laboratory (BCA), located on the eastern portion of the site is an agency-listed site, listed as a hazardous waste generator. However, leaks or spills have not been reported at the site. Larry Penfold, Client Manager, indicated that there have never been any problems with hazardous materials spills at the laboratory. At the time of the site reconnaissance, all necessary permits had been obtained and all hazardous materials present on-site were properly secured and stored. In our opinion, this property should not be a source to impact the site.

Bel Aire Displays has been in operation for 16 years and is located on the western portion of the property along Hollis Street. They operate a silk-screen printing facility which produces graphic signs and posters. Solvent-based inks are used in their process and several waste streams are produced. According to manager, Chris Shadix, the waste streams are regulated and tested regularly by the East Bay Municipal Utilities District (EBMUD), the Environmental Protection Agency (EPA), and the Fire Department. All waste solvents and reclaimed fixer are picked up by a recycling service on a regular basis. In addition, Bel Aire Displays, has their paints and inks contained in a bermed and concrete floor, storage room. No violations were reported at any of the agencies for Bel Aire Graphics. In our opinion, Bel Aire Graphics does not represent a source to impact the site.

The basement level, located in only the western portion of the two-story concrete building on the western property is used for storage by Fisher Photo and Bel Aire Graphics. At the time of the site reconnaissance, 3 old transformers were observed in the electrical room in the northwestern corner of the basement. PCB warning signs were posted on the door for the electrical room and on the transformers. We are informed by the owner that only one of the three transformers has oil with PCB. The florescent lighting in the basement has the potential to contain PCBs as well. No liquids or other types of hazardous materials were observed in the basement.

During our site reconnaissance, we noted that the property across Stanford Avenue from the subject site, (5521 Doyle Street) exhibited evidence of a recent UST removal, and installation of a monitoring well. We observed a new asphalt patch (about 10' x 12') in the fence enclosed parking area, also, a monitoring well type of cover near the patch and three 55 gallon drums. We found that this site is not on any of the lists we reviewed. We have interviewed the past tenant of the site and the Alameda County case worker for this site. We have designated this site #57 on our Site Vicinity Map and on Table 1.

B. Regional Environmental Conditions

Information on regional environmental conditions is derived from a variety of government agency sources. To assess whether sites with documented environmental problems exist within a one-half mile radius of the site, we reviewed the following regulatory agency lists:

- California Regional Water Quality Control Board (RWQCB) Fuel Leaks list.

Twenty-one fuel leak sites are listed within a one-half mile radius of the site.

- California Environmental Protection Agency (Cal EPA) (formerly Department of Health Services) Expenditure Plan for the Hazardous Substance Cleanup Bond Act of 1984, (State Superfund) revised 1990 and Abandoned Site List.

Forty-three actual or potentially contaminated sites under the abandoned site program are located within a one-half mile radius of the property, including Brown and Caldwell Analytical Laboratory, located on a portion of the subject site. Thirty-three of these sites, including Brown and Caldwell, are listed as requiring no further action.

- U.S. EPA Superfund CERCLIS listing (lists potential Superfund sites) and National Priorities List (NPL).

Six sites are listed within a one-half mile radius of the subject site.

- California Integrated Waste Management Board Closed, Inactive and Active Landfills list (Solid Waste Information System, SWIS).

No sites are listed within a one-half mile radius of the subject site.

- State of California Office of Planning and Research Hazardous Waste and Substances Sites list ("Cortese List").

Twenty-nine sites are listed within a one-half mile radius of the subject site.

- Hazardous Waste Information Systems (HWIS) List (lists known generators of hazardous materials).

Nineteen sites are listed within a one-half mile radius of the subject site, including Brown and Caldwell Analytical Laboratory located on the subject site.

In addition, we reviewed regulatory agency files for specific information regarding listed sites identified in this report. The investigation indicates that there are 76 agency-listed sites within a one-half mile radius of the site. We note that some of site identification numbers may contain more than one address. Figure 2 presents the locations of these sites and Table 1 presents the status of these sites. The following is a discussion of select sites based on information from regulatory agency files reviewed during the investigation. We selected the sites for additional file review based on their upgradient location and/or proximity to the subject property.

Site No. 4, Parina Enterprises, 5433 San Pablo Avenue

Fuel leak site is located about 0.4 miles southeast (lateral-gradient) of the subject site. According to reports in RWQCB files, 2 underground fuel storage tanks were removed from the site in March 1990. Soil samples from the tanks pits were taken at depths of 8 feet and analyzed for total petroleum hydrocarbons (TPH) and benzene toluene, ethylbenzene, and xylene petroleum hydrocarbons (BTEX). No TPH was reported and only trace amounts of BTEX were present in the samples. Based on the source characterization, this site should have minimal potential to impact the subject site.

Site No. 4, General Cleaners, 5426-28 San Pablo Avenue

ASPIS listed site approximately 0.4 miles southeast (lateral-gradient) of the subject site. The site is listed as requiring no further action and therefore, should have minimal potential to impact the project site.

Site No. 6, J. R. Watson Associates, 1133 55th Street

ASPIS listed site approximately 0.35 miles southeast (lateral-gradient) of the subject site. The site is listed as requiring no further action and therefore, should have minimal potential to impact the project site.

Site No. 7, Chief Auto Parts/Super-7, 5714 San Pablo Avenue

Fuel leak site located miles 0.25 miles east (up-gradient) of the subject site. According to Susan Hugo of Alameda County Health Services Agency (ACHSA), all soil contamination at the site has been addressed and is remediated to the ACHSA satisfaction. Ms. Hugo indicated that there are a few monitoring wells on-site, however, only trace amounts of gasoline hydrocarbons are detected in the ground water. With the known site characterization the site's potential to impact the project site is minimal.

Site No. 8, Utility Products Inc., 1212 Powell Street

ASPIS listed site approximately 0.25 miles northeast (up-gradient) of the subject site. The site is listed as requiring no further action. The site, therefore, should not represent a patched up source to impact the project site.

Site No. 9, Provenzano and Associates, 1303 Stanford Avenue

Listed as a low priority ASPIS site, it is located about 0.2 miles northeast (up-gradient) of the subject site. Files at the State of California Environmental Protection Agency (Cal EPA) indicate a preliminary site assessment is required for this site, however, it is low priority. A note dated September 1987 in the site file indicated that there are no other agency files for the site. Given the low priority, this site could be considered on a low risk site.

Site No. 12, Brown & Caldwell, 1255 Powell Street

The tenant on the subject site (eastern portion), is listed as a hazardous waste generator and ASPIS site. It is fully permitted and regulated. Given the source site characteristics the potential impact to the project site would be minimal.

Site No. 12, Boyd's Body Shop, 1245 Powell Street

Listed as a hazardous waste generator, the site is located 60 feet east (up-gradient) of the subject site. Contamination however, has not been reported for the site. A regulated hazardous waste generator present at this location is not deemed a significant concern to the site environmental conditions. The potential impact of this site to the project site is minimal.

Site No. 17, Curtis Pacific, 1345 Powell Street

Listed as a hazardous waste generator, the site is located 0.1 miles west (lateral-gradient) of the subject site. Contamination however, has not been reported for the site. A regulated hazardous waste generator present at this location is not deemed a significant concern to the site environmental conditions. The potential impact of this site to the project site is therefore, minimal.

Site No. 18, Alabama Metal Industries, 1355 59th Street

Listed as a hazardous waste generator the site is located 0.15 miles northwest (lateral-gradient) of the subject site. Contamination however, has not been reported for the site. A regulated hazardous waste generator is not deemed a significant concern to the site environmental conditions. The potential impact of this site to the project site is minimal.

