Phone call taken care of today -

Concerning case RO281 and related case RO3140. Richard from Emcon ([richardk@emconsolutions.com](mailto:richardk@emconsolutions.com) and 213-380-0555) had a question regarding when ACEH transferred oversight of the case to the RWQCB. I told Richard that ACEH still maintains the lead, we are pursuing case closure on RO281 (having issued public participation letters for the early 1990 release), and on-going investigation for RO3140.

Richard's query stemmed from different regulatory environments in LA County: Soils only cases stay with the LOP program, once groundwater is impacted the Water Board takes the lead. He understands now that SF Bay water board and the LOPs here handle cases differently.

Emcon is working on behalf of Delong Liu to perform a Phase 1 for property refinance and is creating a summary of work performed. For this history, I directed Richard to GeoTracker to get the NOR for further site ownership and history.

Hope this summary helps,  
Matt
