Just to clarify we will be sampling as we excavate as required by the receiving facility. We collectively decided that we would spend the money once the construction loan is in place next month. Thanks.

Mark –

We will not be moving ahead with this additional sampling at this time.

Thanks,
Divya

Divya and Shawn,

I just received notice that a drilling permit has been requested for an additional 10 soil bores at the subject site and have approved the permit. It is the understanding that the additional information was requested for landfill characterization purposes. As a consequence, I had previously communicated with Kirsten Gates that the additional work would be acceptable provided the data was incorporated in to the final report. Prior to undertaking the work, and in order to keep apprised of the scope of work, ACDEH requests a brief letter and figure communicating the rationale and the placement of the bores, and the analytical work included in the scope of work. To ensure no surprises are not communicated expeditiously to ACDEH, please additionally tabulate the results and submit the data to ACDEH upon completion of the work.

Thanks,