Site No. 21, Industrial Hard Chrome, 5701-5705 Hollis Street

The site is located about 1000 feet west (down-gradient) of the subject site. This site is listed with CERCLIS, however files at Cal EPA indicate the site has been taken off the CERCLIS listing and is currently listed as a low priority ASPIS site. This site was occupied by Industrial Hard Chrome from 1948 through 1962, and was operated as a job shop to produce hard chrome plates. Reports in Cal EPA files, indicate there was a release of chrome plating solution (a mixture of sulfuric acid and chromic acid) in October 1958, to the storm sewer. No health related incidents were reported and it is not known if the site is contaminated because the incident occurred in 1958. The site is listed as low priority because it cannot definitely be stated that there was contamination. According to previous reports, the site is leased to the State of California and is used as an Air and Industrial Hygiene Laboratory. Brian Oliva of ACHSA indicated this site has been "cleaned-up". Based on the down-gradient location and regulatory agency statements, the subject site should not be of concern.

Site No. 57, Former Clementina Equipment Rentals, 5521 Doyle Street

The site is located about 300 feet south (lateral to downgradient) of the subject site. This is not the site which we found on our lists but was identified during our site reconnaissance. The site is to be listed as fuel leak site according to Ms. Susan Hugo (caseworker) at ACDEH. She described the site as having a diesel tank and a gasoline tank recently removed. Soil samples taken from the excavation were tested for diesel, gasoline, and BTEX, and the results were non-detect. A grab water sample from the excavation had 1.2 ppm of diesel identified. The County ordered testing of

the ground water but they have not received a report as yet. We spoke with Mr. Tod Tassone at Clementina. He said a report of recent ground water monitoring well sampling is to be submitted that shows no detectable diesel, gasoline or BTEX. Based on these findings the potential of this site to impact the project site is deemed minimal.

As previously discussed, we noted the presence of an underground storage tank adjacent to the site, along the northwestern corner of Stanford and Doyle. This tank is not included on agency lists, and it is not known if leakages occurred from the tank. However, this tank represents a potential impact to soil and ground water quality at the site.

VI. CONCLUSIONS AND RECOMMENDATIONS

This investigation included a preliminary site assessment to identify areas of environmental concern within the site and near vicinity. We have discovered no indication that the present uses of the site have had an environmental impact on the site soil or ground water. As the owner has reported to us, during reconstruction of the site there were no reports of suspicious odors, or stains, or unusual materials. Our review of regulatory agency files indicated that a majority of the near vicinity site listed on Table 1 were hazardous waste generators but had no reported contamination, or were ASPIS sites requiring no further action. Table 1 lists the relative potential (low-moderate-high) of the source to impact the project site.

It should be noted that an old heating oil tank located on City of Emeryville right-of way, is located adjacent to the subject site. According to Brian Oliva of ACHSA, heating oil tanks are not governed by underground storage tanks laws and are not required to be removed.

However, it is possible that if the tank leaked in the past, it may have impacted soil or ground water quality beneath the subject site. We recommend that the present property owners continue to contact the City of Emeryville and be notified when the tank is removed.

VII. LIMITATIONS

The purpose of an environmental assessment is to reasonably evaluate the potential for or actual impact of past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of

each conceivable issue of potential concern. The following paragraphs discuss the assumptions and parameters under which such an opinion is rendered.

No investigation is thorough enough to exclude the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not therefore be construed as a guarantee of the absence of such materials on the site, but rather as the results of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at unsampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

INVOICE

PAYABLE UPON RECEIPT

DATE: June 3, 2002

INVOICE NO. 21397

SOLD TO: Don Jones Co.
2081 Adams Ave.
San Leandro, CA 94577

PROJECT: Papermill - Hero Arts
1343 Powell St.
Emeryville, CA

DESCRIPTION: Replace Broken Skylight w/ObscureWire Glass

AMOUNT DUE:

