ATTN: Mr. Steve Viani

Dear Mr. Viani,

Here is the Certificate of Scrap for the 10,000  
gallon diesel storage tank that was located at  
4575 Tidewater, Oakland, California.

If you should have any other questions, please  
feel free to call me at (415) 633-0336.

Sincerely,

CROSBY & OVERTON, E.M.I.

Kevin M. Rociti,  
Field Supervisor

Enclosure

W. J. HARRIS

CERTIFICATE OF DISPOSAL

28 February 1987

H & H Ship Service Company hereby certifies to CROSBY & OVERTON  
that:

1. The storage tank(s) removed from the A. B. F. TRUCKING  
facility at 4575 Tidewater, Oakland, California

(address)

were transported to H & H Ship Service Company, 220 China Basin Street,  
San Francisco, California 94107.

2. The following tank(s), H & H Job Number: 4499,  
have been steam cleaned, cut with approximately 2' x 2' holes, rendered  
harmless and disposed of as scrap metal.

3. Disposal site: LEVIN METALS CORPORATION

4. The foregoing method of destruction/disposal is suitable for the  
materials involved, and fully complies with all applicable regulatory  
and permit requirements.

5. Should you require further information, please call (415) 543-4835.

Very Truly Yours,

  
CLEVELAND VALREY  
Q.A. & Safety Coordinator

Analysis of Soils and Water for  
Total Petroleum Hydrocarbons and  
Volatile Aromatic Hydrocarbons

Lab No. 87-01-13

Two water samples and two soil samples, collected on January 8, 1987, were received in the laboratory on January 12, 1987 for analysis for total petroleum hydrocarbons and BTX. The results are summarized below:

Total Petroleum Hydrocarbons (TPH)

<u>Sample ID</u>	<u>Matrix</u>	<u>TPH</u>
SPU-02	Water	721 mg/L
SPU-03	Soil	681 mg/kg (wet weight)
SPU-04	Soil	108 mg/kg (wet weight)

The analysis was performed in accordance with EPA Method 418.1. The samples were extracted on January 23, 1987 and the extracts analyzed on January 27, 1987.

BTX

<u>Compound</u>	<u>Sample SPU-01</u> <u>ug/L</u>	<u>Sample SPU-03</u> <u>ug/L</u>	<u>Sample SPU-04</u> <u>ug/L</u>
Benzene	2 U	10 U	10 U
Toluene	2 U	10 U	10 U
Ethylbenzene	2 U	10 U	10 U
o-Xylene	2 U	10 U	10 U
m-Xylene	2 U	10 U	10 U
p-Xylene	2 U	10 U	10 U

U = Not detected at the detection limit preceding the "U".

Initial analysis of these samples displayed a large number of peaks. Confirmatory analysis, however, showed these peaks to be compounds other than the BTX compounds. In the case of the water sample, the compounds that were initially observed in the chromatogram are not due to BTX compounds but to some hydrocarbons other than BTX. Also these compounds are associated with the sediment, not with the water fraction.

**WESTON**

Analysis for the BTX was performed during the period January 19-22, 1987 using EPA Method 8020.

The high levels of total petroleum hydrocarbons, coupled with the absence of the most volatile aromatic hydrocarbons, implies that a petroleum product is present; but it is probably aged, and consists principally of oils.

Reviewed and approved David Ben-Hur  
David Ben-Hur, Ph.D.

Mr. Paul Bailey  
Fire Prevention Bureau  
#1 City Hall Plaza  
Oakland, CA 94612

W.O. #2977-01-01

Dear Mr. Bailey:

WESTON has been retained by ABF Freight Systems to prepare design drawings and specifications for an aboveground diesel fuel tank at their Oakland Terminal located at 4575 Tidewater Avenue.

We have attached a location sketch and a design sketch for the purpose of seeking conceptual approval for an aboveground tank at this location. An aboveground diesel tank in this location is a safe and environmentally sound alternative and ABF is committed to replacing its buried tanks with aboveground, contained tanks. These drawings are not meant to be construction drawings, rather they present our current thoughts on a reliable design.

At a minimum our design will include the following elements:

- o 100% containment of tank contents and freeboard for containment of precipitation.
- o All underground piping will also have secondary containment.
- o Grounding of tank.
- o Waterstops and sealants will be installed to maintain liquid integrity.
- o Wiring will not be present inside the containment area.
- o A low profile tank will be used to minimize vandalism.
- o The area where the tank will be located is fenced and patrolled.

