Ginny DeMartini, BOS Valle, 510.461.4058

09/20/12, I called Ginny back. I am reviewing recent mail & discovered that OFD referred this site to ACEH in August 2012. OFD wrote letter to RP indicating that "...significant ground water contamination' is present at the site and the case was being referred to ACEH. This is a new case for ACEH & ACEH will be listing this case. This case is not closeable at this time and the RP will be requested to perform additional work. Ginny understands the site now & will inform the RP.

09/17/12, Ginny DeMartini, BOS Valle, 510.461.4058

Re: email she forwarded from constituent.

I am not aware of site, not in listed in our database or Geotracker.

RP says 'building' is clean, is he talking about building or soils & GW? She does not know.

Rp says site is clean, his report says site is clean. I indicated that if no contamination is discovered the RP does not have to report the site to regulating agencies and there would be no case to close if no contamination is ever detected.

She will call RP back