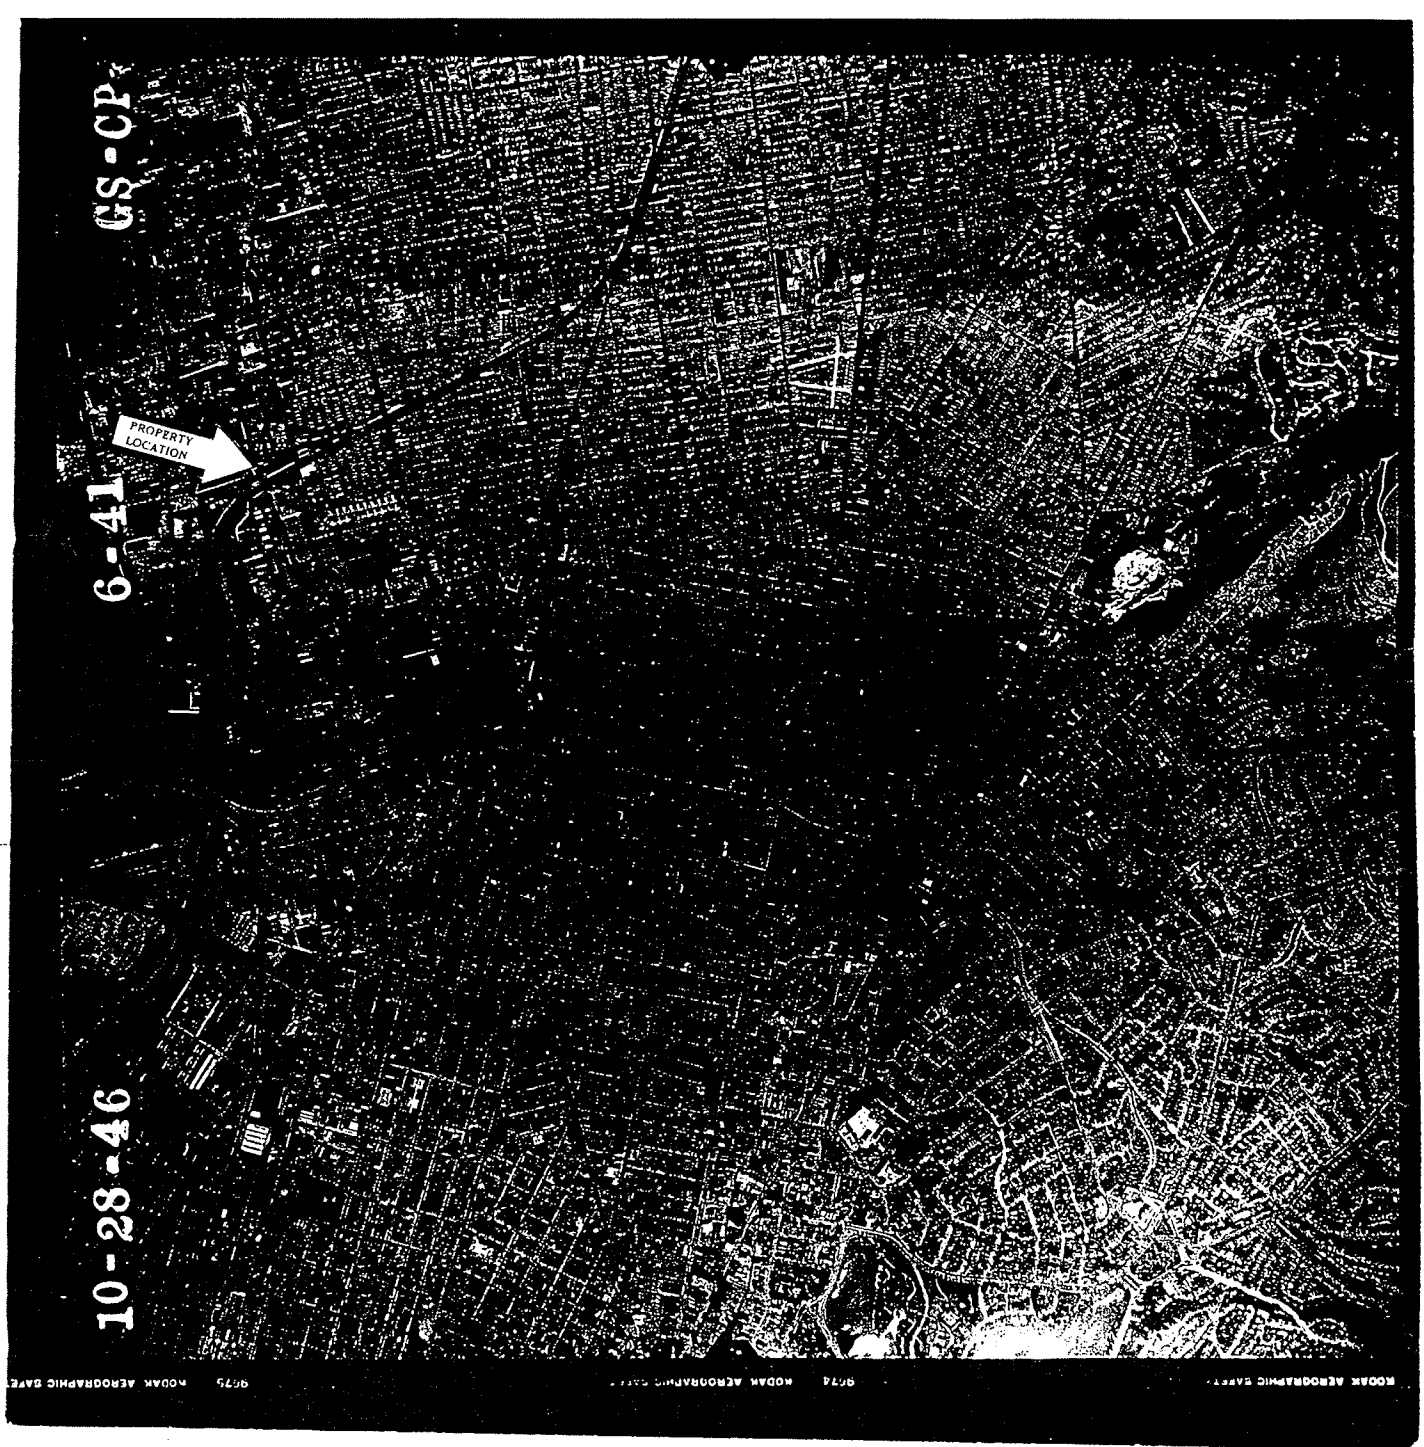

*respons. of
UltraTech
OK
[Signature]*

\$487.00

THANK YOU,

Ron Waggener

PAYMENTS RECEIVED 30 DAYS AFTER INVOICE DATE WILL ACCRUE
INTEREST CHARGES AT 1.5% PER MONTH (18% APR).

10.5 STATEMENT OF INDEPENDENCE

California Environmental Real Estate Services is doing business as CERES Environmental, and is a California corporation. CERES Environmental is contracted with Papermill Properties to conduct this assessment. However, CERES Environmental is free of any other bond with Papermill Properties and is acting as an independent contractor to provide environmental consulting services.

Information was not obtained through review of other reports that indicates environmental problems on the Property.

10.6 OTHER REPORTS

SUMMARY OF ASBESTOS RESULTS

TABLE OF HOMOGENEOUS AREAS

| HOMOGENEOUS AREA NUMBER | MATERIAL DESCRIPTION | QUANTITY OF SAMPLES TAKEN |
|----------------------------|-----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| F01 | 12" x 12" Resilient floor tile and mastic Light green with beige specks | 1 |
| F02 | 12" x 12" Resilient floor tile and mastic White with brown streaks | 1 |
| F03 | 9" x 9" Resilient floor tile Located in basement of Hollis Street building | None - Indicated to be ACM by the Ms. Kordula Gardner, Property Manager |
| W01 | Drywall gypsum wallboard and joint compound | 1 |
| R01 | Composition roof shingles Grey | 1 |
| R02 | Roof mastic Black | 1 |
| R03 | Roof mastic on parapet Black and silver | 1 |
| T01 | Thermal pipe insulation around 1" to 2" pipe | 1 |
| T02 | Thermal fitting insulation around fittings of 1" to 2" pipe | 1 |
| T03 | Thermal pipe insulation around 2" to 3" pipe | 1 |
| T04 | Thermal fitting insulation around fittings of 2" to 3" pipe | 1 |
| T05 | Transite pipe - 4" diameter Located in attic of Hollis Street building near the southeast stairwell | None - Assumed to be ACM |
| M01 | HVAC duct tape | 1 |

TABLE OF BULK SAMPLE LOCATIONS

| FIELD NUMBER | HOMOGENEOUS AREA NUMBER | MATERIAL DESCRIPTION AND SAMPLE LOCATION | ASBESTOS CONTENT |
|---------------------|--------------------------------|----------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| 01 | F01 | Resilient floor tile and mastic 5760 Hollis Street | Tile: 1-5% Chrysotile Mastic: 15-20% Chrysotile |
| 02 | W01 | Drywall gypsum wallboard and joint compound Hollis Street building, Second floor common hallway | Trace Chrysotile |
| 03 | T01 | Thermal pipe insulation Hollis Street building attic near return air plenum | 20-25% Chrysotile 5-10% Amosite |
| 04 | T02 | Thermal pipe fitting insulation Hollis Street building attic near return air plenum | 15-20% Chrysotile 15-20% Amosite |
| 05 | F02 | Resilient floor tile and mastic 1255 Powell Street lab area | Tile: None Detected Mastic: 5-10% Chrysotile |
| 06 | R01 and R02 | Composition roof shingles and mastic Hollis Street building, south corner of roof | None Detected |
| 07 | R03 | Roof mastic Parapet of Hollis Street building roof, south corner of roof | 10-15% Chrysotile |
| 08 | T03 | Thermal pipe insulation Hollis Street building attic above conference room | 5-10% Chrysotile 20-25% Amosite |
| 09 | T04 | Thermal pipe fitting insulation Hollis Street building attic above conference room | 10-15% Chrysotile 20-25% Amosite |

| FIELD NUMBER | HOMOGENEOUS AREA NUMBER | MATERIAL DESCRIPTION AND SAMPLE LOCATION | ASBESTOS CONTENT |
|--------------|-------------------------|-------------------------------------------------------------------------------------|----------------------|
| 10 | M01 | HVAC Duct tape Hollis Street building attic Duct near unit by conference room | 90-95% Chrysotile |

INTRODUCTION

This document, prepared on the request of Ceres Environmental, reports the findings of BBL's investigation of environmental concerns in the vicinity of Hollis, Powell, Beaudry & Stanford, Emeryville. It is divided in the following segments:

- ◆ Map - showing the location of the identified sites relative to the subject site. A total of 109 separate sites were identified.
- ◆ Summary - listing the identified sites by street names.
- ◆ Final Report - describing the sources investigated and the resulting findings:

- Facilities known to have environmental concerns:

- Federal Sources:

| | |
|------------------------|----------|
| National Priority List | No sites |
| CERCLIS | 9 sites |
| Federal Facilities | No sites |
| ERNS | 13 sites |
| Federal Dockets | No sites |
| RCRA Violators | 1 site |
| Superfund Liens | No sites |

- State Sources:

| | |
|-----------------------------------|----------|
| Annual Work Plan | 2 sites |
| CalSites | 42 sites |
| Cortese | 33 sites |
| State Solid Waste Assessment Test | No sites |
| Solid Waste Information System | No sites |
| State Leaking Underground Tanks | 31 sites |

- Regional Sources:

| | |
|--------------------------------------|----------|
| Regional Leaking Underground Tanks | 32 sites |
| Non-Tank or Unauthorized Releases | 11 sites |
| Toxic Pits | No sites |
| Regional Solid Waste Assessment Test | No sites |
| Well Investigation Program | No sites |

- Facilities with operating permits to generate, handle, store or dispose of hazardous material:

| | |
|------------------------------------|----------|
| Hazardous Waste Information System | 32 sites |
| Underground Storage Tanks | 36 sites |
| SARA Title III | No sites |
| RCRA Notifiers list | 28 sites |

- ENVIRONMENTAL CONCERNS - HIGH PRIORITY WITHIN 1/2 MILE
- ENVIRONMENTAL CONCERNS WITHIN 1/2 MILE
- ENVIRONMENTAL CONCERNS - WITH A 'NO FURTHER ACTION' STATUS WITHIN 1/2 MILE
- OPERATING PERMITS ONLY, WITHIN 1/2 MILE

Map reproduced under license from Thomas Bros. (ALA 03 E5)

3.3 inches to 1 mile

ENVIRONMENTAL RECORDS SEARCH

LISTED BY SOURCE

INTRODUCTION

The following government sources have been searched for sites within half a mile radius, unless otherwise stated, of the subject location.

