Subject: Fw: RO3010: ACCEPTED DOCUMENTS ON FTP SITE

Hi Barbara,

It looks like the tables are there and utility depths are available. I have asked our consultant to provide past data for table and past manifests as you have requested.

I believe that this will give all of the information requested in your letter of August, 2010.

Please let me know if I have left anything out, and again, I appreciate your time and assistance in this matter.

Carolyn

Hi Carolyn,

Thanks for the follow up. I reviewed the report that was post to Alameda County's website. There are Tables I nd II immediately after the text section (current data only), Figures 2 & 3 show utility depths in the legend, and only the current manifest was uploaded. I am happy to add historical soil data to Table 1 and add the older manifests. Please let me know how you want to proceed. I am happy to discuss the report with Barbara if she has any specific questions that you are not sure about.

Talk to you soon,

Charlie

Charles,

Please see Barbara's email below and get back to me.

Thanks

Carolyn

Did we get the same report? I am speaking of SWI_R_2010-11-30. I don't see the depths of the on the figures nor do I see any tables. Just lab results. Please look at the report that was uploaded to our ftp site which is on the website below and let me know the pages where you see this information or upload the correct report. Also, I requested manifests from previous soil excavations I see the current manifest only.

Good Morning Barbara,

I spoke with our consultants regarding your concerns over missing information. Below is the response I received. Please let me know if you still require additional information, and/or would like to meet with them.

Thank you for your assistance in this matter.

"I am back in my office and had a chance to review the report "Summary of Work Performed to Date and Additional Site Characterization Results" as well as the "Work Plan Approval for Spills, Leaks, Investigation-Cleanup Case No. R00003010 and Geotracker ID T10000001613, Alameda Federal Building 2C, 620 Central Avenue, Alameda, CA, 94501" from Alameda County Health Care Services.

As far as I can tell all the requests from the county were met. The following is where the requested items are presented in the report:

Technical Comments

1. Soil samples were collected from the groundwater interface and changes in lithology and a minimum of every five feet.
2. Regional hydrology was reviewed and well screens were set so the well screen intersected the groundwater table.
3. A preferential pathway study was performed with a subsurface utility locating company. Depth to the utilities are presented on the graphics in the report, specifically Figures 2 and 3 in the Legend.
4. Soil and groundwater from the current investigation are presented on Tables 1 and 2. Historical (only soil was collected) and current data are presented on Figure 2 (Soil) and Figure 3 (groundwater).
5. The pipe leak location is shown on Figures 2 and 3.
6. Manifests are included as Appendix D.

I can update Table 1 to include the soil results from the initial investigation if that is what Barbara is requesting. I believe all the information required to obtain Site closure is in this report. We would be happy to meet with Ms. Jakub if she would like us to present the results to her and she could also ask any questions she may have.

Please let me know what she says.

Thanks,
Charles Rome

Good Morning Barbara,

Do you have an idea when we will be hearing back from you on this project?

I do have folks inquiring about the status and I need to get back to them with an answer.

Thank you.

Carolyn

I have not looked at the site lately but is unlikely that you will need to do any more overexcavation in the street. Your consultants should be helping you along with that judgment to backfill the excavation and remove the trench plates. I don't have this on my schedule as per a specific date yet. I will do my best to get it reviewed within the 60 day timeframe barring any unforeseen requests from my superiors.

Barb

Hi Barbara,

I hope your Holidays were joyful.

I know that it has not been 60 days, but I was hoping that you could perhaps give me an idea of when we might get a ruling on this. I only ask because we are paying monthly for trench plates to cover the excavation area (located in the street of our complex) and maybe we need to just make repairs and take our chances that we may have to reopen the street.

I do know that you have allot on your plate and we are not the only ones asking for your assistance.

Thank you in advance for your assistance in this matter.
