Subject: Voluntary Cleanup Case R00003181, Site Visit and Work Plan for GIG Facility, 8467 Patterson Pass Road, Livermore
Date: Wednesday, August 19, 2015 3:33:00 PM

Jennifer,

Thank you for meeting me at the GIG Facility today and providing background information regarding the aboveground tank removal and observed soil contamination. As we discussed today, Alameda County Environmental Health is requesting that a Work Plan to delineate the extent of contamination be submitted no later than September 18, 2015. The Work Plan is to be prepared by a California-licensed Engineer or Geologist. The Work Plan should at a minimum include a site history, description of conditions, and plans to delineate the extent of soil contamination in the area of the former tank. Groundwater sampling will be required at some point in the investigation. Therefore, please consider including groundwater sampling in the Work Plan in order to minimize mobilizations to the site.

Regards,

Jerry Wickham
