Re: 640 Brooklyn Avenue, Oakland, California 94606

ACEHD Case No. RO0003114, GeoTracker ID T10000004795

Dear Ms. Detterman:

I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document are true and correct to the best of my knowledge.

Sincerely,

Mr. Jeffrey Jung

April 28, 2015 Project No. 2185-0640-01

Ms. Karel Detterman Alameda County Environmental Health Department 1131 Harbor Bay Parkway, Suite 250 Alameda, California 94502

Subject:

Waste Disposal Report

Casa Amiga Apartments 640 Brooklyn Avenue Oakland, California 94606

Dear Ms. Detterman:

On behalf of Mr. Jeffrey Jung, Stratus Environmental, Inc. (Stratus) has prepared this *Waste Disposal Report*, in response to Alameda County Environmental Health Department (ACEHD) correspondence dated April 16, 2015, requesting documentation of the removal of all investigative and remediation-derived waste related to the Casa Amiga Apartments (the site) located at 640 Brooklyn Avenue, Oakland, California.

### SITE DESCRIPTION

The subject site is located at 640 Brooklyn Avenue in Oakland, California. The site is currently used as a residential apartment complex in a residential neighborhood. The subject site is at an elevation of approximately 95 feet above mean sea level (amsl). Lake Merritt is located 1,200 feet west of the property at an elevation of approximately 4 feet amsl. Groundwater flow in the area appears to be moving west to southwest toward the lake. A site location map and current site plan are shown as Figures 1 and 2, respectively.

### **WASTE DISPOSAL ACTIVITIES**

One underground storage tank (UST) was discovered to exist beneath the sidewalk along Brooklyn Avenue in front of the subject site during a Phase I environmental site assessment. Golden Gate Tank Removal, Inc. (GGTR) was retained to excavate and remove the UST from the subject site. Excavation began in February 2013, and after overburden soil was removed from the area and stockpiled, a 750-gallon UST containing

Ms. Karel Detterman, ACEHD Waste Disposal Report Casa Amiga Apartments, 640 Brooklyn Avenue, Oakland, CA Page 2 April 28, 2014 Project No. 2185-0640-01

residual diesel fuel was observed. The UST was situated 8 feet below ground surface (bgs) at bottom, measured 8 feet in length by 4 feet in width, and was constructed of single-wall bare steel. Approximately 350 gallons of waste water was generated from triple rinsing the UST. Rinse water was disposed of on February 14, 2013, at an approved disposal facility. The UST was subsequently transported to Circosta Iron & Metal, Inc. in San Francisco, California, for disposal and recycling. On March 27, 2013, approximately 7.85 tons of over-excavated soil was transported to Vasco Road Landfill Facility in Livermore, California, for proper disposal. Groundwater was not encountered at any point during the excavation.

On February 20 and 21, 2014, Stratus personnel supervised the advancement of four soil borings (SB-1 through SB-4) using direct push technology so minimal waste was produced. Soil cuttings generated during drilling activities were placed in a properly labeled, DOT-approved, 55-gallon steel drum and removed from the site on February 27, 2014, by IWM of San Jose, California, for proper disposal at a licensed facility.

Documentation of disposal for the 750-gallon UST, rinse water, over-excavated soil, and investigative derived waste is provided in Appendix A.

#### **LIMITATIONS**

This report was prepared in general accordance with accepted standards of care that existed at the time this work was performed. No other warranty, expressed or implied, is made. Conclusions and recommendations are based on field observations and data obtained from this work and previous investigations. It should be recognized that definition and evaluation of geologic conditions is a difficult and somewhat inexact science. Judgments leading to conclusions and recommendations are generally made with an incomplete knowledge of the subsurface conditions present. More extensive studies may be performed to reduce uncertainties. This report is solely for the use and information of our client unless otherwise noted.

# APPENDIX A WASTE DISPOSAL DOCUMENTATION

## **CERTIFICATE OF DISPOSAL**

DATE:

February 19, 2013

PROJECT NUMBER:

9325

PROJECT ADDRESS:

640 Brooklyn Avenue, Oakland, CA 94606

TANK SIZE:

750 gallons

**ORIGINAL TANK CONTENTS:** 

Diesel

Golden Gate Tank Removal, Inc. hereby issues CERTIFICATION that:

- This tank was cleaned by triple rinsing. The rinsate was sampled and analyzed for Total Petroleum Hydrocarbons and found to be below the City of Oakland limit of 100 parts per million allowable for disposal as scrap metal.
- The Oxygen content of the Tank was 20.9%
- The Lower Explosive Limit was 0%
- The above tank was rendered harmless by cutting and disposed of as scrap metal at Circosta Iron and Metal, Inc.
- The above method of tank destruction is suitable for the materials involved and is accepted by the City of Oakland and County of Alameda as an appropriate disposal method.

Copies of the analytical certificate the chain-of-custody prepared for the rinsate sample and the scrap metal receipt are attached to this Certification. If there are any questions regarding this tank, please contact this office.