**WESTON**

Mr. Paul Bailey

Page 2

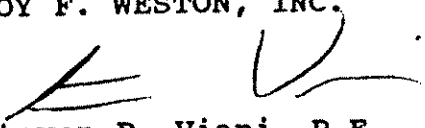

22 January 1987

ABF is interested in seeking your conceptual approval at your earliest convenience; please include any requirements or standards to which you require adherence. ABF understands that your approval of these drawings does not constitute approval for construction.

Should you have any questions, please do not hesitate to call me.

Sincerely,

ROY F. WESTON, INC.

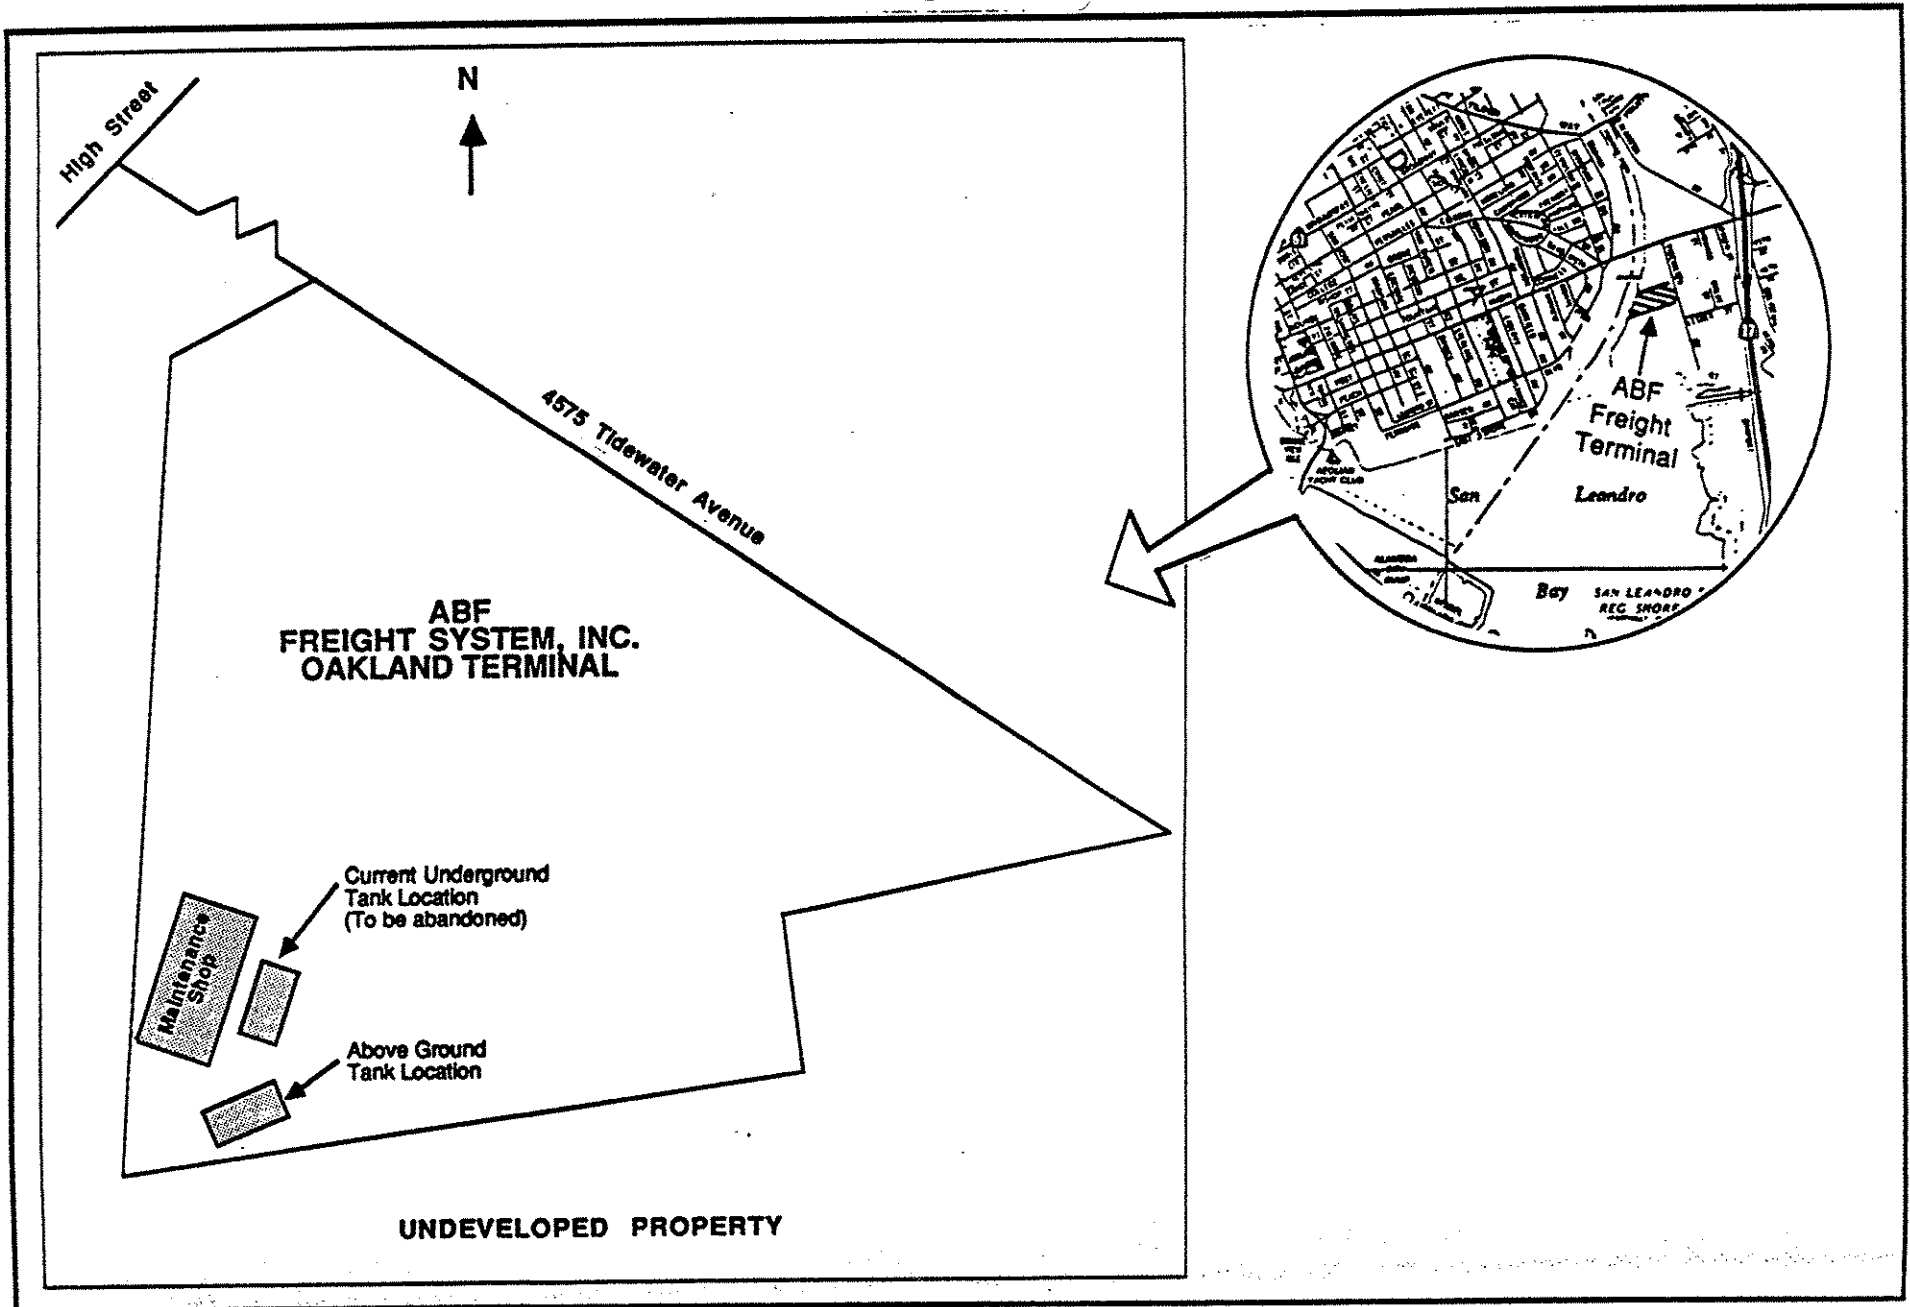

FIGURE 1 ABF FREIGHT SYSTEM, INC. OAKLAND TERMINAL, ALABAMA SHIP CLUB

**NOTES:**

1. Concrete Block Exposure enclosure provides containment for contents plus 2 feet of freeboard (interior will be waterproofed).
2. Access to interior by steel stairs.
3. Location will be adjacent to undeveloped property.
4. Fill piping will be located within containment area.
5. Tank will be grounded.