BBL has used its best effort but makes no claims as to the completeness or accuracy of the referenced government sources or the completeness of the search. Our records are frequently updated but only as current as their publishing date and may not represent the entire field of known or potential hazardous waste or contaminated sites. To ensure complete coverage of the subject property and surrounding area, sites may be included in the list if there was any doubt as to the location because of discrepancies in map location, zip code, address, or other information in our sources.

FEDERAL SOURCES

NPL National Priority List

EPA has prioritized sites with significant risk to human health and the environment. These sites receive remedial funding under the Comprehensive Environmental Response Conservation and Liability Act (CERCLA).

No listings within the specified range.

CERCLIS Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS is a data base used by the EPA to track activities conducted under the Comprehensive Environmental Response and Liability Act CERCLA (1980) and the amendment the Superfund Amendments and Reauthorization Act SARA (1986).

Sites to be included are identified primarily by the reporting requirements of hazardous substances Treatment, Storage and Disposal(TSD) facilities and releases larger than specific Reportable Quantities(RQ), established by EPA.

Using the National Oil and hazardous Substance Pollution Contingency Plan(National Contingency Plan) the EPA set priorities for cleanup.

The EPA rates National Contingency Plan sites according to a quantitative Hazard Ranking System(HRS) based on the potential health risk via any one or more pathways: groundwater,surface water, air, direct contact, and fire/explosion.

The EPA and state agencies seek to identify potentially responsible parties(PRP) and

ultimately Responsible Parties(RP) who can be required to finance cleanup activities, either direct through reimbursement of federal Superfund expenditures.

FEDFAC Federal Facilities

As part of the CERCLA program, federal facilities with known or suspected environmental problems, the Federal Facilities Hazardous Waste Compliance Docket is tracked separately to comply with a Federal Court order.

No listings within the specified range.

ERNS Emergency Response Notification System

The ERNS is a national computer database used to store information on unauthorized releases of oil and hazardous substances. The program is a cooperative effort of the Environmental Protection Agency, the Department of Transportation Research and Special Program Administration's John Volpe National Transportation System Center and the

National Response Center.

There are primarily five Federal statutes that require release reporting: the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) section 103; the Superfund Amendments and Reauthorization Act (SARA) Title III Section 304; the Clean Water Act of 1972 (CWA) section 311(b)(3); and the Hazardous Material Transportation Act of 1974 (HMTA) section 1808(b).

LIENS Superfund Liens

A current list of Federal Superfund Liens as compiled by the Office of Enforcement and Compliance Monitoring (OECM), EPA, Washington, D.C. based upon information submitted by EPA's ten Regional Offices. The EPA and the OECM make no representations regarding the accuracy or completeness of the list.

No listings within the specified range.

RCRA RCRA Violators List

The Resource Conservation and Recovery Act of 1976 provides for "cradle to grave" regulation of hazardous wastes. RCRA requires regulation of hazardous waste generators, transporters, and storage/treatment/disposal sites. Evaluation to potential violation, ranging from manifest requirements to hazardous waste discharges, is typically conducted by the US EPA.

If enforcement is required, it is typically delegated to a state agency.

CALIFORNIA STATE SOURCES

AW Annual Work Plan (previously known as Bond Expenditure Plan)

The California Health and Safety code, as amended by AB 129, requires the California Environmental Protection Agency to develop a site-specific expenditure plan as the basis for an appropriation of California Hazardous Substance Cleanup Bond Act of 1984 funds.

The Agency is also required to update the report annually and report any significant

adjustments to the Legislature on an ongoing basis. The plan identifies California hazardous waste sites targeted for cleanup by responsible parties, the California and the Federal Environmental Protection Agency over the next five years.

Status Codes: *BKLG* *Backlog, Potential Annual Work Plan Site*
 AWP *Active Annual Work Plan site*
 COM *Certified, but still in Operation & Maintenance mode*
 CERT *Certified after remediation*
 DLST *Delisted from the AWP*
 REFRC *Former AWP site referred to RCRA*
 REFRW *Former AWP site referred to the Regional Water Quality Board*

Site: PACIFIC GAS AND ELECTRIC - EME
Address: 4525 HOLLIS ST

CALS CALSITES (previously known as The Abandoned Sites Program Information System ASPIS)

The Historical Abandoned Site Survey Program identified certain potential hazardous waste sites. The identification of these sites were generally not made via sampling and site characterization, they were made as a result of file searches and windshield surveys. Some of the sites may have had a site inspection with sampling.

The information has been compiled into this database by California Environmental Protection Agency, Department of Toxic Substance Control (DTSC) in accordance with Section 25359.6 of the California Health and Safety Code.

Status Codes: *PEARL* *Preliminary Endangerment Assessment Required,Low priority*
 PEARM *Preliminary Endangerment Assessment Required,Medium priority*
 PEARH *Preliminary Endangerment Assessment Required,High priority*
 SSR *Site Screening Required*
 HRR *Hazard Ranking Required*
 PRPR *Potential Responsible Party Search Required*
 NFA *No Further Action for DTSC*
 EPA *EPA is the lead agency*
 RCRA *Mitigated under the RCRA permitting program*

RWQCB Mitigated under the lead of the Regional Water Quality Boar
CNTY County lead
OAL Other Agency lead

(Suffixes L,M and H indicates Low, Medium or High Priority)

CORTESE State of California Office of Planning and Research

This database is a consolidation of information from various sources. It is maintained by the State Office of Planning and Research and lists potential and confirmed hazardous waste or substances sites. This source was last updated by the government in November 1990.

Status Codes: *WRCBT Tank leaks. Compiled by Water Resource Control Board*

- DHS1 Abandoned hazardous waste site. Compiled by Toxic Substance Control Div. of DHS
- DHS2 Contaminated public water drinking wells serving less than 200 connections. Compiled by Env. Health Div. of DHS
- DHS3 Contaminated public water drinking wells serving more than 200 connections
- DHS5 Sites pursuant to section 25356 of the Health and Safety Code (see BEP)
- CWMB Solid waste disposal sites with known migration of hazardous waste

SWAT(S) Solid Waste Assessment Test - California State

This program, provided for under the Calderon legislation (Section 13273 of the Water Code), requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether or not the site has discharged hazardous substances which will impact the environment.

Site operators are required to file Solid Waste Assessment Test reports on a staggered basis. Operators of the 150 highest ranking (Rank 1) sites were required to submit Solid Waste Assessment Tests by July 1, 1987, Rank 2 in 1988 and so on.

Operators submit water quality tests to the Regional Water Quality Control Board, describing surface and groundwater quality and supply; and the geology within 1 mile of the site. Air quality tests are submitted to the local Air Quality Management District or Air Pollution Control District.

Status Codes: Facilities or sites are ranked within each region on a scale 1-15

according to priority.

No listings within the specified range.

