**Subject:** RE: E&B's GIG Excavation Analytical Report

Ms. Brady and Mr. Monroe:

Alameda County Department of Environmental Health (ACDEH) has reviewed the analytical laboratory results of confirmation samples and proposed backfill material collected in April 2016 during implementation of additional soil excavation activities at the subject property. Based on the analytical results of the proposed backfill material ACDEH has no objections to using the material as backfill provided that plastic sheeting is placed between the clean fill and oil impacted soil to delineate where future excavation is to be conducted in the vicinity of the power pole.

Please note, a review of the GeoTracker database and Alameda County's ftp site indicate the Soil Excavation and Backfill Report has not been submitted to ACDEH for review by the requisite compliance date of May 27, 2016 and thus you are currently out of compliance with the directives in ACDEH's letter dated March 29, 2016. Please provide a status update of when this report will be submitted.

Thank you,

**Dilan Roe, P.E.**

Dilan,

Attached table with ESLs based on third revision. Couple of changes in the metals from previous table, please observe footnotes.
