Hi Joy,

A two week extension is definitely reasonable due to the recent arrival of the analytical data. I've updated Geotracker to reflect this. Should you need to document the extension this email will be sufficient.

Thank you.

Subject: RO3185 - Horton Street UST, Emeryville, CA

Mark,

EKI recently completed additional investigation activities for the Horton Street UST in Emeryville, CA in accordance with an ACDEH approved work plan. ACDEH requested the site investigation report be submitted by March 3, 2017. I'd like to request a two week extension and submit the report by March 17, 2017 as the electronic data was just received from the lab at the end of last week.

Please confirm if this request for extension is approved.

Thanks,
Joy
