Dear Mr. Muir:

Professional Service Industries (PSI) is pleased to transmit the waste manifest for the disposal of investigative waste (soil cuttings) from the subject site. During our field exploration at the subject site performed on July 29, 2015 (see the referenced report), soil cuttings from the drilling activities were stored on site in a 55-gallon drum, which was labelled with the contents, date and project information. As requested and authorized by you, PSI arranged for the pick-up, transport, and proper disposal of the waste. Our subcontract waste disposal firm, NRC Environmental Services, picked up the waste on November 11, 2015. A copy of the manifest for the waste disposal is included as an attachment – this document is evidence for you (and for anyone who might ask) to show that the waste was disposed of properly.

Please feel free to call me at (510) 434-9200 x19 with any questions you may have.

Sincerely,

Brand Burfield
Project Geologist, PG No. 6986
