Mark,

As per your voice mail and the attached Geotracker upload confirmation, the well destruction report has been uploaded to TO600100018 which corresponds to Alameda County Case # 3033.

Regarding investigation waste: The last waste generated was during the March 26, 2015 groundwater sampling event. Documentation of the June 16, 2015 disposal of 4 drums of water generated during sewer line clearing and probably from the last groundwater sampling event is provided as the second attachment. Site inspection performed during well destruction on June 13, 2017 did not reveal the presence of any investigation waste at the site. Please let me know if this message will suffice for documentation of waste disposal, or if you require a more formal submittal. Thanks.

Subject: RE: ACDEH Correspondence RO3033

Mark,

This message replies to your attached July 18, 2017 letter requesting documentation of waste disposal from recent well destruction activities. Because the wells were destroyed by tremie grouting as approved by the Alameda County Public Works Agency and no groundwater was displaced during grouting, no waste was generated. Destruction of the sub-slab

vapor probes consisted of removing the vapor pins and sealing the slab hole with concrete with no waste generated. During well destruction activities, no investigation-derived waste from previous work was observed at the site. Please consider this message as verification that investigation waste has been removed from the site.

The attached letter also requests upload of the well destruction report and “all appropriate reports’ to Geotracker. As per the attached GEO_REPORT submittal confirmations, the June 26, 2017 *Well Destruction Report* and the March 21, 2017 *Site Investigation Report* have been uploaded to Facility Global ID T10000005825 in Geotracker for this site. However, the June 26, 2017 *Well Destruction Report* does not appear in Geotracker under Site Documents and may require agency acceptance.

Thank you.
