Mechanics Bank  
1999 Harrison Street, Suite 810  
Oakland, CA 94612

Attention: Ms. Barbara Roesner

Subject: Phase I Environmental Site Assessment Report  
7100-7120 Dublin Boulevard  
Dublin, California 94568

Dear Ms. Roesner:

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of 7100-7120 Dublin Boulevard in Dublin, California, the property. Any exceptions to, or deletions from, this practice are described in Section 1 of this report. This assessment has revealed obvious evidence of recognized environmental conditions in connection with the property at this time.

Should you have any questions regarding this report, please contact the undersigned.

Sincerely,

Basics Environmental, Inc.

A handwritten signature in black ink, appearing to read "Elizabeth French", with a long horizontal flourish extending to the right.

Elizabeth French  
Project Manager

### PHASE I ENVIRONMENTAL SITE ASSESSMENT

7100-7120 Dublin Boulevard

Dublin, California

For

Mechanics Bank

12-ENV2813

July 19, 2012

This report has been prepared by the staff of Basics Environmental, Inc. (Basics) under the professional supervision of an "Environmental Professional" as defined by the U.S. Environmental Protection Agency's Final Rule. The findings, interpretations of data, recommendations, specifications or professional opinions are presented within the limits prescribed by available information at the time the report was prepared, in accordance with generally accepted professional environmental practice and within the requirements by the Client. There is no other warranty, either expressed or implied.

The data and findings of this report are based on the readily available data and information obtained from numerous public and private agencies regarding the subject site and its immediate vicinity. Additional search (at greater cost) may or may not disclose information which may significantly modify the findings of this report. We accept no liability on completeness or accuracy of the information presented and or provided to us, or any conclusions and decisions which may be made by the Client or others regarding the subject site.

This report was prepared solely for the benefit of Basic's Client. Basics consents to the release of this report to third parties involved in the transaction for which the report was prepared, including without limitation, lenders, title companies, public institutions, attorneys, and other consultants. However, any use of or reliance upon this report shall be solely at the risk of such party and without legal recourse against Basics, or its subcontractors, affiliates, or their respective employees, officers, or directors, regardless of whether the action in which recovery of damage is sought is based upon contract, tort (including the sole, concurrent or other negligence and strict liability of Basics), statute or otherwise. This report shall not be used or relied upon by a party that does not agree to be bound by the above statements.

Donovan G. Tom, M.B.A., REA II  
Principal Consultant

## 1.0 INTRODUCTION

### 1.1 Purpose of Investigation

Basics Environmental, Inc. (Basics) has performed this Phase I Environmental Site Assessment (ESA) for Mechanics Bank pursuant to our signed agreement on July 2, 2012. The "subject site" is at 7100-7120 Dublin Boulevard, Dublin, California (APN 941-1401-22). The purpose of this ESA is to:

- Observe site conditions at the property in accordance with the protocols set forth by the *American Society for Testing and Materials (ASTM) Standard E1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and *U.S. Environmental Protection Agency's All Appropriate Inquiry (AAI) Final Rule 40 CFR Part 312*, except where modified by the proposal;
- Identify to the extent feasible recognized environmental conditions in connection with the subject site. The ESA is intended to evaluate the potential for the presence of hazardous or toxic chemicals in the soil and/or groundwater resulting from past and present land use activities. To the extent possible, potential sources of hazardous or toxic chemicals from adjacent off-site operations will also be evaluated; and
- Render findings and professional opinion regarding the potential for adverse environmental impacts on or adjacent to the site.

### 1.2 Scope of Work

The scope of work performed for this ESA consisted of the following tasks:

- Field reconnaissance and personal interviews to evaluate environmental land-use conditions on the subject site and view adjacent properties;
- Aerial photograph, City Directory and/or Fire Insurance/Topographic Map review (typically back to 1940 or first developed use of the property) to evaluate former environmental land-use conditions on the subject site and adjacent properties;
- Review of federal, state and county files and environmental database search report obtained from a commercial service providing up to date and current information;

- Evaluation of the physical setting (geomorphic, geologic and hydrogeologic) of the subject site property; and
- Preparation of this ESA report to present the findings and professional opinions regarding potential recognized environmental conditions on the site.

The work for this ESA was performed within the client approved scope of work and budget for the investigation.

### 1.3 Special Terms and Conditions

The goal of this ESA is to identify recognized environmental conditions indicating the presence or likely presence of any hazardous substances or petroleum hydrocarbons in structures, ground, groundwater, or surface water of the property. Recognized environmental conditions are not intended to include *de minimus* conditions that do not present risks to public health or environment and that would not be subject to enforcement actions by government agencies.

### 1.4 Limitations and Exceptions

This ESA only includes a visual evaluation of the presence of asbestos, wetlands, mold, radon or lead paint, if applicable. In addition, this ESA does not include the results of any sampling, monitoring, or other types of field and/or laboratory testing or investigation.

### 1.5 User Responsibilities

The user of this ESA will be responsible for: (1) determining the relationship of the purchase price to the value of the property; (2) disclosure of specialized knowledge, experience or information which may effect the environmental condition of the subject site; and (3) disclosure of any environmental cleanup liens against the property within recorded land title records, if applicable. None of the above was provided by the client for our review.

## 2.0 SITE DESCRIPTION AND RECONNAISSANCE

### 2.1 Site Description and Uses

#### 2.1.1 Interviews

A Basics representative visited the subject site on July 13, 2012. Basics observed the various facilities and operations conducted at the site and also noted the land-use in the vicinity of the site. The managers for the individual units at the subject site provided access to available areas. Ms. Sharlene Hasler, property manager for the subject site, was also briefly interviewed during a phone conversation. Discussions with Ms. Hasler indicated to her knowledge, a dry cleaners onsite currently utilizes Perchloroethylene (Perc) as part of site operations. However, Ms. Hasler stated that to her knowledge she is unaware of any spills or leaks from the dry cleaning operations that would result in impacts to the subsurface. Ms. Hasler stated that no groundwater monitoring wells have been installed onsite. In addition, Ms. Hasler indicated that to her knowledge, no other tenants utilize hazardous materials at the site. Additional information obtained from the interview is incorporated within the appropriate sections of this report.

#### 2.1.2 Site Description and Uses

The subject site is located within the City of Dublin at the southern corner of Dublin Boulevard and Village Parkway, and approximately one-eighth mile west of the Alamo Canal. (See Drawings 1 and 2). The subject site consists of an approximately 2.92-acre "triangular" shaped parcel of land improved with two one-story commercial buildings (7100 & 7120 Dublin Boulevard), and one, one-story multi-unit commercial building (7102A, 7102B, 7104, 7106, 7108, 7110, 7112 and 7114 Dublin Boulevard) with associated paved and landscaped areas. (See Photos 1 - 22).

The two, one-story commercial buildings and the one-story multi-unit commercial building are constructed of concrete and wood framing on a concrete slab foundation with stucco exterior walls. Interior building materials include sheet rock interior walls and partitions, carpet, vinyl and ceramic tile covered concrete floors, and "drop-style" acoustical ceilings.

Utilities including water, electric, natural gas and sewage service are publicly supplied. The general area surrounding the property is developed commercial. A site plan illustrating the site and adjacent properties is shown in Drawing 3.

The easternmost one-story commercial building (7100 Dublin Boulevard) is currently occupied by Concord Feed, Pet & Horse Supply and utilized as pet supply and feed store.

The westernmost one-story commercial building (7120 Dublin Boulevard) is currently occupied by Carl's Jr., and utilized as a fast-food restaurant.

The multi-unit commercial building is currently segregated into seven business units (7102, 7104, 7106, 7108, 7110, 7112 and 7114 Dublin Boulevard). The unit addressed as 7102 Dublin Boulevard is currently occupied by Pretty in Pink and is utilized as a clothing retail store. The unit addressed as 7104 Dublin Boulevard is currently occupied by Park Avenue Cleaners and is utilized as a dry cleaner. The unit addressed as 7106 Dublin Boulevard is vacant, but signage on the exterior indicated the unit was most recently occupied by Acclaim Mailing Services and is utilized as a copy and print shop. The unit addressed as 7108 Dublin Boulevard is occupied by Rahma Mediterranean Market and is utilized as a grocery store and deli. The unit addressed as 7110 Dublin Boulevard is occupied by Radio Shack and is utilized as an electronics retail store. The unit addressed as 7112 Dublin Boulevard is occupied by Mr. Pickle's Sandwich Shop and is utilized as a sandwich restaurant. The unit addressed as 7114 Dublin Boulevard is occupied by Beauty Plus Salon and is utilized as a hair salon.

One-Story Commercial Building (7100 Dublin Boulevard) (circa 1976) - The one-story commercial building at 7100 Dublin Boulevard is located on the north-east corner of the subject site. The building is currently occupied by Concord Feed & Supply and segregated into a retail store area and rear storage area (Photos 5-6). The main entrance to the building is located on the west side of the building providing access from the parking area. A secondary personnel exit is located at the south side of the building providing access to the parking area.

The retail store area occupies the western portion of the building and consists of shelves and miscellaneous pet food items and supplies for resale. Visual observations of the retail store area did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the tile covered floors within the retail store area did not reveal any

sumps, drains, cracks or other conduits to the subsurface.

The storage area occupies the eastern portion of the building and consists of shelves stocked with miscellaneous pet food and supplies. Visual observations of the storage area did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the tile covered floors within the storage area did not reveal any sumps, drains, cracks or other conduits to the subsurface.

Located on the east portion of the building are restroom facilities. Visual observations of the restroom facilities did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the tile covered floors within the restroom facilities did not reveal any sumps, drains, cracks or other conduits to the subsurface.

One-Story Commercial Building (7120 Dublin Boulevard) (circa 1976) - The one-story commercial building at 7120 Dublin Boulevard is located on the north-west corner of the subject site. The building is currently vacant and unoccupied (Photo 7). However, signage on the building indicates it was most recently occupied by Carl's Jr. Restaurant. Visual observations made from the exterior of the subject building indicate that the interior of the building is segregated into a seating area, a fast food kitchen and restroom facilities. The main entrance to the building is located on the west side of the building providing access from the parking area.

Limited visual observations of the seating area did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the floor in the seating area did not reveal any sumps, drains, cracks or other conduits to the subsurface. Due to closed and locked doors, observations of the kitchen area and restrooms were not possible.