Attention: Mr. Paul Bailey

Re: Ground Storage Tank Approval Confirmation for  
ABF Freight, 4575 Tidewater Avenue

Dear Mr. Bailey:

This confirms our conversation of January 29, 1987 regarding conceptual approval for an aboveground diesel fuel storage tank at the above reference facility pursuant to my letter of January 22, 1987. During our conversation you indicated the following:

- o The City of Oakland utilizes the 1982 Fire Code for design considerations.
- o Particular attention should be paid to water removal from inside the containment area (Section 79.408 (d)).
- o Some means of extinguishing fuel fires is needed in that area.

ABF will be contacting you shortly with detailed design plans and specifications for an aboveground diesel storage tank.

Thank you for your cooperation and timely response in this matter.

Sincerely,

ROY F. WESTON, INC.

SUBJECT: UNUSED UNDERGROUND STORAGE TANKS

DURING A STATEWIDE PROGRAM IN 1984, YOU REGISTERED THE UNDERGROUND STORAGE TANK(S) AT THE ABOVE FACILITY WITH THE STATE WATER RESOURCES CONTROL BOARD. ON YOUR FORMS, YOU INDICATED THAT ONE OR MORE TANKS AT THAT FACILITY ARE NO LONGER BEING USED. A NEW FEDERAL LAW REQUIRES THAT WE OBTAIN ADDITIONAL INFORMATION REGARDING UNUSED TANKS, SPECIFICALLY, THE TYPE AND QUANTITY OF SUBSTANCE LEFT STORED AT THE TIME THEY WERE TAKEN OUT OF SERVICE. PLEASE PROVIDE THIS INFORMATION IN THE SPACE BELOW. YOU ARE EXPECTED TO BASE YOUR RESPONSE ON REASONABLY AVAILABLE RECORDS, OR, IF NO RECORDS EXIST, YOUR KNOWLEDGE OR RECOLLECTION, OR WRITE "UNKNOWN". IF YEAR LAST USED IS UNKNOWN, PLEASE GIVE BEST ESTIMATE. AT MINIMUM WE NEED TO KNOW IF IT WAS BEFORE OR AFTER 1/1/74. CHECK THE "TANK CLOSED" BOX IF THE TANK HAS BEEN REMOVED OR FILLED WITH SAND, CONCRETE, OR OTHER SOLID MATERIAL.

SID	YOUR TANK NUMBER	CAPACITY IN GAL	YR LAST USED	SUBSTANCE NAME	REMAINING GALLONS	TANK CLOSED
003	#3	UNKNOWN	1981			TANK REMOVED (X)
004	#4	1000	1980			TANK REMOVED (X)

JUL 21 RECD

PLEASE SIGN BELOW AND RETURN TO BETTY MORENO, DIVISION OF WATER QUALITY, AT THE ABOVE ADDRESS WITHIN 15 DAYS OF RECEIPT. WE WILL MAIL YOU A RECEIPT. FAILURE TO RETURN THIS FORM MAY RESULT IN A FINE OF UP TO \$10,000. CALL THE ABOVE NUMBER IF YOU HAVE ANY QUESTIONS.

I CERTIFY UNDER PENALTY OF PERJURY UNDER THE LAWS OF CALIFORNIA THAT THE FOREGOING IS TRUE AND CORRECT.

**Subject: Stockpiled Soil Disposal  
ABF Freight System, Inc.  
4575 Tidewater  
Oakland, California**

Dear Chris:

BEI Construction, Inc. has completed disposal of the stockpiled soil and concrete debris at the subject facility. On Saturday, February 20, 1999, we mobilized to the facility and loaded trucks. We were not able to offload this soil on Saturday at Forward Incorporated because Forward closed its gates early that day. Instead, we offloaded the soil at Forward on Monday, February 22, 1999. Upon loading the trucks on Saturday, we discovered that there was more soil and concrete than estimated. In addition, several large pieces of concrete debris were found inside the pile that required us to remobilize with a concrete breaker on February 26, 1999, to break up the concrete before we could load it. On Friday, February 26, 1999, we loaded, transported, and disposed of the remaining stockpiled soil and concrete at Forward.

Attached are copies of the following:

<u>Non-Hazardous Waste Manifest #</u>	<u>Ticket #</u>	<u>Tons</u>
#094590	#124082	15.01
#106013	#124088	14.34
#679998	#124092	27.47
#106014	#124560	8.42
#679999	#124561	15.17

**Total Tons = 80.41**

Upon completion of loading, the yard was swept clean.

Please call me if you have any questions.

Sincerely,

BEI Construction, Inc.

Sue Black  
President

**E. TERMS AND CONDITIONS**

The below named generator (Generator) agrees to the following terms and conditions (Terms and Conditions) for treatment and/or disposal of waste at the Forward, Inc. (Forward) Landfill.

