Subject: francis plating site: your phone call

Tom:

We received your phone message and inquiry regarding an extension for the sampling. I do not see a problem with pushing out sample collection until the SCAP funding is in place; however, we need a brief statement that includes rationale supporting the request and a proposed date for the work. In this instance, your rationale could reference the 2013 VI investigation findings and the 2016 groundwater data.

In addition, for the purpose of continuing progress toward no further action status, I suggest that a brief summary of the meeting outcome and anticipated future steps be prepared and included in the project files. Schedules for ongoing work including site inspections and groundwater monitoring are included in a typical summary.

Thank you,
Bob