One-Story Multi-Unit Commercial Building (7102 - 7114 Dublin Boulevard) (circa 1976) - The multi-unit commercial building occupies the south side of the subject site and is segregated into seven business units (7102 - 7114 Dublin Boulevard) (Photos 1 & 4). 7102 is at the east end of the building and 7114 is at the west end of the building, with each of the respective units in between. Each unit is accessible from a main entrance door on the north side of the building, with additional personnel doors located on the south side of the building. Additionally, 7102 has two rollup doors and a truck loading bay at the south-east corner of the building.

*Pretty in Pink (7102 Dublin Boulevard)* – The unit addressed as 7102 Dublin Boulevard is currently occupied by Pretty in Pink and is utilized as a clothing retail store. It is segregated into a retail area (on the northern portion) and a storage area (on the southern portion).

Located within the retail area are typical racks and shelves filled with clothing and other miscellaneous clothing accessories for resale (Photo 8). Located within the storage room are boxes of clothing and accessories (Photo 22). Visual observations of the retail and storage areas did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the carpet covered floors within the retail and storage areas did not reveal any sumps, drains, cracks or other conduits to the subsurface.

Located on the south portion of the building are restroom facilities. Visual observations of the restroom facilities did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the tile covered floors within the restroom facilities did not reveal any sumps, drains, cracks or other conduits to the subsurface.

*Park Avenue Cleaners (7104 Dublin Boulevard)* – The unit addressed as 7104 is currently occupied by Park Avenue Cleaners and is utilized as a dry cleaning facility. It is segregated into a reception area, a pressing and washing area, a cleaning area, storage hallway and restrooms.

The reception area is located at the north side of the business unit (Photo 9). The pressing area is located at the center of the business unit. Located within the pressing area are several pressers. Visual observations of the reception area and pressing area did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the carpet and concrete floors within these areas did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

The cleaning area is located on the south-central portion of the business unit (Photo 10). Located within the cleaning area are three commercial grade washing machines, two commercial grade dryers and two dry-cleaning machines.

Located in a segregated room on the southeast portion is a dry cleaning machining. Next to the dry cleaning machine, with a plastic tube connecting it to the machine, is a 35-gallon drum contained within a 55-gallon drum of waste tetrachloroethylene (PERC) (Photo 11). Discussions

with Mr. Major Brar, indicated that the machine was purchased sometime around 2000 (replacing a similar machine from a different manufacturer), and was moved from the adjacent previous location at 7102B Dublin Boulevard. Mr. Brar indicated that hazardous waste is collected and disposed of by Technichem (PERC, approximately every three months; and waste water and filters every six months). Visual observations of the cleaning area did not reveal any obvious evidence of major stains or spills. Visual observations of the concrete floors in the cleaning area did reveal minor cracks but no obvious evidence of drains, sumps or other conduits to the subsurface.

Located in another segregated area on the east portion of the cleaning area is a second dry cleaning machine. Next to the dry cleaning machine is a 35-gallon drum contained within a 55-gallon drum of waste hydrocarbon fluid (TL HCS 800) (Photo 12-14). Visual observations of the dry cleaning area did not reveal any obvious evidence of major stains or spills. Visual observations of the concrete floor in the dry cleaning area did not reveal any obvious evidence of drains, sumps or other conduits to the subsurface.

Visual observations of the rest of the cleaning area did not reveal any obvious evidence of major stains or spills. Visual observations of the concrete floors in the cleaning area did reveal minor cracks but no obvious evidence of drains, sumps or other conduits to the subsurface.

The storage hallway is located on the south portion of the business unit. Located within the storage hallway are four boilers and approximately two five-gallon containers of stain removers and miscellaneous other cleaning supplies (Photos 15-16). Discussions with Mr. Brar indicate that new PERC and hydrocarbon fluid are not stored onsite, and are pumped directly from a truck into the dry cleaning machines. Visual observations of the storage hallway did not reveal any obvious evidence of major stains or spills. Visual observations of the concrete floors in the storage hallway did reveal minor cracks but no obvious evidence of drains, sumps or other conduits to the subsurface.

The restroom is located at the southeast side of the business unit and contains a small sink basin. Visual observations of the restroom facilities did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the vinyl covered floors within the restroom facilities did not reveal any obvious evidence of drains, sumps, major cracks or other

conduits to the subsurface.

*Vacant (7106 Dublin Boulevard)* – The unit addressed as 7106 Dublin Boulevard is currently vacant and unoccupied. However signage on the unit indicate it was previously occupied by Acclaim Mailing Services (Photo 17). Due to closed and locked premises during the site visit, observations were limited to visual observations through the windows. The business unit was empty and void of furnishings. Visual observations of the business unit did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the carpet covered floors within the business unit did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

*Rahma Mediterranean Market (7108 Dublin Boulevard)* – The address 7108 Dublin Boulevard is currently occupied by Rahma Mediterranean Market and is utilized as a grocery store. The business unit is segregated into a retail store area with deli and a storage area (Photo 18).

Located within the retail store area are shelves of miscellaneous grocery items for resale, a deli area with walk-in freezer and a retail counter. Visual observations of the retail store area did not reveal any obvious evidence of stains or spills from hazardous materials. Visual observations of the tile covered floors within the retail store area did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

Located within the retail store area is a secondary walk-in freezer, additional grocery items, kitchen and mezzanine for product storage. Visual observations of the storage area did not reveal any obvious evidence of stains or spills from hazardous materials. Visual observations of the floors within the storage area did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

The restroom is located at the south portion of the business unit and contains a small sink basin. Visual observations of the restroom facilities did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the vinyl covered floors within the restroom facilities did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

*Radio Shack (7110 Dublin Boulevard)* - 7110 Dublin Boulevard is currently occupied by Radio Shack and is utilized as an electronics store. The store is segregated into a retail store area and a storage area (Photo 19).

Located within the retail store area are miscellaneous electronic parts and equipment for resale. Visual observations of the store area did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the carpet covered floors within the store area did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

Visual observations of the storage area were not made due to restricted access.

*Mr. Pickle's Sandwich Shop (7112 Dublin Boulevard)* – The unit addressed as 7112 Dublin Boulevard is currently occupied by Mr. Pickle's Sandwich Shop. Located within the business unit is a deli area and restaurant area with typical tables and chairs (Photo 20). Visual observations of the business unit did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the tile covered floors within the restaurant area did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface. The restroom is located at the south portion of the business unit and contains a small sink basin.

Visual observations of the restroom facilities did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the vinyl covered floors within the restroom facilities did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

Visual observations of the office/ storage area were not made due to restricted access.

*Beauty Plus Salon (7114 Dublin Boulevard)* – The unit addressed as 7114 Dublin Boulevard is currently occupied by Beauty Plus Salon and is utilized as a hair salon (Photo 21). The business unit is segregated into a waiting area and a hair-cutting area. Visual observations of the barber shop did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the vinyl covered floors within the barber shop did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

The restroom is located at the south portion of the business unit and contains a small sink basin. Visual observations of the restroom facilities did not reveal any obvious evidence of

hazardous materials, stains or spills. Visual observations of the vinyl covered floors within the restroom facilities did not reveal any obvious evidence of drains, sumps, major cracks or other conduits to the subsurface.

Associated Paved, Landscaped and Unpaved Areas - The associated paved areas are located on the north and south sides of the subject site and also in between the three buildings. The paved areas are accessible from Dublin Boulevard to the north and Village Parkway to the south and west. The associated paved area consists of concrete and asphalt, can accommodate automobiles and light trucks and is utilized as a common parking area for the subject site. The associated landscaped areas are located along all sides of the subject site parcel and interspersed between the subject site buildings and sidewalk areas.

A garbage bin area is located at the south side of the multi-unit commercial building, and the south side of the building addressed as 7100 Dublin Blvd. General observations of the garbage bin areas did not reveal any obvious evidence of hazardous materials, stains or spills.

Visual observations of the rest of the associated paved and landscaped areas did not reveal any obvious signs of hazardous materials or spills, other than oil stains from vehicles common to all parking lots. No evidence of underground storage tanks, distressed vegetation, or surface impoundments were observed throughout the site during the inspection.

Located within the associated landscaped area near the northwest corner of the building is one concrete pad mounted electrical transformer (T-7868). Such a unit is notable because it may be polychlorinated biphenyl (PCB) source. PCB units may subject the owner/operator to various requirements. The release of PCB fluids or their combustion products (in the event of a fire) is a potential environmental liability and may require remediation. Observations of the area surrounding the transformer did not reveal any obvious signs of hazardous material stains and/or spills. In addition, the transformer did not have any visible labels identifying PCBs. Due to the age of the transformer and lack of PCB labels the probability of PCBs is low.

Visual observations of the rest of the associated paved and unpaved areas did not reveal any obvious signs of hazardous materials or spills, other than oil stains from vehicles common to all parking lots. No other obvious evidence of underground storage tanks, former septic tanks, distressed vegetation, or surface impoundments were observed throughout the site during the inspection.

## 2.2 Adjacent Properties

Sites in the vicinity of the subject site were observed during the site reconnaissance to evaluate conditions or businesses indicative of hazardous or potentially toxic materials use.

The following are the uses of the adjoining properties.

- North - Dublin Boulevard, Commercial/Retail Buildings including Big O Tires (7121-7143 Dublin Boulevard) and Dublin-San Ramon Services District (7051 Dublin Boulevard).
- South - Commercial Office Building (6400 Village Parkway).
- East - Dental Care Offices (6300 Clark Road).
- West - Village Parkway, Dublin Auto Wash and Gas Station (7240 Dublin Boulevard) and Shangri-La Chinese Cuisine (6568 Village Parkway).

Visual observations of the adjacent properties revealed potential business activities indicative to the use, storage and/or treatment of hazardous materials at Dublin Auto Wash and Gas Station (7240 Dublin Boulevard) and Big O Tires (7121 Dublin Boulevard). However, no obvious evidence of groundwater monitoring wells was noted on or near the subject site.

