Attachments: RO3070_Guilford Rd Figures.pdf; DIR_L_2016-03-08.pdf

Hi Megan,

I am open this afternoon, so we can talk at 2 if that works. I've also attached a few documents that largely spell out what has been asked for. For some reason the email directive letter from March 8, 2016, did not include the figures I mentioned, but I've attached similar ones, as well as past water supply well locations that have been discussed. Brent will have his own thoughts and since his registered geologist will be signing and stamping the document they should be comfortable with these suggestions.

Subject: 132 Guilford compliance

Hi Mark,

Would you have time this afternoon to chat about what you'd expect from us to bring our case into compliance? We have retained Brent Wheeler of the Wheeler Environmental Group, I'm nearly completed with the USTCF application, and letters to the neighbors requesting access should be going out by Thursday.

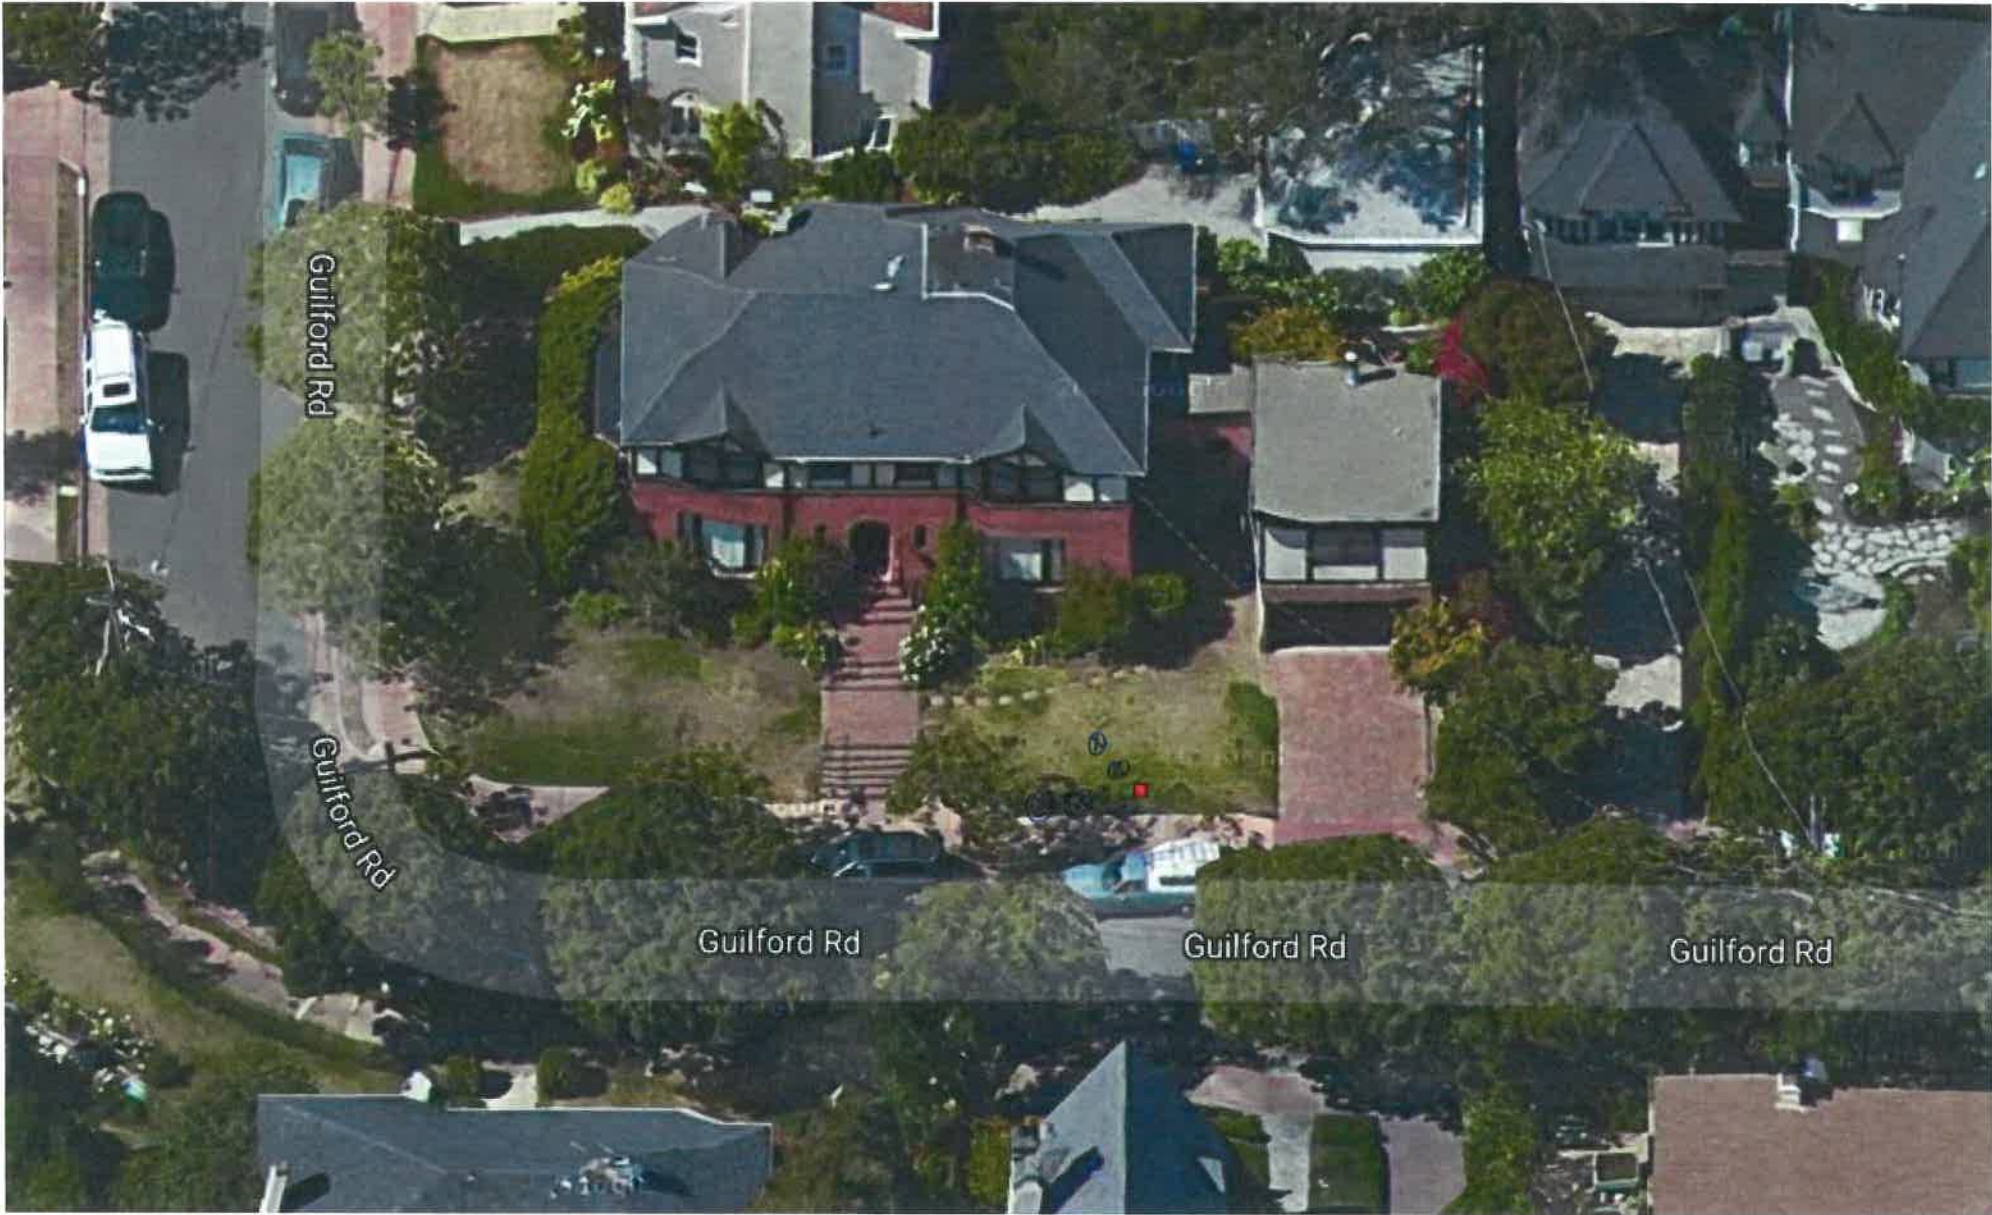

I am available from 2-4 today if there are a few moments in there. I'm also available tomorrow 11-5.

