Keith,

I was assuming that you would be there since you have dug into the data more than Dilan at this point, but I don't know how Dilan tends to work on these projects. We would like to come to some resolution on both the lead impacted and the formerly closed UST case portion of the site. It seems like we have enough data to document that the site is acceptable for residential development. We are just trying to get to closure. Your help clarifying what additional information or clarification of the information you have is needed and I can make sure you and Dilan have it before our meeting.

Thanks

Angus.