## 2.3 Non-ASTM E1527 Considerations

### 2.3.1 Asbestos Containing Construction Materials

An asbestos survey was not conducted at the property as part of this assessment. However, the subject site structures were confirmed to have been constructed before 1979, the year asbestos containing construction materials was banned, thus, asbestos may have been utilized in their construction. No obvious evidence of friable or non-friable suspect asbestos containing materials were observed within easily accessible areas of the structures. However, original building materials not easily accessible including, but not limited to, flooring and masting materials, sheet rock muds and taping compounds, ceiling and roofing materials, and ducting and surfacing materials may contain ACCMs. To confirm if any asbestos materials are contained within the structures on the subject site, an asbestos survey should be performed by an AHERA trained asbestos professional. If the property buildings are slated for renovation or demolition, an asbestos inspection will be required, pursuant to the National Emission Standards for Hazardous Air Pollutant (NESHAPs).

### 2.3.2 Lead-Based Paint

A Lead-based paint survey was not conducted at the property as a part of this assessment. However, the subject site structures were confirmed to have been constructed before the ban on lead-based paints in 1978, thus, lead-based paints may have been utilized in their construction. Visual observations of the painted surfaces of the subject site structures appeared to be in fair condition with no obvious signs of chipping, cracking, and/or significant health risk concerns.

Lead-based paint is any paint, varnish, stain, or other applied coating that has 1 mg per square cm (or 5,000  $\mu\text{g/g}$  by dry weight) or more of lead. In Section 1017 of the Housing and Urban Development Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as " Title X", states that a lead-based paint hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard.

### 3.0 PHYSICAL SITE SETTING

#### 3.1 Geomorphic Description

The subject site is located on relatively level topography within the Livermore tri-valley area at a general elevation of 310-324 feet above mean sea level. The Livermore Valley, an east-west trending, inland structural basin located in northeastern Alameda County, is surrounded primarily by north-south trending faults and hills of the Diablo Range. The valley covers about 42,000 acres, extends approximately 14 miles in an east-west direction and varies from 3 to 6 miles in width. It is separated from San Francisco Bay by several northwesterly trending ridges of the California Coast Ranges, including the Pleasanton Ridge. The valley floor slopes gently west and southwest from an elevation of approximately 700 feet above sea level in the east to approximately 300 feet above sea level in the southwest. The topography of the subject site is generally characterized by relatively flat areas.

#### 3.2 Geologic Setting

The structure of the area is controlled by interaction between the Calaveras and Pleasanton fault zones. Structural uplift of the entire Coast Ranges occurred during the late middle Pliocene and Pleistocene, causing extensive folding and faulting of the region. The Livermore Valley, a structural valley formed by a faulted, asymmetric syncline, was created as a result of downwarping of the Miocene-Pliocene sandstones and conglomerates between the western bordering Calaveras Fault and the eastern bordering Greenville Fault. Continued deposition, uplift, and faulting have led to the current Livermore Valley stratigraphy.

The valley is partially filled with Pleistocene-Holocene age (recent alluvium) alluvial fan, stream and lake deposits, which range in thickness from a few feet along the margins to nearly 400 (and possibly 800) feet in the west-central portion. The alluvium consists of unconsolidated gravel, sand, silt, and clay. The southern region of the Livermore Valley, the most important groundwater recharge area, consists mainly of sand and gravel that was deposited by the ancestral and present Arroyo Valle and Arroyo Mocho. The eastern and northern regions of the valley contain thinner deposits and consist of alternating layers of gravel, sand, silt, and clay that

are laterally discontinuous and resulted from the deposition of smaller streams. The western region of the valley has extensive gravel layers alternating with thick clay beds totaling approximately 400 feet in thickness. The alternation of sand/gravel layers and silt/clay layers form the basic aquifers for the area. A previous geotechnical subsurface investigation conducted at a site indicated that within the upper four to five feet, the subsurface soils at the site “consist of sandy silty clays of low to intermediate plasticity, having moderate to high potential for volumetric change with changes in moisture content. Beneath this, surface consistency of the subsurface soils varied between soft to very stiff for the clays, and loose to medium dense for the sands (Terratech, 1975).”

### 3.3 Hydrogeologic Setting

The site is within the Dublin Sub-basin of the Livermore Valley Groundwater Basin. The unconsolidated to semi-consolidated alluvium in the valley is the main ground water bearing zone in the Livermore Valley Groundwater Basin. Groundwater occurs here under unconfined conditions. The alluvial aquifer is recharged by runoff from adjacent highlands and seepage from local streams. The regional ground water flow follows topography, moving from areas of higher elevation to areas of lower elevations. However locally, groundwater flow direction is complex due to the combined effects of a generally upward gradient and the nearby creek/ flood channel. Another possible influence includes the city sewer line located beneath Dublin Boulevard. Information regarding first depth to groundwater and flow direction were researched at the California Regional Water Quality Control Board’s (RWQCB) website at <https://geotracker.waterboards.ca.gov/>. Based on previous subsurface investigations at the subject site, ground water has been encountered 9-14 feet below ground surface (bgs) (Terratech, 1975). Based on subsurface investigations at an adjacent site, the groundwater flows in an historically south to southeasterly direction in the shallow aquifer zones, with an approximately 0.1 ft/ft vertical gradient (7240 Dublin Boulevard). Hillside runoff, aquifer pumping, tidal fluctuations or other factors may influence ground water levels. Seasonal variations should also be anticipated.

#### 4.0 HISTORICAL REVIEW

Site historical information was obtained from a review of Sanborn Fire Insurance Maps, United States Geological Survey (U.S.G.S.) Topographic Maps, aerial photographs, Polk and Haines City Directories. In addition, local building department records were also reviewed. The following Sanborn maps, topographic maps, and city directories were reviewed on July 13, 2012, within the libraries maintained by the University of California in Berkeley, California and City of Oakland, in Oakland, California. The aerial photographs were provided by the National Environmental Title Research, LLC, TerraServer, and Google Earth. No Sanborn Fire Insurance Maps were available for the subject site.

<u>Reference</u>	<u>Date</u>

In the topographic maps of 1908, 1940, 1942 and 1947, the subject site and immediate surrounding areas are shown as undeveloped. During these times the only development in the immediate area was Dublin Boulevard north of the subject site.

In the aerial photographs of 1946 and 1949, the subject site appears as undeveloped. During these times, bordering the site appears a paved road followed by undeveloped/ agricultural land to the north; a paved road followed by undeveloped land to the south; undeveloped land to the east; and a paved road followed by undeveloped land to the west.

In the topographic map of 1953, the subject site and immediate adjacent properties are shown as undeveloped land. During this time, the only development in the immediate area was Dublin Boulevard to the north. In addition, San Ramon Creek is noted several parcels to the west, Alamo Canal is noted several parcels to the east, and a sewage treatment plant is noted several parcels to the south east.

In the aerial photograph of 1958, the subject site appears as undeveloped, though a line traverses north to south through the site similar to a creek or unpaved road. During this time, bordering the site appears a paved road followed by undeveloped/ agricultural land to the north; a paved road followed by undeveloped land to the south; undeveloped land to the east; and a paved road followed by undeveloped land to the west.

In the topographic map of 1961, the subject site and immediate adjacent properties are shown as undeveloped land. During this time, an air strip is noted approximately one quarter mile to the north and a military reserve is noted approximately one quarter mile south east of the subject site.

In the aerial photograph of 1966, the subject site appears as undeveloped. During this time, bordering the site appears a paved road followed by two small buildings to the north; a paved road followed by undeveloped land to the south; undeveloped land to the east; and a paved road followed by undeveloped land to the west.

In the aerial photograph and topographic map of 1968, the subject site is shown as undeveloped land. During this time, bordering the site is Dublin Boulevard followed by two small commercial buildings to the north; undeveloped land to the south; undeveloped land followed by Clark Avenue to the east; and Village Parkway followed by undeveloped land to the west.

In the topographic maps of 1973 and 1975, the subject site is shown as undeveloped. During these times, bordering the site is Dublin Boulevard followed by two small commercial buildings to the north; Village Parkway followed by undeveloped land to the south; undeveloped land followed by Clark Avenue to the east; and Village Parkway followed by undeveloped land to the west. In addition, two highways are shown nearby to the west and south.

In the city directory of 1973, the subject site addresses are not listed.

In the city directory of 1977, the subject site was listed as occupied by Kinney Shoes (7100 Dublin Boulevard). The additional subject site addresses (7102-7120 Dublin Boulevard) are not listed at this time.

In the aerial photograph of 1979, the subject site appears as developed with three buildings (as noted during the site reconnaissance). During this time, bordering the site appears Dublin Boulevard followed by three commercial buildings to the north (as noted during the site reconnaissance); Village Parkway followed by two buildings to the south (as noted during the site reconnaissance); two buildings to the east (as noted during the site reconnaissance); and Village Parkway followed by three buildings to the west (as noted during the site reconnaissance). In addition, two highways are shown nearby to the west and south.

In the topographic maps of 1981, 1984 and 1989, the subject site is shown as developed with three buildings (as noted during the site reconnaissance). During this time, bordering the site is Dublin Boulevard followed by three commercial buildings to the north (as noted during the site reconnaissance); Village Parkway followed by two buildings to the south (as noted

during the site reconnaissance); two buildings to the east (as noted during the site reconnaissance); and Village Parkway followed by three buildings to the west (as noted during the site reconnaissance). In addition, two highways are shown nearby to the west and south.

In the city directory of 1982, the subject site is listed as occupied by Kinney Shoes (7100 Dublin Boulevard), Consumers Distributing (7102 Dublin Boulevard), Kragen Auto Supply (7104 Dublin Boulevard), Pic A Dilly (7106 Dublin Boulevard), DYoung of Dublin (7108 Dublin Boulevard), One Hour Photo (7112 Dublin Boulevard), and Carl's Jr. (7120 Dublin Boulevard). During this time, the subject site addresses of 7110 and 7114 Dublin Boulevard are not listed.

In the aerial photographs of 1987, 1993, 2000, 2002, 2005, 2009 and 2010, the subject site and adjacent properties appear to be developed with the current buildings.

In the city directory of 1988, the subject site is listed as occupied by Kinney Shoes (7100 Dublin Boulevard), The Dream Weaver and Taylor Rental (7102 Dublin Boulevard), Kragen Auto Parts (7104 Dublin Boulevard), Chaney's Music Exchange and Hennings Piano and Organ (7108 Dublin Boulevard), Radio Shack (7110 Dublin Boulevard), AC One Hour Photo (7112 Dublin Boulevard), Honey Treat Yogurt (7114 Dublin Boulevard), and Carl's Jr. (7120 Dublin Boulevard). During this time, the subject site address of 7106 Dublin Boulevard is not listed.