SWIS Solid Waste Information System

As legislated under the Solid Waste Management and Resource Recovery Act of 1972, the California Waste Management Board maintains lists of certain facilities, i.e. Active solid waste disposal sites, Inactive or Closed solid waste disposal sites and Transfer facilities.

No listings within the specified range.

REGIONAL SOURCES

LUST(R) Leaking Underground Storage Tanks - Regional

Each of the California Regional Water Quality Control Boards RWQCB maintains lists of leaking underground storage tanks.

TPC Toxic Pits

The Toxic Pits Clean-Up Act (Katz Bill) places strict limitations on the discharge of liquid hazardous wastes into surface impoundments, toxic ponds, pits and lagoons. Regional Water Quality Control Boards are required to inspect all surface impoundments annually, in addition, every facility was required to file a Hydrogeological Assessment Report. Recent legislation allows the Department of Health Services to exempt facilities that closed on or before December 31, 1985, if a showing is made that no significant environmental risk remains (AB1046).

Special exemption provisions have been created for surface impoundments that receive mining wastes.

No listings within the specified range.

SWAT(R) Solid Waste Assessment Test - Regional

The Solid Waste Assessment Test Program targets sites where there is a possible risk of hazardous waste escaping from solid waste disposal sites (landfills), threatening both water and air quality. Threatening sites are required to submit water quality Solid Waste Assessment Tests to their Regional Water Quality Control Board. Air quality Solid Waste Assessment Tests are submitted to the local Air Quality Management District or Air Pollution Control District.

No listings within the specified range.

WIP Well Investigation Program

The Well Investigation Program (AB1803) identifies groundwater that is already contaminated and empowers the California Department of Health Services and local health officers to order ongoing monitoring programs. The focus of this program is to monitor and protect drinking water.

No listings within the specified range.

OPERATING PERMITS

Various agencies issue operating permits or regulate the handling, movements, storage and disposal of hazardous materials and require mandatory reporting. The sources referenced below have been searched within half a mile of the subject site.

The inclusion in this section does not imply that an environmental problem exists presently or has in the past.

SARA SARA Title III,section 313

Title III of the Superfund Amendments and Reauthorization Act,Section 313, also known as Emergency Planning and Community Right-to-Know Act of 1986 requires owners or operators of facilities with more than 10 employees and are listed under Standard Industrial Classification(SIC) Codes 20 through 39 to report the manufacturing, processing or use of more than a threshold of certain chemical or chemical categories listed under section 313.

No listings within the specified range.

HWIS Hazardous Waste Information System

The Department of Toxic Substance Control, California Environmental Protection Agency, maintains a a data base keeping track of the movement and disposal of hazardous waste. The data is used to support the Tanner legislation, AB 2948.

UST

Permitted Underground Storage Tanks - State Water Quality Board

The Corteses Bill (AB2013), enacted in 1983, required registration of all underground storage tanks (UST) with the State Water Quality Board by July 1, 1984. About 176,000 tanks and surface impounds were registered between 1984 and 1987. An amendment (AB 1413) was passed in 1987, effectively removing the State Board from the registration process starting January 1, 1988. The data reflects the information collected by the state between 1984 and 1987 and includes all tanks and surface impounds in use or closed between 1974 and 1987.

Home and farm heating fuel tanks with capacities of 1,100 gallons or less and "structures such as sumps, separators, storm drains, catch basins, oil field gathering lines, refinery pipelines, lagoons, evaporation ponds, well cellars, separation sumps, lined and unlined pits, sumps and lagoons" except those defined as UST under HSWA or may be regulated to protect water quality under the Porter-Cologne Water Quality Control Act are excluded.

CONCERNING: Site Walk

Ms. Gardner ^{accompanied} ~~provided~~ CERES during ^a ~~the~~ survey of the interior of the buildings on the Property. She provided access to the attic. She provided information about what the tenants businesses were.

She said Brown and Caldwell vacated ~~the~~ Property at the beginning of December 1993. She asked B&C to do a wipe sample of the interior of the building but she has not received any results.

Ms. Gardner said that asbestos abatement has been conducted in the ~~at~~ 5710-5770 Hollis St. She said she knew that ^{floor} tile in the basement and pipe insulation in the attic contained ~~asbestos~~. She said to talk to Don Jones about abatement reports.

Ms. Sharon Jang
Office of Public Affairs
UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
75 Hawthorne Street
San Francisco, CA 94105

Dear Ms. Jang:

CERES Environmental (CERES) is conducting an environmental site assessment for a property located in Alameda County, California. The address of the property is:

Papermill Commercial Offices (formerly Moore Business Forms)
5741-5749 Doyle Street, 5710-5770 Hollis Street, 1255-1349 Powell Street, and 1342 Stanford Avenue, Emeryville, California 94608

Under the Freedom of Information Act, CERES is requesting information on whether the property or adjacent areas have been listed on either the CERCLIS list, RCRA database or other databases maintained by the U.S. EPA. We are specifically interested in information that indicates current or past presence of hazardous materials which pose a health or safety hazard on, or adjacent to the property.

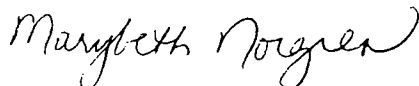

We would like to receive copies of the above mentioned items within two weeks if possible, so that we may provide a timely report to our client. Please send the information to:

CERES Environmental
2221 Commerce Avenue, Suite D-1
Concord, California 94520

Thank you for your assistance.

Sincerely,

CERES

December 27, 1993

Project Number A078-01

Mr. Milton Feldstein
Air Pollution Control Officer
BAY AREA AIR QUALITY MANAGEMENT DISTRICT
939 Ellis Street
San Francisco, CA 94109

Dear Mr. Feldstein:

CERES Environmental is currently conducting an environmental assessment of a property located in Alameda County, California.

The Property includes the following addresses:

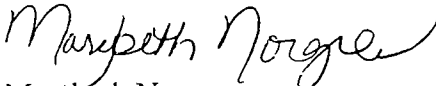

Papermill Commercial Offices (formerly Moore Business Forms)
5741-5749 Doyle Street, 5710-5770 Hollis Street, 1255-1349 Powell Street and 1342 Stanford Avenue, Emeryville, California 94608

CERES would like to review all information regarding the property. We are particularly interested in current or past permits and records of violations.

Please contact our Bay Area office at (510) 825-4466 if additional information is necessary. If records are present at your agency which cannot be copied and mailed, CERES would like to make an appointment to review them at your office as soon as possible.

Sincerely,

CERES

Marybeth Norgren
Environmental Specialist

RE: Your 12-27-93 request for District records

Dear Ms. Norgren:

A search of District files show no records associated with the Commercial Office Building located at 300 Broadway in San Francisco. Regarding the addresses in Emeryville, please find that information enclosed.

If I can be of further assistance to you, please call me at (415) 749-4784.

Sincerely,

Rochelle Walker
Air Quality Technician

Mr. Brian ~~Libo~~, Hazardous Material Specialist
Alameda County Health Care Services Agency
Environmental Health Department
Hazardous Materials Division
80 Swan Way, Room 200
Oakland, CA 94621

Dear Mr. Libo:

CERES Environmental (CERES) is conducting an environmental site assessment for a property located in Alameda County, California.

The Property includes the following addresses:

Papermill Commercial Offices (formerly Moore Business Forms)
5741-5749 Doyle Street, 5710-5770 Hollis Street, 1255-1349 Powell Street, and 1342 Stanford Avenue, Emeryville, California 94608

CERES is requesting information on whether the Property or adjacent areas have been listed in the files maintained by the Division. We are specifically interested in information that indicates current or past presence of hazardous materials which pose a health or safety hazard on or adjacent to the Property including the use of aboveground and/or underground storage tanks.

If records are present at the Division, CERES would like to be notified. Please contact our Bay Area office at (510) 825-4466 if additional information is necessary.

Thank you for your assistance.

