Phil,  
That would be fine. Please use this email to document ACEH concurrence with the revised due date. I'll update Geotracker shortly.

Mark

ERRG completed the field investigation on March 1, and we are presently reviewing the data and compiling the report. The Alameda County approval letter, dated January 24, 2013, requested that the investigation report be submitted/uploaded by March 22, 2013. However, as you're aware, we experienced delays with scheduling the field work. Accordingly, we would like to request a 30-day extension to submit the report (i.e., submit by April 22, 2013).

Thanks and feel free to contact us with any questions.

Greetings Mark

I will be taking over from Erik Brown as the primary ERRG point of contact for the Apex site investigation. I'm not sure if Erik had notified you of the scheduled field work, but we are planning to perform the investigation work tomorrow morning. The work will be performed in accordance with the Work Plan for Soil and Groundwater Investigation, dated October 2012, and the Alameda County conditional approval letter, dated January 24, 2013. On January 24, ERRG received an e-mail from you clarifying analytical requirements for fuel oxygenates - samples will only be analyzed for MTBE. In addition, due to the presence of multiple utilities in the investigation area, all borings will be completed using hand augers.

The County Well Inspector, Scott Miller, is scheduled to be at the site tomorrow at 1:00PM to inspect the borehole seals. If you have any concerns with the field schedule, please notify us as soon as possible.

Thanks