In the city directory of 1993, the subject site is listed as occupied by McClouds Pet Emporium (7100 Dublin Boulevard), Park Avenue Cleaner and Taylor Rental (7102 Dublin Boulevard), Kragen Auto Works (7104 Dublin Boulevard), Dublin Office Supply (7106 Dublin Boulevard), Presto Prints (7112 Dublin Boulevard), A Good Old Barber Shop (7114 Dublin Boulevard), and Carl's Jr. (7120 Dublin Boulevard). During this time the subject site addresses of 7106 and 7110 Dublin Boulevard are not listed.

In the city directory of 1998, the subject site is listed as occupied by EID Center Corp and Park Avenue Cleaners (7102 Dublin Boulevard), Kragen Auto Works (7104 Dublin Boulevard), Acclaim Mailing Services and Acclaim Print and Copy Services (7106 Dublin Boulevard), CPC Baking Outlet (7108 Dublin Boulevard), Radio Shack (7110 Dublin Boulevard), A Good Old Barber Shop (7114 Dublin Boulevard), and Carl's Jr. (7120 Dublin Boulevard). During that time the subject site addresses of 7100 and 7112 Dublin Boulevard were

not listed.

In the city directory of 2002, the subject site is listed as occupied by Corners (7100 Dublin Boulevard), Park Avenue Cleaners and Post Tool (7102 Dublin Boulevard), Lifestyles (7104 Dublin Boulevard), Acclaim Enterprises (7106 Dublin Boulevard), Entenmenns Orowheat Bakery Outlet (7108 Dublin Boulevard), Radio Shack (7110 Dublin Boulevard), Blimpie's Sandwiches and Salads (7112 Dublin Boulevard), A Good Old Barber Shop (7114 Dublin Boulevard), and Carl's Jr. (7120 Dublin Boulevard).

During a previous site reconnaissance conducted in 2003, the subject site was noted as occupied by Parvizi Galleria, is utilized as a pool table and furniture store (7102A Dublin Boulevard); Park Avenue Cleaners, utilized as a dry cleaner (7102B Dublin Boulevard); vacant unit (7104 Dublin Boulevard); Acclaim Mailing Services, utilized as a copy and print shop (7106 Dublin Boulevard); Motorpsycho, utilized as a motorcycle supply and accessory shop (7108 Dublin Boulevard); Radio Shack, utilized as an electronics retail store (7110 Dublin Boulevard); Blimpie's Sub Shop, but was vacant due to remodeling (7112 Dublin Boulevard); and A Good Old Barber Shop, utilized as a barber shop (7114 Dublin Boulevard).

## 5.0 ENVIRONMENTAL DATABASE REVIEW

### 5.1 Agency Record Review

Environmental Data Resources, Inc. (EDR) was contracted to compile data from available government agency databases on locations of actual and potentially impacted sites within a one-mile radius of the subject property. Copies of the environmental database lists and the location map for the subject site are included in Appendix A.

The results of the database search by EDR revealed 40 mapped sites and 9 unmapped sites within a one-mile radius, of which three mapped sites are within a one-eighth mile radius of the subject site. Based on distance from the subject property and regional hydrogeology the following select sites identified by EDR have the highest potential to impact the subject site.

- **Park Ave Cleaners Corp** – 7104 and 7102 B Dublin Boulevard, Dublin CA  
Located at the subject site. Listed on the RCRA-SQG, Drycleaners, HAZNET, FINDS and EMI lists.

According to the information provided by EDR, this site is listed as a dry cleaning and laundry services site as a small quantity generator of hydrocarbon solvents, solids or sludges with halogenated organic compounds  $\geq 1,000$  Mg./L, and Aqueous solution with total organic residues less than 10 percent (CAL EPA IDs: CAL000297021/ CAL000320965/ CAD982429102). The site is also permitted for air emissions. No further information was given by EDR.

- **Camp Parks Military Reservation** – Alameda County CA  
Located at an undisclosed location nearby to the east/northeast of the subject site. Listed on the Department of Defense (DOD) list.

According to the information provided by EDR, this site is listed on the Department of Defense database. No other information was available for this site by EDR. No reports of spills or unauthorized releases were noted for this site by EDR. A review of the RWQCB's GeoTracker and Cal-EPA EnviroStor websites revealed this site is not listed as an active or inactive case.

- **Chevron #9-2582** – 7240 Dublin Boulevard, Dublin CA  
Located across Village Parkway to the west of the subject site, and in the perceived up gradient direction. Listed on the SWEEPS, EMI, County, LUST and UST lists.

According to the information provided by EDR, this site is listed as an open LUST site. According to GeoTracker, there are currently three 10,000-gallon underground storage tanks (USTs) and a carwash at the site.

From approximately 1988 to 1997, Chevron Products Company performed assessment and remediation of the site. A soil vapor extraction (SVE) system was operated at the site from December 1992 through June 1995. Mr. Hadjian is the responsible party for an unauthorized release from a leaking stainless steel flex-hose near the northernmost dispenser island in February 1997. Subsequently, a new product delivery system was installed and about 31 cubic yards of contaminated soil was removed from the release area. Gettler-Ryan, Inc. monitored the eight existing groundwater wells at the site until 2003, when SOMA Environmental Engineering, Inc., took over groundwater monitoring and conducted further characterization of the site using electrical conductivity logging to identify potential water-bearing zones. In November 2004, Pangea commenced coordination of groundwater monitoring and corrective action for the site. To delineate the contamination detected during SOMA's investigation, Pangea installed additional monitoring wells with shorter screen lengths in identified water-bearing zones in 2006. Pangea also drilled three soil borings (SB-1, SB-1A and SB-2) to help evaluate subsurface conditions downgradient of the 1997 release and north of the site, and the potential for contamination migration along the 18-inch sanitary sewer line in Dublin Boulevard.

In July 2009 Pangea installed two dual-phase extraction (DPE) wells. To remediate the small localized impact area, DPE was conducted between September 15, 2010 and November 15, 2010 until low contaminant removal rates were observed. The DPE system operated for a total of about 1,189 hours (approximately 50 days). The DPE system was shutdown on November 15, 2010 due to low contaminant removal rates, the small localized extent of site contamination, the commencement of the winter rainy season, and cost control.

According to the latest groundwater monitoring report completed on April 30, 2012, sampling was conducted on February 15 and 16, 2012. Groundwater samples were obtained from groundwater monitoring wells MW-1, MW-2, MW-3A, MW-4, MW-5, MW-6A, MW-6B, MW-7AA, MW-7A, MW-7B, MW-8A, MW-9A, MW-10A. The closest well to the subject site is MW-9A. Samples were collected and analyzed for benzene, toluene, ethylbenzene, xylenes (BTEX), gasoline range organics (TPH-g), and methyl-tert-butyl ether (MTBE). The concentration in well MW-9A were non-detect for all constituents. Though remediation is currently ongoing, based on the above information, the probability of a subsurface environmental impact from this site to the subject site is low.

- **ZZ Albertson Dublin Data Center/ Albertsons Inc/ Lucky Store** – 6300 Clark Avenue, Dublin CA. Located adjacent to the south and in the perceived down gradient direction of the subject site. Listed on the HIST Cortese, LUST, County, SWEEPS UST and HAZNET databases.

According to EDR and GeoTracker, this site is listed as manifesting asbestos containing waste, material containing PCBs, and other empty containers 30 gallons or more (CAL EPA ID: CAC002612800). The site is also listed as a closed LUST site. The site is listed as having a 1,000-gallon and 2,000-gallon diesel tank. A leak was reported on September 18, 1986. No cleanup actions were noted. No further information was available from EDR. On December 31, 1993, the RWQCB issued case closure for this issue. Based on this information, the probability of a subsurface environmental impact from this site to the subject site is low.

## 5.2 Local Agency File Review

On July 3, 2012, a Basics representative contacted the California EPA - Department of Toxic Substance Control (CAL EPA DTSC) in Berkeley, California, in regards to any information concerning the subject site.

- **7100-7120 Dublin Boulevard, Dublin CA**  
The subject site.

No information regarding the subject site was available within the CAL EPA DTSC files or EnviroStor online database. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On July 3, 2012, a Basics representative contacted the Alameda County Water District (ACWD) in Fremont, California, in regards to any information concerning the subject site.

- **7100-7120 Dublin Boulevard, Dublin CA**  
The subject site.

No information regarding the subject site was available within the ACWD files. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On July 3, 2012, a Basics representative contacted the Regional Water Quality Control Board (RWQCB) in Oakland, California, in regards to any information concerning the subject site.

- **7100-7120 Dublin Boulevard, Dublin CA**  
The subject site.

No information regarding the subject site was available within the RWQCB files or GeoTracker online database. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On July 13, 2012, a Basics representative reviewed the files maintained by the Alameda County Department of Environmental Health Services (ACDEHS) in Alameda, California, in regards to any information concerning the subject site:

- **7100-7120 Dublin Boulevard, Dublin CA**  
The subject site.

Information from the ACDEHS files revealed records for 7102B Dublin Blvd, 7104 Dublin Blvd, and 7106 Dublin Blvd.

7102B Dublin Boulevard (Park Avenue Cleaners)

The earliest record for this address included a facility inspection dated September 14, 1990. The occupant at the time was noted as Park Avenue Cleaners. Several follow-up inspections were completed between December 28, 1994 and June 4, 1998. Notes from an inspection conducted on September 26, 1997, indicated that the dry cleaners had a storage capacity of approximately 150-gallons for new perchloroethylene (perc) and water in the dry cleaning unit, and 55-gallons for waste perc. Still bottom oil was noted. Also, there were 2 x 55-gallon drums of used cartridge filters. The hazardous waste was reported as being picked up by Technichem Co. of Emeryville. A portion of a Hazardous Materials Business Plan (HMBP) was left at the site for the management to complete.

On April 5, 2002 a hazardous materials inventory was noted for the site. The occupant at the time was Park Avenue Cleaners.

#### 7104 Dublin Boulevard (Kragen Auto Parts)

The earliest record for Kragen Auto Parts included a facility inspection on June 3, 1992. Follow-up inspections were conducted between March 2, 1995 and June 5, 1997. The inspections noted minor violations, and to obtain an EPA ID number in 1995.