Sincerely,

CERES

Marybeth Norgren
Environmental Specialist

Re: Freedom of Information Act Request RIN-9-3361-93

Dear Ms. Norgren:

This is in response to your Freedom of Information Act (FOIA) request dated December 27, 1993.

I wish to advise you that the CERCLIS program has no records responsive to your request. If you consider this response to be a denial, you may appeal it by addressing your written appeal to the Freedom of Information Officer (A-101), United States Environmental Protection Agency, 401 M. Street, S.W., Washington, D.C. 20460.

If you have any questions, please contact Thomas Mix of this office at (415) 744-2344.

Sincerely,

A handwritten signature in black ink, appearing to read "D.C. White".

Donald C. White, Chief
Field Operations Branch

Freedom of Information Act

RIN-9- 3361-93

Your Reference: ZIP CODE 94608

The Resource Conservation and Recovery Act (RCRA) database lists those regulated facilities that have notified EPA as hazardous waste generators, transporters or treatment, storage or disposal facilities under RCRA. This database may not contain all the potential hazardous waste sites that exist or that are regulated by state and local agencies.

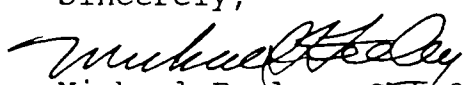

The RCRA information EPA has on file is enclosed. Information requested from the files of another EPA Division will be sent to you directly.

California, Arizona and Nevada are now authorized to implement the Federal RCRA program. We suggest that you contact the appropriate state agency, as they may have more current information (list attached).

COMMENTS: _____

There will/will not be a fee for providing the requested information (40 C.F.R. Section 2.120s(a)(5)(iii)). Payment of the enclosed bill is due within 30 days.

If you have questions regarding your RCRA request, please contact Jacqueline Jennings or Pamela Cooper at (415) 744-2060.

Sincerely,

Michael Feeley, Chief
Permits & Solid Waste Branch

RECEIVED
CERES
DUST AREA

JAN 10 1994

FOR PAPERMILL PROPERTIES

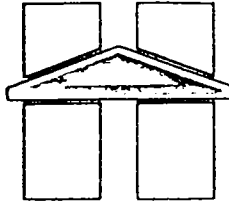

To: Marybeth Norgren, Ceres Environmental
From: Don Jones
Date: January 6, 1993
Re: Papermill Phase I

Marybeth - enclosed is a report from Merritt Corporation on the decontamination of asbestos in, primarily, the attic area of the Hollis Street building.

As indicated in the report, they state that all asbestos that could present a hazard to occupants or workers in that building has been removed or encapsulated, and final clearance obtained through air sampling and laboratory tests.

To our knowledge, on site asbestos containing building materials have been or are limited to (a) insulating materials covering pipes and mechanical ducting, which for the most part have either been removed or encapsulated; (b) duct insulation found in inaccessible areas of the attic which, according to Merritt, do not constitute a hazard to either the building occupants or service or construction workers; and (c) floor tiles in the basement which are suspected of containing asbestos but which are not in ill repair or friable.

Major renovation was performed after we acquired the property in 1976; and, other than the above, no asbestos containing materials were found (i.e. in the walls or ceilings of the buildings) or used by the contractor, Lindquist/McNely Company (now McNely Construction Company).

Re: Asbestos Abatement, Papermill Properties
Powell & Hollis, Emeryville, CA

Dear Kordula:

We appreciate the opportunity of submitting this proposal and recommendations on the above mentioned project as follows:

Introduction

The object of this asbestos abatement project is to decontaminate the access and work areas necessary to facilitate the removal and replacement of a furnace heating unit. The attic decontamination will be conducted in a manner which ensures a safe environment for the decontamination technicians, building occupants, site visitors, the public and future attic workers in said areas.

Scope of Work

1.0 Glove Bag Removal (approximately 20 l.f.)

1.1 Glove bag to remove asbestos pipe insulation from areas within close proximity of heavily traveled ways, access areas and work areas to prevent the possibility of damage.

1.2 Cover and encapsulate ends of pipes described above.

2.0 Duct Joint Tape

2.1 Remove all asbestos duct joint tape from joints within close proximity of heavily traveled areas and areas to be used for access by use of a mini enclosure and HEPA filtered vacuum.

2.2 Lockdown removed areas to seal any microscopic fibers left on the surface.

(continued)

Page 2
Papermill Properties
February 13, 1989

2.3 Apply new non-asbestos tape to duct joints.

3.0 Debris Cleanup

3.1 Clean up and double bag for disposal all visible debris and contamination, including floor area of approximately 700 s.f.

3.2 Bag and/or double wrap abandoned ducts that have asbestos on them(approximately 20 l.f.)

3.3 Remove and dispose of all contaminated waste at an approved Hazardous Waste Site.

4.0 Air Monitoring

4.1 Air monitor before(to determine base line), during(to insure a safe working procedure), and after(for final clearance) to insure that there were no fiber releases and to test the effectiveness of our work.

5.0 Final cleanup and inspection

Qualification

Merritt Corporation cannot guarantee that the above methods will yield final clearance of work area. Any additional work and testing required to receive final clearance would be extra.

Compensation

Merritt Corporation offers to perform the above proposed work for a Lump Sum price of \$5630.00

Thank you for your consideration in this matter. If you desire us to proceed with this project, please sign and return one copy to us.

(continued)

SIGNATURE [Signature] DATE 11/27/93

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than \$500.

- I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale [Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.]
- I, as owner of the property, am exempt from the sale requirements of the above due to: (1) I am improving my principal place of residence or appurtenances thereto, (2) the work will be performed prior to sale, (3) I have resided in the residence for the 12 months prior to completion of the work, and (4) I have not claimed exemption in this subdivision on more than two structures more than once during any three-year period. [Sec. 7044, Business and Professions Code.]
- I, as owner of the property, am exclusively contracting with licensed contractors to construct the project [Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law].
- I am exempt under Sec. _____, B&P.C. for this reason _____

CITY OF EMERYVILLE

2449 POWELL STREET
EMERYVILLE CALIFORNIA 94608
INCORPORATED 1896

September 7, 1984

Curtis Pacific Co.
345 Powell Street
Emeryville, Ca

The following violations were noted during a recent fire department inspection:

1. Improper spray booth
 - a. All spray booths or spray rooms shall be protected by an approved automatic fire-extinguishing system. (Section 45.209, Article 45, Uniform Fire Code)
 - b. Metal deflector or fire curtain not less than 4½ inches deep required at the upper outer edge of the booth over the booth opening. (Sec. 45.203(f), Art. 45, UFC)
 - c. Three foot clearance required around sides of spray booth. (Sec. 45.203(h), Art. 45, UFC)
 - d. Excessive residue build-up in booth. Regular cleaning required to prevent the accumulation of deposits of combustible residues. (Sec. 45.210, Art. 45, UFC)
 - e. Electrical equipment to comply with Article 45, section 45.205.
 - f. Ventilation to comply with Article 45, section 45.206.

Note: Copies of Uniform Fire Code sections attached for more complete details.
2. In order to determine quantities permitted and method of storage of flammable and combustible liquids I need a copy of the Material Safety Data Sheet for each flammable or combustible liquid.
3. Sprinkler risers and valves obstructed by equipment and materials. Access and visibility must be maintained. (Sec. 10.206, Article 10, UFC)

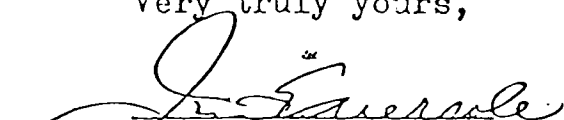

4. Inadequate fire extinguishers:
 - a. 40BC minimum size extinguisher required for spray booth and flammable or combustible liquids.
 - b. Minimum of 3 "A" units of extinguishing agent required for basic building protection.
 - c. One 3A-40BC minimum size extinguisher, mounted within 30 feet of the spray booth and flammable and combustible liquid storage, and within 75 feet travel distance from any point within the building, would satisfy your extinguisher requirements for basic coverage and flammable liquid hazard.
Note: Extinguishers are to be mounted so as to be visible and accessible, with top of extinguisher not more than 5 feet from the floor, and bottom of extinguisher not less than 4½ inches from the floor. Extinguishers require annual service, with service tag attached to the extinguisher.
5. Certificate of Use and Occupancy required for space. Apply at City Hall. (See attached sheet)

Use of spray booth to be discontinued until violations are corrected.

