Subject: RE: Four Season's Cleaners Extension Request

Forrest and Bill,

An extension until March 4th for the report is reasonable in order to incorporate the additional site layout and added utility details. I have updated Geotracker to reflect this; however, as discussed in the February 10th directive letter, please forward the preliminary analytical results as they come in (upon receipt). These submittals are overdue. A simple sketch map of sample locations is also appropriate. This will help ACEH's review of the data and help determine next steps at the site.

Subject: Four Season's Cleaners Extension Request

Hi Mark,

Bill Dugan of WellTestasked me to email you to request a small extension on the indoor air sampling report for the Four Seasons Cleaners site at Doolittle Road in San Leandro. The reason for the request is we were not able to get access to one of the units until a couple of days ago. However, we did gain access to that unit on Tuesday and it has now been sampled. We will have the results of the sampling by the middle of next week and therefore are requesting an extension of the report deadline until March 4th. That will give us enough time to get all of our data together and provide a detailed map of the adjoining tenant spaces.

If you have any questions, please feel free to contact either myself or Bill Dugan directly.

Thank you,

Forrest Cook, PG