On November 4, 1994 and April 14, 1997, HMBP were completed for the site. The 1997 HMBP is included in Appendix B. The owner during these times was noted as CSK Auto, Inc. The 1997 hazardous materials inventory noted maximum daily amounts of: 120-gallons of antifreeze in plastic bottles, 600-gallons of motor oil in plastic bottles, 370-gallons of used motor oil in an above ground storage tank (AST), 40-gallons of sulfuric acid from used automotive batteries, 150-gallons of sulfuric acid from new automotive batteries, 50-gallons of methanol from windshield wiper fluid in plastic bottles, and 0.881 cubic feet of freon in cylinders. The annual waste stream included: 19,240-gallons of used motor oil and 2,080-gallons of used automotive batteries in battery cases.

#### 7104 Dublin Boulevard (Park Avenue Cleaners)

The earliest record for Park Avenue Cleaners at this address included an HMBP dated June 1, 2004. The owner at the time was noted as Jagdeep Brar. The hazardous materials inventory noted a maximum daily amount of: 1 x 200-gallon tank of C10-C13 Isoparaffins (Ecosolv) and 1 x 200-gallon tank of PERC. The annual waste amounts noted were: 50 gallons of Ecosolv and 50 gallons of PERC (See Appendix C).

#### 7106 Dublin Boulevard (Acclaim Print & Copy Center)

The earliest record for Acclaim Print & Copy Center included a facility inspection dated May 31, 2007. Several follow-up inspections were noted through June 11, 2010. No violations were noted.

A hazardous waste manifest was completed on November 16, 2009. The manifest noted 150 pints of waste paint related material (CAL EPA ID: CAL000236102). The transported was noted as Albert Hobson (See Appendix D).

No other information regarding hazardous materials, underground storage tanks or unauthorized releases was reported for the subject site.

On July 18, 2012, a Basics representative reviewed the files maintained by the Dublin Fire Department (DFD) in Dublin, California, in regards to any information concerning the subject site:

- **7100-7120 Dublin Boulevard, Dublin CA**  
The subject site.

Information from the DFD revealed records for 7100, 7102, 7104, 7106, 7110, 7112, 7114 and 7120. The earliest record included a facility map dated 1976. The map noted the following tenants: Kinney Shoes (7100 Dublin Blvd), Consumers Distributing (7102 Dublin Blvd), Kragen (7104 Dublin Blvd), and American Speedy Print (7106 Dublin Blvd).

#### 7100 Dublin Boulevard

The earliest record for this address included a business license for Concord Feed dated March 2, 2010.

#### 7102 Dublin Boulevard

The earliest record for this address included a business permit for Taylor Rental dated September 3, 1986.

#### 7104 Dublin Boulevard

The earliest record for this address included a facility inspection dated August 2, 2005. Several follow-up inspections were noted through August 18, 2011. Only minor violations were noted. The occupant during these times was noted as Park Avenue Cleaners.

Several hazmat permits were also on file from 2005 to 2011. The occupant during these times was noted as Park Avenue Cleaners.

#### 7108 Dublin Boulevard

The earliest record for this address included a facility inspection dated February 18, 2006. Several follow-up inspections were noted through March 9, 2011. Only minor violations were noted. The occupant during these times was noted as Mediterranean Market.

#### 7110 Dublin Boulevard

The earliest record for this address included a facility inspection dated November 10, 1986. Several follow-up inspections were noted through April 5, 2012. No violations were noted. The occupant during these times was noted as Radio Shack.

#### 7112 Dublin Boulevard

The earliest record for this address included a facility inspection dated September 12, 2008. Several follow-up inspections were noted through September 10, 2010. Only minor violations were noted. The occupant during these times was noted as Quiznos.

Inspections from September 28, 2010 through September 13, 2011 noted the occupant as Mr. Pickles. Only minor violations were noted.

#### 7114 Dublin Boulevard

The earliest record for this address included a facility inspection dated May 5, 1982. The occupant at the time was noted as Honey Treat Yogurt Co. No violation was noted.

Follow-up inspections were conducted between April 5, 2006 and April 12, 2012. The occupants were noted as Mane Cuts and later, Beauty Plus Salon.

#### 7120 Dublin Boulevard

The earliest record for this address included a facility inspection dated August 2, 2005. Follow-up inspections were conducted through August 22, 2011. The occupant during these times was noted as Carl's Jr. Only minor violations were noted.

No other information regarding hazardous materials, underground storage tanks or unauthorized releases was reported for the subject site.

On July 18, 2012, a Basics representative reviewed the following files maintained by the Dublin Building Department (DBD) in Dublin, California, in regards to any information concerning the subject site:

- **7100-7120 Dublin Boulevard, Dublin CA**  
The subject site.

Information from the DBD revealed records for 7102, 7104, 7106, 7110, 7112 and 7120. The earliest record included original building plans for Dublin Village Center dated June 1, 1976. The plans noted Krage Auto Parts in unit 7104 Dublin Blvd.

#### 7102 Dublin Boulevard

The earliest record for this address included a permit for a proposed dry cleaners dated July 18, 1990 (7102B Dublin Blvd).

From February 3, 2000 to March 20, 2002, several electrical permits and inspections were completed including the installation of a boiler. The occupant during these times was noted as Park Avenue Cleaners. A site diagram indicating the locations of the boilers and dry cleaning unit can be found in Appendix E.

On September 14, 2004, a demolition permit was issued to demo the interior of 7102B (during the move of Park Avenue Cleaners).

#### 7104 Dublin Boulevard

The earliest record for this address included a permit to install dry cleaning and laundry equipment in this unit, formerly occupied by "Lifestyles." A follow-up inspection was conducted on February 19, 2004 for Park Avenue Cleaners.

#### 7106 Dublin Boulevard

The earliest record for this address included a permit to install a water heater at "Sizes Unlimited," dated in 1990.

#### 7110 Dublin Boulevard

The earliest record for this address included an electrical permit issued to Radio Shack dated in March 27, 2003.

### 7112 Dublin Boulevard

The earliest record for this address included a permit to install a sign for “One Hour Fromex Photo Systems,” dated July 7, 1981. A follow-up inspection was noted on July 17, 1982 with no violations.

On September 8, 1997 a permit for a change in occupancy was issued to Blimpies.

### 7120 Dublin Boulevard

The earliest record for this address included a building permit application for Carl’s Jr. dated December 9, 1975. Several follow-up inspections and permits were obtained through May 5, 1998. The occupant during these times was noted as Carl’s Jr. Only minor violations were noted.

No other information regarding hazardous materials, underground storage tanks or unauthorized releases was reported for the subject site.

## 5.3 Previous Environmental Reports

On July 10, 2012, a Basics representative reviewed the following prior reports provided by the client:

- *Environmental Transaction Screen, 7100-7120 Dublin Blvd, Dublin, California, Basics Environmental (Basics), October 21, 2003 (Basics, 2003b)*
- *Phase 1 Review, 7100-7120 Dublin Blvd, Dublin, California, Basics Environmental (Basics), October 21, 2003 (Basics, 2003a).*

Basics performed a previous Environmental Transaction Screen for The Mechanics Bank on October 21, 2003. According to the report, Basics’ findings indicated the subject site had a history of hazardous materials handling operations utilizing appreciable amounts of hazardous materials (tetrachloroethylene) (from at least 1990 to the 2003) within 7102B Dublin Boulevard as part of past and present onsite dry cleaning operations. As such, Basics recommended a local regulatory agency file review to obtain additional information regarding the hazardous materials handling operations conducted at the subject site.

In response, The Mechanics Bank provided a previous Phase I Environmental Assessment performed by AES on November 9, 2000 (AES 2000) for review.

According to the AES report, Park Avenue Cleaners operated a dry-to-dry solvent cleaning machine on the Property. AES inspected the interior of this suite and found no obvious evidence of illegal dumping or mishandling of dry cleaning solvent. Floor drains were not observed inside the business space. The current owners of the cleaners told AES that approximately 60 or 70 gallons of solvent are used during the year. TechniChem, a licensed hauler, takes waste solvent and filters away from the Property approximately once each month. Copies of hazardous waste manifests, which document the waste removal, are filed with the State of California DTSC, and copies are maintained at the cleaners. The Cal EPA ID number for Park Avenue Cleaners was CAD982429102.

AES observed two 55-gallon steel drums inside the rear of the cleaners. One drum was partially filled with waste solvent and the other was partially filled with filters. Both drums were labeled with hazardous waste stickers. No evidence of spillage was observed around these drums. The owners of the cleaners told AES that a new dry cleaning machine is to be installed during the month of November 2000. Park Avenue Cleaners was reported on regulatory agency databases as a small quantity generator of hazardous waste. This indicated that the cleaners is in compliance with reporting requirements for generation of waste solvent. Complaints or incident reports were not found for the cleaners at the Alameda County Environmental Health Department, the local agency having jurisdiction over dry cleaner operations in the City of Dublin.

Visual observations conducted by Basics within their Environmental Transaction Screen concurred with the observations reported by AES. Therefore, based on the local regulatory agency file review conducted as part of the AES Phase I Environmental Site Assessment (AES 2000) it was Basics' opinion that there were no apparent recognized environmental concerns on the site that warranted further investigation or documentation at that time. However, Basics recommended to (1) provide secondary containment for all hazardous materials storage containers (i.e. dry cleaning machines and containers of solvents) utilized at the subject site; and (2) monitor business activities of the subject site periodically to ensure proper permits and handling procedures for use of hazardous materials are followed according to local regulatory protocols.

In addition, to prevent future environmental liabilities Basics recommended it may be prudent to conduct baseline environmental subsurface sampling to evaluate potential environmental impacts from previous machine shop operations within the warehouse area. Due to the long history (over 10 years) of utilizing appreciable amounts of hazardous materials as part of dry cleaning operations there is still a potential of inadvertent discharges of hazardous materials to the subsurface below even though no obvious recognized environmental condition exists.

## 6.0 CONCLUSIONS AND RECOMMENDATIONS

### 6.1 Conclusions

These conclusions are based on the data collected during performance of this ESA and are therefore subject to the time limitations associated with accessing governmental and site data. The purpose of this assessment was to evaluate the likelihood of soil and ground water degradation as a result of the use, storage, treatment, and/or disposal of hazardous materials/waste on the subject site and sites located within a one-mile radius. Findings are based on a geological and hydrogeological information study, and an evaluation of historical and present property use (historical resource review, regulatory agency database and file review, personal interviews and site reconnaissance study).

