

MEETING NOTES

CASE NO.: RO3073
SITE NAME: Geno Country Store
ADDRESS: 1000 North Vasco, Livermore
DATE: September 13, 2011

PARTICIPANTS:
Jerry Wickham, ACEH
Scott Menard, Arbor Development
Jeff Adams, Engeo
Shawn Munger, Engeo

The following items were discussed during the meeting:

- In order to leave the fill in place, they would need to do a significant additional amount of testing on the Class II aggregate fill.
- Site has not been subdivided into parcels yet but the park site will have a separate parcel.
- Scott Menard and Engeo are planning to move ahead with a work plan to remove fill material.
- They will check the density and results from earlier tank pit confirmation sampling.
- Removal of aggregate fill will address the elevated TPHg in soil gas at SG-1 and SG-6.
- The stockpiles on back lot from 1994 tank removal will be placed in the excavations within future park site. Stockpiled soil will be screened during excavation and filling to assure that soil is not impacted.
- Sampling will be conducted at the base of the 600 cy stockpiled on back lot from 1994 tank removal.
