Subject: RE: San Lorenzo asbestos testing (UNCLASSIFIED)

Chris and Paul,

Once you settle on a sampling strategy for the asbestos issue at the site, ACEH requests that the work plan be updated and submitted as a Work Plan Addendum. This can be either as a complete report, or a cover letter describing the proposed changes, referencing sampling protocols (and any changes), with a revised figure. I've set a delivery date mainly to allow easier tracking, but which can be extended with an extension request email and a reason for the extension. It can also be submitted sooner if ready.

TECHNICAL REPORT REQUEST

Please upload technical reports to the ACEH ftp site (Attention: Mark Detterman), and to the State Water Resources Control Board's Geotracker website, in accordance with the specified file naming convention below, according to the following schedule:

- February 21, 2014 – Work Plan Addendum
File to be named: RO3099_WP_ADEND_L_yyyy-mm-dd

Regards,

Mark Detterman

Paul,
If possible could you send us some recent photos of the area that will be sampled. Thanks.

Good Afternoon Mark,

It's difficult to tell if that exact area is open since I can't scale the drawing, but if not that area one very close to the North. I will get you a pdf of the current site plan to send to you. We don't need to have our consultant observe as long as the end goal is met which is closure by Alameda County. I don't think they care where the analysis comes from as long as it contains the necessary information and analysis.

Paul,

Attached is a figure taken from the ECOP showing the area (around B1) where we would like to collect 5 soil samples. Is this area currently accessible? Would you like your consultant observe the sampling process? Thanks.