#### 6.1.1 Data Gaps

A data gap is the failure to obtain information required by the standard despite good faith efforts by the environmental professional to gather the information. Based on the findings of our investigation, it is our opinion that there are no apparent significant data gaps within the scope of work performed.

#### 6.1.2 Environmental Issues/*De Minimus* Conditions

Based on the latest protocols set forth by ASTM Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E 1527), the new standard identifies that only *de minimus* conditions likely to be subject to government enforcement are to be considered recognized environmental conditions. On the basis of the information compiled and reviewed by Basics, our findings indicate the following *de minimus* conditions:

- (1) In 1976, the subject site was developed with two, one-story commercial buildings (7100 & 7120 Dublin Boulevard), a one-story multi-tenant commercial building, and associated paved parking and landscaped areas. The entire subject site consists of a three building complex “Dublin Village Center” (7100-7120 Dublin Boulevard). Prior to that time, the subject site appeared undeveloped.

7100 Dublin Boulevard

Based on the historical references reviewed, the subject building has been occupied by Kinney Shoes from 1976 to the late 1980s; McClouds Pet Emporium in early 1990s; Corners in the early 2000s; and Concord Feed and Pet Supply from the late 2000s to the present. Based on these listings, the businesses listed do not have an obvious high potential business activity indicative to the storage, treatment or disposal of hazardous or potentially toxic materials.

7120 Dublin Boulevard

Based on the historical references reviewed, the subject building has been solely occupied by Carl’s Jr. Restaurant from 1976 to the late 2000s. The building is currently vacant. Based on the references, the business listed does not have an obvious high potential business activity indicative to the storage, treatment or disposal of hazardous or potentially toxic materials.

7102-7114 Dublin Boulevard

Based on the historical references reviewed, the subject building has been occupied by various commercial retail, grocery and restaurant businesses from 1976 to the present. Based on these listings, the majority of the businesses listed did not appear to have a high potential for business activities indicative to the use, storage and/or treatment of hazardous materials.

However, the following tenants were noted to utilize/ possibly utilize hazardous materials:

Park Avenue Cleaners (formerly located at 7102B Dublin Blvd) – This business unit was previously occupied by Park Avenue Cleaners from 1990 to 2004, operating as a laundry and dry cleaning facility. In 2004, the cleaners moved to the adjacent unit (7104 Dublin Blvd). For further information, see Section 6.1.3 below.

Kragen Auto Parts (formerly located at 7104 Dublin Blvd) – This business unit was previously occupied by Kragen Auto Parts from 1976 to 2004. On April 14, 1997, an HMBP was completed for the site (See Appendix B). The hazardous materials inventory noted maximum daily amounts of: 120-gallons of antifreeze in plastic bottles, 600-gallons of motor oil in plastic bottles, 370-gallons of used motor oil in an above ground

storage tank (AST), 40-gallons of sulfuric acid from used automotive batteries, 150-gallons of sulfuric acid from new automotive batteries, 50-gallons of methanol from windshield wiper fluid in plastic bottles, and 0.881 cubic feet of freon in cylinders. The annual waste stream included: 19,240-gallons of used motor oil and 2,080-gallons of used automotive batteries in battery cases.

Kragen Auto Parts are typically noted to store numerous small containers (1 pint or less) of household automotive supplies (i.e. auto parts, accessories, motor oils, cleaners, etc.) packaged for retail sale within the retail area on shelves and displays. Typical of Kragen Auto Parts stores, waste oil and batteries are reported to be collected, manifested and recycled for customers. Waste oil and batteries are noted to be collected within aboveground storage tanks and recycled by appropriate waste haulers and recyclers. Subsequently, the proper permit, fees, CAL EPA#, etc. are required to be submitted. No reports of major violations, stains, spills or unauthorized releases were noted within the local regulatory agency files reviewed.

Park Avenue Cleaners (7104 Dublin Blvd) – This business unit is currently occupied by Park Avenue Cleaners, and has been utilized as a laundry and dry cleaning facility from 2004 to the present. For further information see Section 6.1.3 below.

Acclaim Print Center (formerly located at 7106 Dublin Blvd) – This business unit was previously occupied by Acclaim Print Center from at least the late 1990s to the early 2010s. A hazardous waste manifest was completed on November 16, 2009. The manifest noted 150 pints of waste paint related material (CAL EPA ID: CAL000236102). The transported was noted as Albert Hobson (See Appendix D). However, no other information regarding the type, quantities or locations of hazardous materials stored onsite was uncovered for this time frame within the scope of work performed.

One Hour Photo/ Presto Prints (formerly located at 7112 Dublin Blvd) – This business unit was occupied by One Hour Photo from at least the early 1980s to the late 1980s, and Presto Prints in the early 1990s. Hazardous materials were most likely utilized as part of onsite operations, however, no specific information regarding the type, quantities or locations of hazardous materials was uncovered for this time frame within the scope of work performed.

Because ultimately it remains the user who accepts the liability for having entered into a chain of title, it remains important that the user recognize that the “risk tolerance” of a regulatory agency could change, as could be the case if information is later uncovered to suggest that the *de minimus* conditions (i.e., those that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies) are of greater significance than once thought.

### 6.1.3 Recognized Environmental Conditions (RECs)

Based on the information compiled and reviewed by Basics, our findings indicate there are possible environmental concerns onsite and recommend further investigation or documentation of the site conditions. To address the issues pertinent to the subject site, Basics recommends:

- (1) Perform subsurface sampling to assess potential environmental impacts from Park Avenue Cleaners (7102B & 7104 Dublin Boulevard).

According to local regulatory agency files reviewed, Park Avenue Cleaners operated a laundry and dry cleaning facility at the address 7102B Dublin Boulevard from 1990 to 2004. The cleaners subsequently moved operations to 7104 Dublin Boulevard (the adjacent unit), and has occupied the business unit from 2004 to the present.

#### 7102B Dublin Boulevard

Park Avenue Cleaners occupied the subject unit from 1990 to 2004. As part of onsite operations, the cleaners utilized perchloroethylene (PERC) in the dry cleaning machining. Notes from an inspection conducted on September 26, 1997, indicated that the dry cleaners had a storage capacity of approximately 150-gallons for new PERC and water in the dry cleaning unit, and a 55-gallon container for waste PERC. Still bottom oil was noted. Also, noted were 2 x 55-gallon drums of used cartridge filters. The hazardous waste was reported as picked up by Technichem Co. of Emeryville. A site diagram indicating the locations of the various machines including the boilers and dry cleaning unit can be found in Appendix E.

#### 7104 Dublin Boulevard

Park Avenue Cleaners has occupied the subject unit from 2004 to the present. Located within the central portion of the suite are two dry cleaning machines. According to discussions with Mr. Major Brar, the southernmost dry cleaning machine utilizes PERC as part of dry cleaning operations. The machine was purchased sometime around 2000 (replacing a similar machine from a different manufacturer), and was moved from the previous location at 7102B Dublin Boulevard to the current suite. In addition, the northernmost dry cleaning machine is noted to utilize hydrocarbon fluid (TL HCS 800) as part of dry cleaning operations, and was purchased around 2005 or 2006. Mr. Brar indicated that hazardous waste is collected and disposed of by Technichem (waste PERC approximately every three months; waste hydrocarbon approximately once per year; and waste water and filters every six months). Visual observations of the dry cleaning areas did not reveal any obvious evidence of major stains or spills. Visual observations of the

concrete floors in the dry cleaning areas did not reveal any obvious evidence of drains, sumps or other conduits to the subsurface.

