Chris and Paul,

I am following up on the site to determine the status of the site. I've attached an extension approval on a work plan that was to incorporate sampling for asbestos, and have also attached a bit of correspondence from around that time. I believe the petroleum question was addressed by the submittal of a revised figure for the work. Let me know where you think the site fits into the requested investigation by next Friday, October 4.

Thanks,

Mark Detterman