- Generator warrants that the above, attached, and any other submitted waste profile information is complete and accurate and that none of the waste is hazardous as defined or listed in 40 CFR Part 261 or Title 22 of the California Code of Regulations, with the exception of asbestos properly described above. If any portion of this waste, other than asbestos properly described above, is determined to be hazardous (Hazardous Waste) according to any of the above mentioned regulations, each party shall promptly notify the other in writing upon learning of such determination. Within 10 days after receiving such written notification, Generator at its sole cost shall remove from the Forward Landfill, transport, and dispose off-site such Hazardous Waste in accordance with applicable laws and regulations. If Generator fails to remove such Hazardous Waste, Forward may do so at its option, at Generator's sole cost. Within 30 days after such removal operation is complete, Forward shall refund treatment/disposal fees previously paid concerning the Hazardous Waste, less 50 percent of disposal fee handling charge plus right of offset for losses and costs incurred respecting such Hazardous Waste (such offset right shall not limit Forward's other rights of recovery).
- Generator agrees that, in the event Generator, its consultant or its contractor learns that constituents, characteristics, or concentrations regarding the waste vary from those set forth in this waste profile or on any attached or submitted documents, Generator will immediately submit a corrected Waste Profile Form.
- Generator warrants that any asbestos delivered to the Forward Landfill has been properly described above and will be prepared for transportation to and disposal at the Forward Landfill in compliance with applicable regulatory requirements.
- Generator shall indemnify, defend, and hold harmless Forward, its affiliates, and their successors and assigns, and their respective officers, directors, employees, agents, and representatives against any and all claims, orders, liabilities, judgments, actions, liens, regulatory directives, fees, costs (including attorneys', experts' and consultants' fees and costs), penalties, fines, taxes, and liens (collectively, liabilities), to the extent arising from: a breach of any warranty or obligation of Generator hereunder; non-compliance with applicable laws/regulations, or negligence, or willful misconduct regarding the waste, caused by Generator, its consultants or contractors, or their respective employees, agents, representative or subcontractors; or any or all of Generator's waste which is Hazardous Waste.
- Forward shall indemnify, defend and hold harmless Generator, its affiliates, and their successors and assigns, and their respective officers, directors, employees, agents and representatives against any and all liabilities, to the extent arising from non-compliance with applicable laws/regulations, or negligence, or willful misconduct regarding the waste (but including Hazardous Waste), caused by Forward, its consultants, contractors, employees, agents, or representatives or subcontractors.
- The Landfill must be notified no less than 24 hours in advance for waste deliveries. The Landfill's operating hours are from 7:00 a.m. to 4:30 p.m. Monday through Friday, and 7:00 a.m. to 11:30 a.m. on Saturdays. Arrangements can be made to extend the Landfill's hours. No waste will be accepted when weather or Landfill activities impair deliveries, handling or disposal. Generator acknowledges that Forward's acceptance of waste is subject to regulatory requirements, and that Forward shall have no liability for inability to accept waste due to regulatory requirements, regardless of cause.
- No waste will be accepted by Forward until Forward has received a completed Waste Profile Form, has issued an approval number, and has received a signed Payment Terms Commitment. Forward can accept additional waste from Generator which is related to the waste stream of waste removal job described in Section A-D above but which was not previously approved for acceptance (Additional Waste). These Terms and Conditions shall apply to Additional Waste, except Additional Waste for which Forward requires submission of a separate signed Waste Profile Form.
- California Law shall govern these Terms and Conditions. If any notice or proceeding arises regarding a claim concerning these Terms and Conditions or is brought to enforce or interpret these Terms and Conditions the prevailing party shall be entitled to recover its attorney's fees and costs, whether or not presented to judgment.

THE GENERATOR ACKNOWLEDGES THAT IT HAS READ AND UNDERSTOOD THE PRECEDING TERMS AND CONDITIONS AND AGREES TO THE SAME, AND THE PERSON SIGNING BELOW WARRANTS THAT SHE IS AUTHORIZED TO SIGN FOR THE GENERATOR.

Mr. T. M. Gerow  
Public Health Engineer  
Alameda County  
Division of Environmental Health  
470 27th Street, Room 324  
Oakland, CA 94612

Dear Mr. Gerow:

ABF has removed an underground fuel tank from its location at 4575 Tidewater Avenue, Oakland, California. The subject tank has been scrapped and samples were taken from the excavation prior to back filling. Weston Engineering provided technical engineering support for the project, and the report is enclosed.

ABF will monitor the water in the monitoring wells monthly to insure that no loose product contaminates the ground water.

Sincerely,

J. R. Halladay  
Maintenance Programs Manager