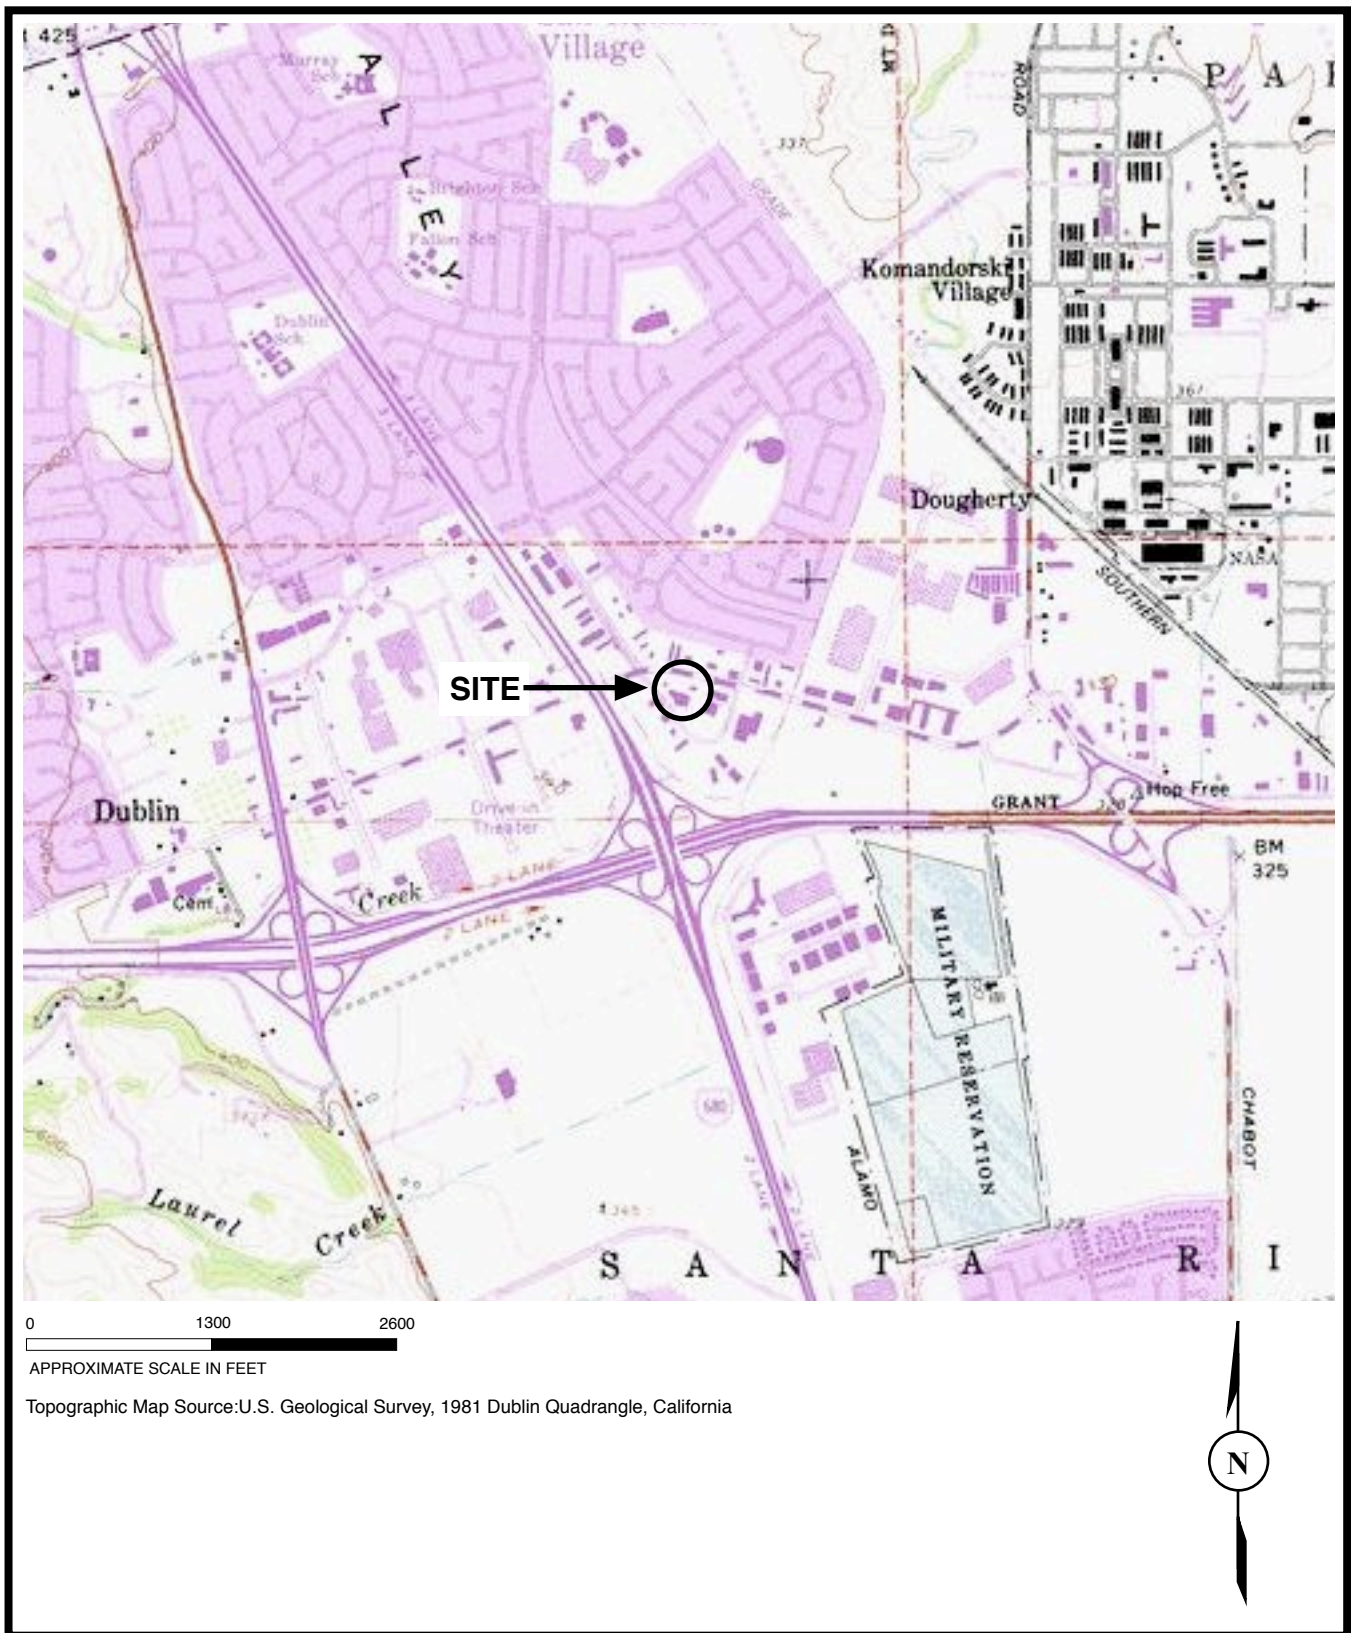

A hazardous materials inventory completed in 2004 noted a maximum daily amount of: 1 x 200-gallon tank of C10-C13 Isoparaffins (Ecosolv) and 1 x 200-gallon tank of PERC. The annual waste amounts noted were: 50 gallons of Ecosolv and 50 gallons of PERC (See Appendix C). According to the information provided by EDR, this site is listed as a small quantity generator of hydrocarbon solvents, solids or sludges with halogenated organic compounds  $\geq 1,000$  Mg./L, and Aqueous solution with total organic residues less than 10 percent (CAL EPA IDs: CAL000297021/ CAL000320965/ CAD982429102). The site is also permitted for air emissions.

The subject site is not currently listed as a contaminated facility. However, it is conceivable that soil and/or groundwater may have been impacted by past and present dry cleaning operations.

Inadvertent discharges of hazardous materials to the concrete porous surface are not always evident. Due to the long history (1990-2004 and 2004 to the present) of utilizing appreciable amounts of hazardous materials as part of dry cleaning operations there is still a potential of inadvertent discharges of hazardous materials to the subsurface below. Years of usage of appreciable amounts (typically 55-gallons or more for over five years or so) plus any conduits to the subsurface (drains, sumps or cracks) increase the potential of inadvertent discharges to the subsurface.

In addition, to prevent future environmental liabilities it may be prudent to:

- Provide secondary containment and spill kits for all hazardous materials storage containers (i.e. dry cleaning machines and containers of solvents) utilized at the subject site; and
- Monitor business activities of the subject site periodically to ensure proper permits and handling procedures for use of hazardous materials are followed according to local regulatory protocols.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

## EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/13/2012 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 06/14/2012 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Local Lists of Registered Storage Tanks***

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 2 HIST UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CORWOOD CAR WASH	6973 VILLAGE PKWY	NW 1/8 - 1/4 (0.233 mi.)	F13	33

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

#### ***Other Ascertainable Records***

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CAMP PARKS MILITARY RESERVATIO		ENE 1/2 - 1 (0.824 mi.)	0	7

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 16 HIST CORTESE sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

Potential Media Affect: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Gasoline  
Site History: Three USTs were removed from the site in 1989. Several subsurface investigations were conducted including monitoring well installations. In 2006, a pilot test was conducted with results that indicate that DPE is a viable remediation technology. A corrective action plan has been approved in January 2009.

Potential Media Affect: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Gasoline  
Site History: Two 10,000 gallon USTs were removed from the site in January 2000. Significantly elevated concentrations of petroleum hydrocarbons were detected in soil and groundwater samples. Between 2000 and 2006, subsurface investigations consisting of soil borings and groundwater monitoring well installations were conducted at the site.

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

**FINDS:**

Registry ID: 110012197041

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

**FINDS:**

Registry ID: 110002734612

**Environmental Interest/Information System**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number: NA  
LOC Case Number: RO0002939  
File Location: Stored electronically as an E-file  
Potential Media Affect: Under Investigation  
Potential Contaminants of Concern: Gasoline  
Site History: In May 2006 one 10,000 gallon gasoline UST was removed from the site. Hydrocarbon contamination was not detected in the soil sample, but was present in the groundwater sample. In September 2008, ACEH sent a letter requesting a soil and groundwater investigation work plan to assess the site.

**FINDS:**

Registry ID: 110002740730

**Environmental Interest/Information System**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

File Location: Stored electronically as an E-file  
Potential Media Affect: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Diesel, Gasoline  
Site History: One 2,000-gallon gasoline underground storage tanks were removed from the site in circa 1989. A Phase II Site Investigation was conducted at the site in December 2003 through January 2004. Groundwater impact was detected from previous release of diesel fuel. Four groundwater monitoring wells were installed in January 2009. Groundwater monitoring is currently being conducted at the site.

Potential Media Affect: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Gasoline  
Site History:

In June 1990, one waste oil UST was removed from the site. In September 1991, three borings (B-1 through B-3), which were converted to groundwater monitoring well MW-1 through MW-3 were installed at the site. Petroleum hydrocarbons were detected in soil and groundwater. In October 1992, seven additional borings, of which three were converted to monitoring wells MW-4 through MW-6, were installed at the site. Elevated concentrations of petroleum hydrocarbons were detected in soil. An SVE pilot test was conducted on November 10, 1992. Results of the SVE test suggested that SVE is a viable remediation technology for the site. In August 1993, six borings (B-11 through B-16) were installed in the vicinity of the USTs and dispensers. Significantly elevated concentrations of TPH-g and benzene were detected in soil samples collected at the site. In February 1994, RESNA conducted air sparging test using helium as a tracer. Based on results, air sparging did not appear to be a viable technology for the site. On July 27, 2001, three USTs were removed from the site. A total of 4,150 tons (approx 3,192 cubic yds) of soil was removed during all over-excavation activities and approximately 25,600 gallon of impacted groundwater was removed from the site. However, significantly elevated residual concentrations of TPH-g and benzene remain at the site in the vicinity of the former USTs.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Latitude: 37.693723  
Longitude: -121.918708  
Case Type: Cleanup Program Site  
Case Worker: JTW  
Local Agency: ALAMEDA COUNTY LOP  
RB Case Number: NA  
File Location: Stored electronically as an E-file  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating  
Site History: Not reported

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/08/2012	Source: EPA
Date Data Arrived at EDR: 05/10/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 5	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810
Date Made Active in Reports: 03/12/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 14	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 04/12/2012
Number of Days to Update: 36	Next Scheduled EDR Contact: 07/23/2012
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/28/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810
Date Made Active in Reports: 03/12/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 14	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/15/2012

Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012  
Date Data Arrived at EDR: 04/04/2012  
Date Made Active in Reports: 05/15/2012  
Number of Days to Update: 41