Comply with all other provisions of this letter within seven (7) days.

If you have any questions please let me know.

Very truly yours,

Jim Eversole,
Fire Marshal

APPLICATION RECEIVED BY:

10.8 AGREED UPON SCOPE OF WORK

EXHIBIT A
Environmental Assessment Scope of Work

Investigations described herein are intended to provide Wells Fargo with sufficient information to evaluate environmental risks associated with real property in order to facilitate our completion of due diligence as a secured lender. The environmental assessment must be provided in the following format, address each of the items indicated below, and shall consist of a review of available information in connection with the property and a site inspection. Except as required in order to characterize the presence of asbestos, lead, or radon, no sample collection, borings, well installation or other field work is required in completion of this investigation. Such work may be separately authorized, if appropriate.

Items of scope which are not typically included in a Phase I Investigation may be bid separately on a lump sum or time and materials basis and must be clearly identified in Appendix item 10.8.

Any and all exclusions from this scope of investigations must be clearly delineated in your proposal. In the absence of exclusions specifically delineated and accepted as part of the proposal, the requirements of this document will prevail.

Reports shall be issued in draft form for Wells Fargo review prior to finalization. Wells Fargo will require FOUR original copies of the finalized report.

1.0 INTRODUCTION

- 1.1 Summary of the purpose and findings of the investigation.
- 1.2 Table of Contents
- 1.3 Disclaimer

All reports prepared in connection with work performed under this contract must contain the following statement:

THIS INVESTIGATION WAS PREPARED FOR THE SOLE USE AND BENEFIT OF WELLS FARGO AND IS BASED IN PART UPON DOCUMENTS, WRITINGS AND INFORMATION OWNED AND POSSESSED BY WELLS FARGO. NEITHER THIS REPORT, NOR ANY OF THE INFORMATION CONTAINED HEREIN SHALL BE USED OR RELIED UPON FOR ANY PURPOSE BY ANY PERSON OR ENTITY OTHER THAN WELLS FARGO.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

2.0 SCOPE OF WORK

Confirm the scope of the investigation and specify that the report is in the prescribed format.

3.0 SITE LOCATION AND JURISDICTION

3.1 Indicate the property location including the city, county and state under whose jurisdiction the project falls.

3.2 List all agencies which have jurisdiction over environmentally related activities at the subject property including address, telephone number, and, if available, the name of a contact person.

3.3 Summarize any "Super Lien" statutes applicable in this jurisdiction.

4.0 RECORDS REVIEW, SITE HISTORY, PRESENT and PROPOSED USES

Review past and present ownership and use of the property extending a minimum of 50 years or beginning at the time when the property was undeveloped, whichever is greater, and identify any uses, including agricultural, which may have involved hazardous materials.

4.1 Current and Past Tenants and Uses

4.1.1 Identify current and past tenants and property uses specifically commenting upon the potential use, disposal, treatment, storage, or emission of hazardous materials.

4.1.2 Evaluate the potential for contamination resulting from past or previous property uses.

4.1.3 Briefly describe the procedures used in researching historical use and ownership.

4.2 Review Aerial Photographs to identify potentially significant historical features.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

- * 4.3 Provide a list, including approximate quantities, of the hazardous materials previously or currently used, disposed, treated, stored or emitted at the subject property.
- * 4.3.1 Are Hazardous Materials Data Sheets appropriately available for hazardous materials currently in use?
- * 4.4 For current and past uses provide a summary of all environmentally related permits, licenses, and registrations required and comment on the potential need for additional permits, licenses or registrations.
- * 4.5 For proposed uses, provide a summary of environmentally related permits licenses, registrations, etc., which may be required for operation.
- * 4.6 Provide a summary of any available information indicating that the property may not be in compliance with environmental regulations, permits, licenses or registrations.
- * 4.7 List and comment on any violations, investigations, claims, actions, notifications, litigation, etc., regarding environmental concerns pertaining to the subject property.
- 4.8 Summarize any other pertinent information relating to potential liabilities stemming from current or previous activities at the subject property.

5.0 PHYSICAL SITE INSPECTION

- 5.1 Provide a description of the site and existing improvements.
- 5.2 Review the Environmental site setting including Hydrology and Geology specifically addressing:
 - 5.2.1 Groundwater depth
 - 5.2.2 Direction of ground water flow
 - 5.2.3 The potential for contamination from on-site or off-site sources.
 - 5.2.4 Any existing information obtained from soils reports including organic vapor concentrations.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

- 5.3 Hazardous Materials and Processes - Provide a summary of processes employed on-site requiring the use disposal, treatment, storage and emission of Hazardous Materials at the subject property.
- 5.3.1 Provide a description of any above ground or underground tanks, pipes, sumps or surface impoundments on the property or on adjacent properties. Including information on age, construction and content of the tanks, etc., and any information that there may have been leaks or spills.
- 5.3.1.1 Are facilities in compliance with current environmental regulations?
- 5.3.2 Document any evidence of leaks or spills and comment on the potential for future leaks or spills.
- 5.3.3 Summarize and comment on the results of any tests available for review.
- 5.3.4 Review and comment on environmental monitoring programs in place.
- 5.3.5 Provide information regarding surface and subsurface drainage, sewers, on-site waste water disposal and septic systems, storm system run-off, the source of drinking water for the subject property, and the location of nearest wells and surface water.
- 5.3.6 Identify existing utilities, transformers, or other equipment containing PCBs and estimate costs to abate resultant hazards.
- 5.3.7 Investigate for the presence of asbestos. Provide a summary of any existing reports, conduct any testing required in order to determine the presence of asbestos, approximate quantities of friable and non-friable materials and provide an estimate of abatement costs for both friable and non-friable forms. Testing of suspected asbestos containing materials may be required in completion of your investigation. Provide a copy of any existing Operations and Management plans for the subject property.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

- 5.4 Provide details regarding any other information derived from previous investigations or experience or obtained in the course of this investigation which relates to environmental conditions or liabilities associated with the subject property.
- 5.5 Complete appropriate tests at existing residential properties and comment upon the potential impact of RADON gas at the subject property.
- 5.6 Comment on the presence and condition of lead paint on-site.
- 5.7 For residential, educational and convalescent facilities, test for the presence of lead in domestic water.
- 5.8 Provide a brief summary of remedial work which may required in order to conform to present and/or future regulations.
- 5.9 Comment on the potential impact of urea formaldehyde use in building construction.
- 5.10 Summarize potential hazards identified in this section and provide related recommendations.

6.0 ADJACENT LAND USE AND REVIEW OF REGULATORY RECORDS

The following investigations must be performed in addition to the review of records required in completion of other elements of this investigation.

- 6.1 Describe present and historical property uses associated with adjacent properties and potential environmental hazards, including authorized or unauthorized toxic dumping or use as an unofficial community dumping ground.
- 6.2 List any sites within 2,000 linear feet which appear on the "national priority list" under federal superfund regulations or on similar state or local lists. For each property indicate the type of site or business, the reason for the listing, the severity of the problem, and evaluate the potential impact of these sites upon current and proposed uses at the subject property and the potential for related financial liability at the subject property.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

- 6.3 List any sites within 2,000 linear feet for which RCRA permits for the storage or generation of hazardous wastes have been issued and evaluate the potential impact upon the subject property.
- 6.4 List existing or proposed permits, licenses, registrations, etc., identified in connection with the subject property.
- 6.5 Summarize potential hazards identified in this section and provide related recommendations.