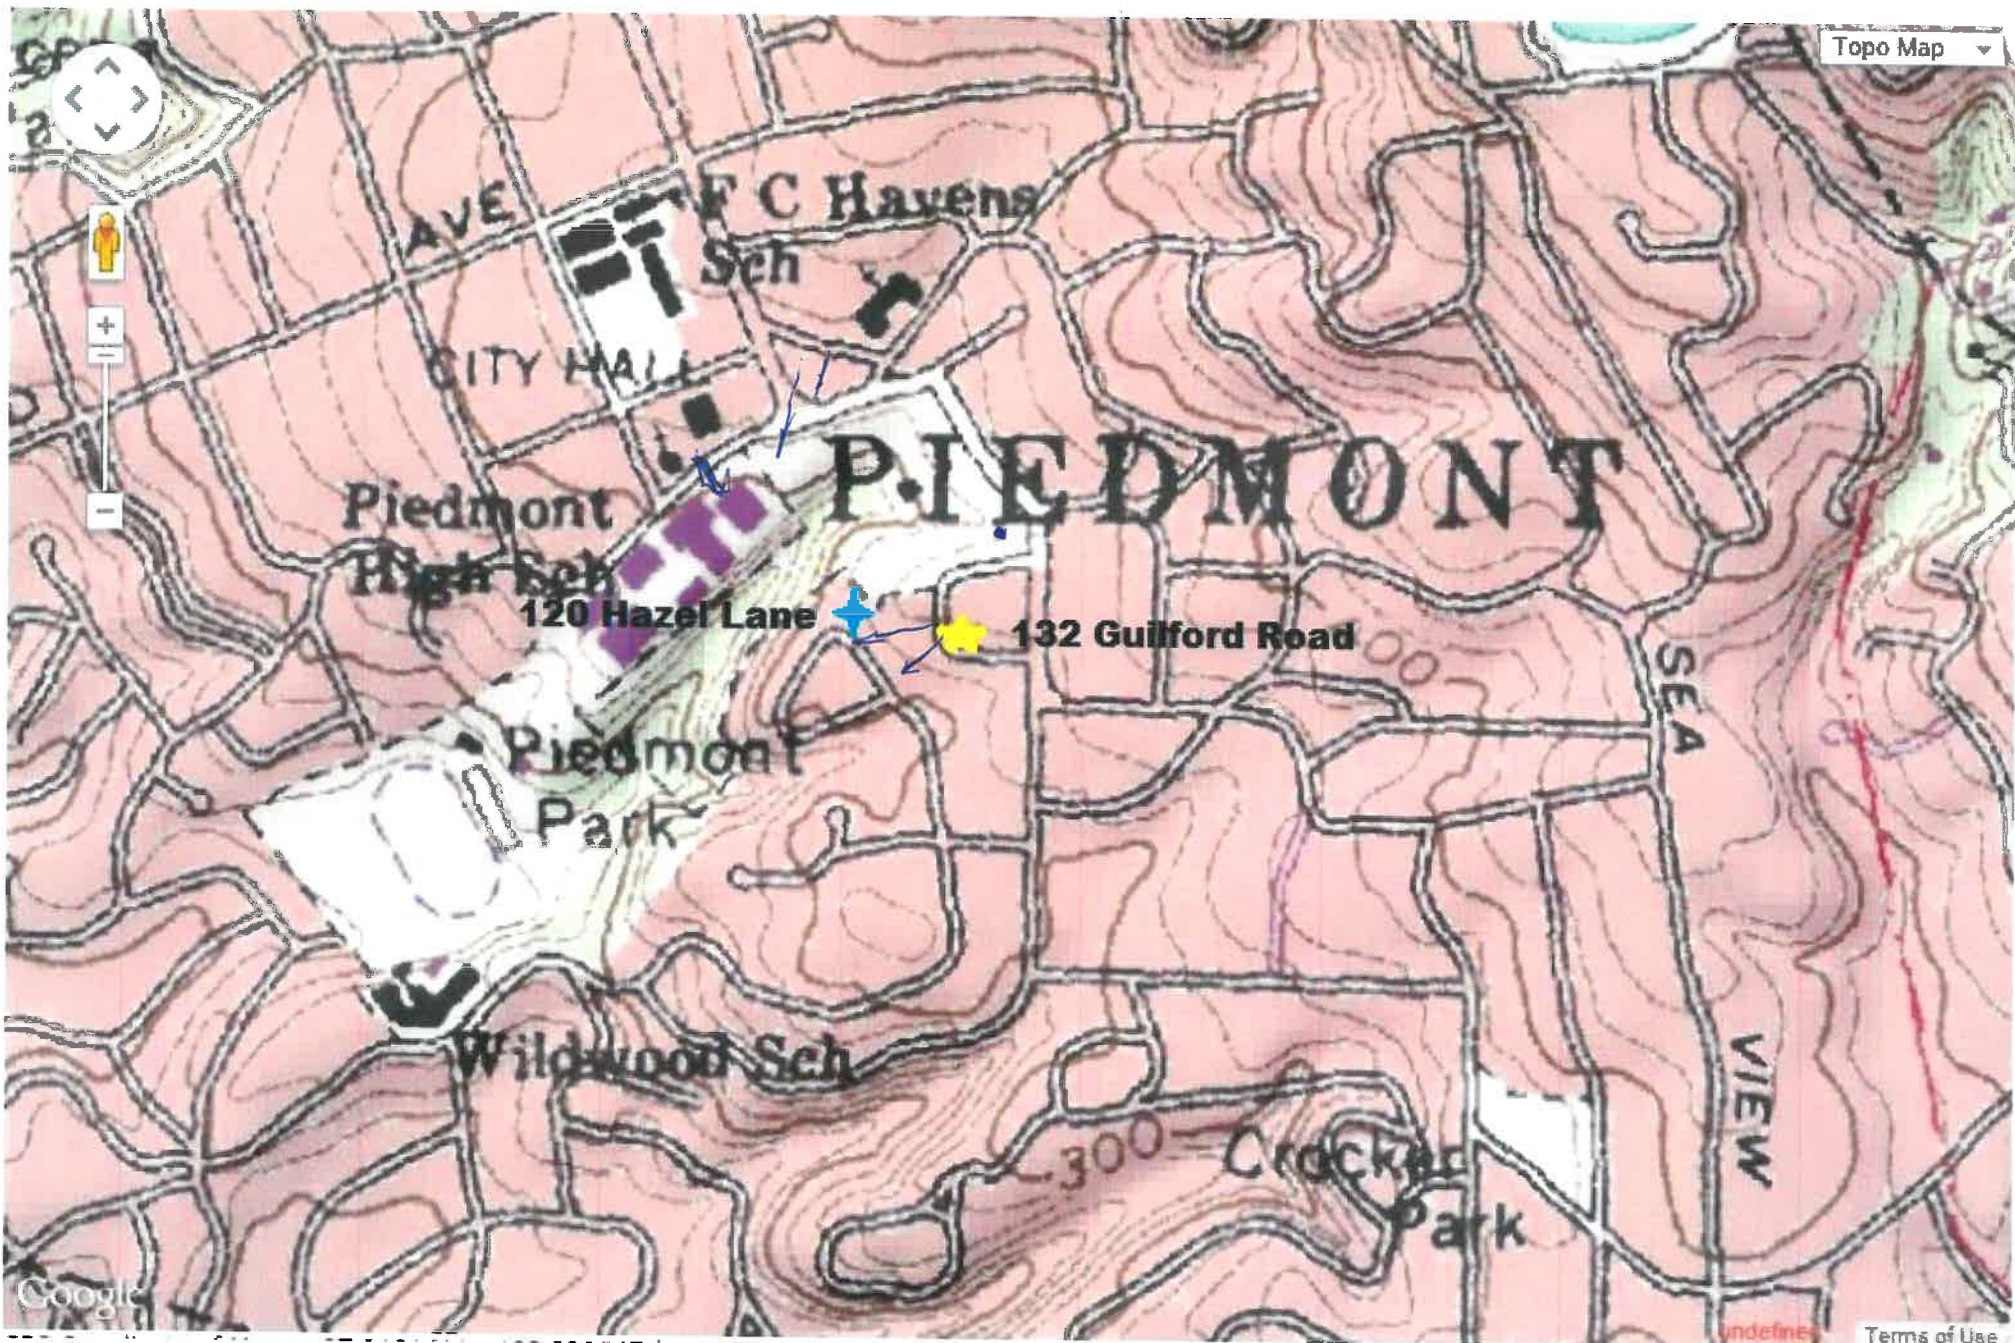

Thanks very much,
Megan