Source: Environmental Protection Agency

Last EDR Contact: 07/02/2012  
Next Scheduled EDR Contact: 10/15/2012  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/15/2012  
Date Data Arrived at EDR: 04/04/2012  
Date Made Active in Reports: 05/15/2012  
Number of Days to Update: 41

Last EDR Contact: 07/02/2012  
Next Scheduled EDR Contact: 10/15/2012  
Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012  
Date Data Arrived at EDR: 04/04/2012

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/30/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/11/2012
Number of Days to Update: 11	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/30/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/11/2012
Number of Days to Update: 11	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/02/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 04/03/2012	Telephone: 202-267-2180
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 07/02/2012
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Annually

## ***State- and tribal - equivalent NPL***

### RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 06/13/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/14/2012	Telephone: 916-323-3400
Date Made Active in Reports: 07/06/2012	Last EDR Contact: 06/14/2012
Number of Days to Update: 22	Next Scheduled EDR Contact: 08/20/2012
	Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/27/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/27/2011	Telephone: 202-566-2777

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/02/2012	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/13/2012	Telephone: 202-307-1000
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 06/04/2012

	Data Release Frequency: Quarterly

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 08/08/2005  
Date Data Arrived at EDR: 08/03/2006

Data Release Frequency: Varies

## US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## Local Land Records

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/16/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/26/2012	Telephone: 202-564-6023
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 04/30/2012
Number of Days to Update: 80	Next Scheduled EDR Contact: 08/13/2012
	Data Release Frequency: Varies

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 05/21/2012
Number of Days to Update: 31	Next Scheduled EDR Contact: 09/03/2012
	Data Release Frequency: Varies

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 03/12/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 03/13/2012	Telephone: 916-323-3400
Date Made Active in Reports: 04/02/2012	Last EDR Contact: 06/25/2012
Number of Days to Update: 20	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 06/11/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/12/2012	Telephone: 916-323-3400
Date Made Active in Reports: 07/06/2012	Last EDR Contact: 06/12/2012
Number of Days to Update: 24	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Semi-Annually

## **Records of Emergency Release Reports**

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 04/01/2012	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/03/2012	Telephone: 202-366-4555
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 07/02/2012
Number of Days to Update: 72	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Annually

### CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 03/28/2012	Source: Office of Emergency Services
Date Data Arrived at EDR: 05/01/2012	Telephone: 916-845-8400
Date Made Active in Reports: 05/25/2012	Last EDR Contact: 05/01/2012
Number of Days to Update: 24	Next Scheduled EDR Contact: 08/13/2012
	Data Release Frequency: Varies

### LDS: Land Disposal Sites Listing

The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units.

Date of Government Version: 06/14/2012	Source: State Water Quality Control Board
Date Data Arrived at EDR: 06/14/2012	Telephone: 866-480-1028
Date Made Active in Reports: 07/06/2012	Last EDR Contact: 06/14/2012
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/01/2012
	Data Release Frequency: Quarterly

### MCS: Military Cleanup Sites Listing

The State Water Resources Control Board and nine Regional Water Quality Control Boards partner with the Department of Defense (DoD) through the Defense and State Memorandum of Agreement (DSMOA) to oversee the investigation and remediation of water quality issues at military facilities.

Date of Government Version: 06/14/2012	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/14/2012	Telephone: 866-480-1028
Date Made Active in Reports: 07/06/2012	Last EDR Contact: 06/14/2012
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/01/2012
	Data Release Frequency: Quarterly

## **Other Ascertainable Records**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/15/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/04/2012	Telephone: (415) 495-8895

Number of Days to Update: 41	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Varies

## DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 07/29/2011	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/09/2011	Telephone: 202-366-4595
Date Made Active in Reports: 11/11/2011	Last EDR Contact: 05/08/2012
Number of Days to Update: 94	Next Scheduled EDR Contact: 08/20/2012
	Data Release Frequency: Varies

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 04/16/2012
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/30/2012
	Data Release Frequency: Semi-Annually

## FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2009	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 08/12/2010	Telephone: 202-528-4285
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 06/11/2012
Number of Days to Update: 112	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

## CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/01/2011	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 01/25/2012	Telephone: Varies
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 06/27/2012
Number of Days to Update: 36	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Varies

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 02/27/2012	Source: EPA
Date Data Arrived at EDR: 03/14/2012	Telephone: 703-416-0223
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 06/13/2012
Number of Days to Update: 92	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 05/29/2012
Number of Days to Update: 146	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 08/18/2011	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 09/08/2011	Telephone: 303-231-5959
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 06/05/2012
Number of Days to Update: 21	Next Scheduled EDR Contact: 09/17/2012
	Data Release Frequency: Semi-Annually

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 09/01/2011	Telephone: 202-566-0250
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 05/29/2012
Number of Days to Update: 131	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2006	Source: EPA
Date Data Arrived at EDR: 09/29/2010	Telephone: 202-260-5521
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 06/29/2012
Number of Days to Update: 64	Next Scheduled EDR Contact: 10/08/2012
	Data Release Frequency: Every 4 Years

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 05/23/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 05/23/2012

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2008
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 04/30/2012
Number of Days to Update: 77	Next Scheduled EDR Contact: 08/13/2012
	Data Release Frequency: Annually

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/20/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/10/2011	Telephone: 202-564-5088
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/21/2012
Number of Days to Update: 61	Next Scheduled EDR Contact: 10/08/2012
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 04/17/2012
Number of Days to Update: 98	Next Scheduled EDR Contact: 07/30/2012
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 06/11/2012
Number of Days to Update: 60	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/10/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/12/2012	Telephone: 202-343-9775
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 04/10/2012
Number of Days to Update: 49	Next Scheduled EDR Contact: 07/23/2012
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (415) 947-8000
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 06/12/2012
Number of Days to Update: 79	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2009	Source: EPA/NTIS
Date Data Arrived at EDR: 03/01/2011	Telephone: 800-424-9346
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 06/01/2012
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Biennially

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CA BOND EXP. PLAN: Bond Expenditure Plan

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989

Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

	Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 03/31/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/17/2012	Telephone: 617-520-3000
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 05/15/2012
Number of Days to Update: 28	Next Scheduled EDR Contact: 08/27/2012
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011	Source: Environmental Protection Agency

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/21/2012	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/22/2012	Telephone: 860-424-3375

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.  
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

## HAZARDOUS MATERIALS BUSINESS PLAN ANNUAL UPDATE CERTIFICATION FORM

Pursuant to Section 25503.3(c) of the California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted to Alameda County Department of Environmental Health (ACDEH) for the following facility:

Facility Name: Park Avenue Cleaners  
Facility Street Address: 7104 Dublin Blvd City: Dublin  
Date of Current HMBP on File with ACDEH: 2011

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with ACDEH and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Business Activities page; Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. A copy of the revisions are enclosed with this Certification along with a signed Business Owner/Operator Identification page and Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement. The HMBP as revised is complete and accurate and is being implemented.

**OWNER/OPERATOR CERTIFICATION:** I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator (Print): Major Brar Title: Partner  
Phone: 925-480-4134 Signature: [Signature] Date: 3-29-12

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

TYPE OF BUSINESS (e.g., Painting Contractor)	A3	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance)		A4
Dry Cleaners		NA		
THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply)				A5
<input checked="" type="checkbox"/> 1. HAZARDOUS MATERIALS; <input type="checkbox"/> 2. HAZARDOUS WASTES				

**B. INTERNAL RESPONSE**

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply)	B1
<input checked="" type="checkbox"/> 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)	
<input type="checkbox"/> 2. CALLING HAZARDOUS WASTE CONTRACTOR	
<input type="checkbox"/> 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM	

**C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS**

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply)	C1

## D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and preventing and mitigating associated harm to persons, property, and the environment.)

1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC. ;
2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
5. BUILT-IN BERM IN WORK / STORAGE AREA;
6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
8. STOP PROCESSES AND/OR OPERATIONS;
9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
21. OTHER (Specify):

D1

D2

## E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY):

1. BELLS;
2. HORNS/SIRENS;
3. VERBAL (i.e., SHOUTING);
4. OTHER (Specify):

E1

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.)

*Carls Jr. at corner of complex.*

E2

E3

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

EVACUATION ROUTE MAP(S) POSTED AS REQUIRED

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

E4

## F. ARRANGEMENTS FOR EMERGENCY SERVICES

**Explanation of Requirement:** Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following)

1. HAVE BEEN DETERMINED NOT NECESSARY; or
2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F1

F2

## G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. (e.g.,  CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.)

---	-----	--	---

## I. EMPLOYEE TRAINING

**Explanation of Requirement:** Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- |   |  |
|---|--|
| <ul style="list-style-type: none"> <li>• Material Safety Data Sheets;</li> <li>• Hazard communication related to health and safety;</li> <li>• Methods for safe handling of hazardous substances;</li> <li>• Fire hazards of materials / processes;</li> <li>• Conditions likely to worsen emergencies;</li> <li>• Coordination of emergency response;</li> <li>• Notification procedures;</li> <li>• Applicable laws and regulations;</li> </ul> | <ul style="list-style-type: none"> <li>• Communication and alarm systems;</li> <li>• Personal protective equipment;</li> <li>• Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);</li> <li>• Decontamination procedures;</li> <li>• Evacuation procedures;</li> <li>• Control and containment procedures;</li> <li>• UST monitoring system equipment and procedures (if applicable).</li> </ul> |
|---|--|

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply)

<input checked="" type="checkbox"/> 1. FORMAL CLASSROOM, <input type="checkbox"/> 2. VIDEOS; <input checked="" type="checkbox"/> 3. SAFETY / TAILGATE MEETINGS;	J1.
<input type="checkbox"/> 4. STUDY GUIDES / MANUALS (Specify): _____	J2.
<input type="checkbox"/> 5. OTHER (Specify): _____	J3.
<input type="checkbox"/> 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES	

**Large Quantity Generator (LQG) Training Records:** Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.)
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

## J. LIST OF ATTACHMENTS

(Check one of the following) <input checked="" type="checkbox"/> 1. NO ATTACHMENTS ARE REQUIRED; or <input type="checkbox"/> 2. THE FOLLOWING DOCUMENTS ARE ATTACHED:	J1.  J2.
---	----------------

## K. SIGNATURE / CERTIFICATION

**Certification:** Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.
