Subject: Request for Work Plan; Fuel Leak Case No. RO0003099 and GeoTracker Global ID T10000004346, California National Guard / San Lorenzo High School, 16501 Ashland Avenue, San Lorenzo, CA 94580

Dear Messrs. Musillani and Dixon:

Alameda County Environmental Health (ACEH) has reviewed the case file, including the *Work Plan Addendum*, dated May 27, 2014, generated by the Military Department Office of the Adjutant General and National Analytical Laboratories. The work plan addendum proposed the collection of additional shallow soil samples at the site and the submittal of the samples for analysis by TEM CARB 435 which has an analytical sensitivity of 0.001% asbestos in order to meet the Department of Toxic Substances Control (DTSC) screening criteria for schools of 0.001% asbestos.

Based on the review of the case file ACEH requests that you address the following technical comments and send us the documents requested below.

### **TECHNICAL COMMENTS**

- 1. Work Plan Approval** – The referenced work plan proposes a series of actions with which ACEH is in general agreement of undertaking. Please ensure that as stated a representative of the San Lorenzo Unified School District (SLUSD) is present to witness the shallow soil sampling. This is intended to ensure that the SLUSD is in agreement with the sample collection location, and that it is representative of site soil at that location. This is to ensure that the analytical results can be relied on to be protective of current and future students that will be using the site. Please submit a report by the date specified below.

### **TECHNICAL REPORT REQUEST**

Please upload technical reports to the ACEH ftp site (Attention: Mark Detterman), and to the State Water Resources Control Board's Geotracker website, in accordance with the specified file naming convention below, according to the following schedule:

- **August 1, 2014** – Soil Investigation  
File to be named: RO3099\_SWI\_R\_yyyy-mm-dd

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Online case files are available for review at the following website: <http://www.acgov.org/aceh/index.htm>.
