

**INVITATION TO COMMENT – POTENTIAL CASE CLOSURE**

**ADELINE FOUNDRY  
3037 – 3115 ADELINE STREET, OAKLAND, CA  
SITE CLEANUP PROGRAM CASE RO0003142  
GEOTRACKER GLOBAL ID T10000006053**

**March 10, 2017**

The above referenced site is a Site Cleanup Program (SCP) case that is under the regulatory oversight of the Alameda County Department of Environmental Health (ACDEH) for the investigation and cleanup of a release of petroleum hydrocarbons and metals from a former bronze metal foundry. Site investigation and cleanup activities have been completed and it does not appear that residual contamination presents a risk to human health and the environment. Therefore, ACDEH is considering closure of the case. Due to the residual contamination on site and a vapor mitigation system, the site would be closed with site management requirements that requires annual inspections and reporting and further evaluation if the site is to be redeveloped in the future.

This notice is being sent to the current occupants and landowners of adjacent properties and known interested parties for this site. The public is invited to review and comment on the potential closure of the case. The entire case file can be viewed over the Internet on the ACEH website (<http://www.acgov.org/aceh/lop/ust.htm>) or the State of California Water Resources Control Board GeoTracker website (<http://geotracker.waterboards.ca.gov>). Please send written comments to Mark Detterman at ACDEH, 1131 Harbor Bay Parkway, Alameda, CA 94502; all comments will be forwarded to the responsible parties. Comments **received by April 16, 2017** will be considered and responded to prior to a final determination on the proposed case closure.

If you have comments or questions regarding this site, please contact the ACDEH caseworker, Mark Detterman at 510-567-6876 or by email at [mark.detterman@acgov.org](mailto:mark.detterman@acgov.org). Please refer to ACDEH case RO0003142 in any correspondence.