7.0 CONCLUSIONS

Summarize potential environmental liabilities associated with the subject property and provide a concluding statement evaluating the significance of the environmental concerns identified in the course of the investigation.

8.0 RECOMMENDATIONS

Provide recommendations regarding further investigations and/or revisions to existing procedures or practices at the subject property.

9.0 SIGNATURE PAGE

All reports must be dated and bear the signature of an environmental professional, i.e. Geologist, Engineer, Environmental Assessor, etc., appropriately registered in the state in which the property is located. All Asbestos investigations must be signed by an individual with a current AHERA certification.

10.0 APPENDIX

10.1 Photographs - Past/Present, Aerial and Ground Level.

10.2 Site plan indicating the direction of ground water flow, building locations, and approximate locations of any hazardous material use, storage, treatment, disposal or emission facilities and any areas with visible signs of potential contamination, soil discoloration, decaying vegetation, or other important features of the property.

10.3 Property vicinity map indicating sites of environmental concern.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

- 10.4 Include a list of references, regulatory information, source materials and copies of any other relevant reports which have been reviewed in conjunction with this investigation.
- 10.5 Statement of Independence.
- 10.6 Copies of other reports relied upon in the investigation.
- 10.7 Other pertinent data.
- 10.8 Enclose a summary of the agreed Scope of Work including a listing of any excluded items which will be or have been performed under separate authorization.
- 10.9 Statement of Qualifications for individuals conducting the investigation and signing the report.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

EXHIBIT B
Asbestos Investigation Scope of Work

1. Review available plans, architectural and structural drawings and specifications to determine if Asbestos Containing Materials (ACM) were specified or may have been used in any construction activities at the subject property.
2. Research construction Administration documents for evidence of ACM.
 - 2.1 Interview, as appropriate, any individuals who may have specific knowledge or information relating to the existence and/or location of ACM in the Project.
3. Survey completely the interior and exterior of the Project, visually inspecting for ACM.
4. Record, by written and photographic methods, all suspected or uncovered ACM.
5. Collect bulk samples of all suspected materials and analyze consistent with EPA recommended procedures by polarized light microscopy, with dispersion staining techniques.
6. Conduct sampling procedures, repair tested areas with appropriate techniques to prevent release of fibers, and return the tested area to its condition prior to the sampling.
 - 6.1 All samples shall be analyzed in an independent, certified asbestos laboratory consistent with EPA recommended procedures.
7. Determine whether inaccessible areas may contain asbestos, describe such areas and evaluate potential liabilities associated with the potential presence of asbestos.
8. Isolate and identify each area in which ACM is present and recommend appropriate response actions consistent with EPA regulations and guidelines, by methods including but not limited to the following:
 - a. Encapsulation
 - b. Enclosure
 - c. Removal
 - d. Institution of an O & M Plan
 - e. Repair

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

9. Approximate range of time and costs (including any business interruption) to accomplish items listed in 8.
10. Estimate costs associated with removal of all asbestos containing materials.
11. Provide a detailed written report summarizing the findings of each item listed above as well as:
 - a. Description of project surveyed.
 - b. Captioned photographs of suspected ACM with its location, type, and percentage.
 - c. Written description of location and laboratory procedures and results of suspected ACM.
 - d. Recommendations for future actions which are required by law.
 - e. Recommendations for future actions which may be advisable.
12. The Consultant's report must be signed by either:
 - a. A Certified Industrial Hygienist with at least three years of experience in the investigation of asbestos hazards, or
 - b. An individual with current AHERA certification and at least three years of experience in the investigation of asbestos hazards.
 - c. In compliance with applicable local, state or federal regulations or requirements.

NOTE: The scope of investigations described herein has been developed specifically for use by Wells Fargo. The concerns of others may vary from Wells Fargo requirements. Anyone utilizing this document in the evaluation of environmental concerns is fully responsible for the identification of additional investigations which may be prudent. Wells Fargo makes no representation, express or implied, regarding the suitability of this scope of investigations for the identification or evaluation of environmental concerns. September 10, 1992

Experience

Summary of Experience

Ms. Norgren has experience conducting Phase I Environmental Site Assessments (ESAs) on various types of sites including commercial, industrial, residential and unimproved properties. In addition, she has experience managing all phases of asbestos abatement projects including comprehensive building surveys, contract bid solicitation, contract administration, project specifications, and contract documentation. Ms. Norgren also has extensive field experience in asbestos abatement contractor supervision and industrial hygiene services. She has been health and safety trained in accordance with 29 CFR 1910.120 and CCR Title 8 GISO 5192.

Selected Project Experience

City of Los Angeles Department of Airports

Van Nuys Airport and Van Nuys California Air National Guard Facility

Served as project manager for a six-person team and building inspector during an asbestos survey of approximately fifty buildings on the combined properties. Based on survey results, prepared asbestos abatement specifications. Project included arranging for approval of special abatement procedures from the South Coast Air Quality Management District.

Desert Hospital, Palm Springs

Hospital Expansion

Performed all aspects of asbestos project management and on-site supervision during the demolition of buildings on two city blocks. Provided on-going consultation to the hospital's Planning Consultant and the Construction Supervisor regarding management of the existing asbestos-containing materials in the hospital.

Major California Bank

Retail Mall, Los Angeles County

Served as project manager for a five-person team and building inspector during an asbestos survey of twenty buildings comprising the mall which totaled approximately 900,000 square feet. Prepared final report which included CAD illustrations indicating sample locations and asbestos-containing materials as well as cost estimates totaling \$1 million for an Operations and Maintenance Plan and complete removal.

Trizec Properties, Inc.

Various Buildings

Performed contractor supervision and industrial hygiene services during removal of asbestos-containing fireproofing. All buildings were multistory commercial structures and projects ranged from abating single suites to full-floor abatement. Responsible for ensuring contractor followed all government regulations and maintained proper work practices.

Great Western Bank

Various Properties

Conducted Phase I ESAs for various commercial and industrial properties throughout California. Assessment activities included property reconnaissance, agency record reviews and contacts, historical aerial photography review, land use review, chain-of-title review and summary of geologic conditions. Property reconnaissance included limited asbestos sampling, radon sampling and water sampling for lead.

10.10 LIMITATIONS

The conclusions and recommendations in this report are based on the following:

- ◇ Observations by CERES personnel
- ◇ Information provided by Papermill Properties
- ◇ Referenced documents and contacts

The scope of work described herein is not intended to be all inclusive, identify all potential concerns, or eliminate the possibility of the Property having some degree of environmental problems. It is possible that variations in soil or groundwater conditions, or un-permitted, undocumented or concealed improvements or alterations to the Property could exist beyond points explored in the scope of services. Changes in the conditions found on the Property could occur at some time in the future due to variations in environmental and physical conditions.

In today's technology, any amount of assessment cannot certify that the improvements or the real Property are completely free of hazardous or toxic substances. The activities conducted for this assessment cannot identify all potential concerns for the Property, and do not eliminate the possibility that the Property has environmental impairments. Therefore, CERES cannot offer the certification of a "clean" Property.

Any geologic data are for the information of Wells Fargo Real Estate Group, and are for drawing conclusions within the context of this report only. The data should not be used for any subsequent geotechnical, hazard assessment, or remediation purposes.

Any estimates of cost for additional work are based only on the information gathered for this report and should be used for preliminary planning purposes only. Actual costs may vary.

STANDARD OF CARE

This Phase I Environmental Site Assessment was conducted in a manner consistent with the level of skill ordinarily exhibited by members of our profession currently practicing in this geographic region. No other representations, expressed or implied, and no warranty or guarantee is included or intended in this report.

CERES cannot be responsible for any use of the information contained in this report for which the information was not intended or for any misrepresentation of the information.
