Attachments: Attachment_1_and_ftpUploadInstructions_2016-12-15.pdf

Hello Mr. Carmel:

We request submittal of a brief work plan describing the boring location rationale, permit acquisition, sample collection methods, proposed analytical suite, waste disposal, and a figure. Please include Standard Operating Procedures (SOPs) in an appendix.

TECHNICAL REPORT REQUEST

Please upload technical reports to the ACDEH ftp site (Attention: Karel Detterman), and to the State Water Resources Control Board's Geotracker website, according to Attachment 1 and the following specified file naming convention and schedule:

- October 20, 2017 - Work Plan
File to be named: RO3100_WP_R_YYYY-MM-DD

This report is being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Online case files are available for review at the following website: <http://www.acgov.org/aceh/index.htm>.

Thank you for your cooperation. Should you have any questions or concerns regarding this correspondence or your case, please send me an e-mail message at karel.detterman@acgov.org or call me at (510) 567-6708.

Subject: ARCO 596-A Buttner Property, 1900 Webster street Proposed Boring and grab samples

Hello Everyone:

I hope everyone is having a good week. I understand there is a suggested path to closure by obtaining a few additional grab water samples down gradient at the Snow Park boundaries. I believe this map shows where everyone would like to geoprobe/hydropunch locations at Snow Park. BP would like everyone's concurrence that by obtaining this additional data, this would satisfy any remaining data gaps, provided the results indicate both plume stability and length. We would propose to gain access and for these borings and submit the results to everyone.

The first soil boring would tell us water depth then we could go back in with a hydropunch to collect water or set a temporary well in the geoprobe boring. We may be able to hand auger these water samples too. Just need to get some additional information. The three locations should provide a good transect down gradient in order to protect Lake Merritt and other well in the SE corner of Snow Park.

My preference to not have to respond or make a separate work plan for the dispute resolution arguments. If this work resolves the issues of disagreement and allows everyone to close the case then I'm all for it. All work would be conducted as per prior work conducted at this and other sites within the agencies jurisdiction.

Please let us know if this proposal satisfies each party and I will schedule this work ASAP.

Thanks,

Chuck Carmel

Subject: Buttner

Yes this is great, I got the map.

I would suggest taking the farther most north location and moving it south of the southernmost location an equal distance.

Let me know if there are problems or holdups, I will help
