Hi Anne,

The proposed Boring B-6 can be considered a grab groundwater sample point, located in the basement of the building. This grab groundwater sample point is referenced as Bullet Item #7 on Page 13 of Narrative. Although "B-6" was not referenced, we proposed a boring at this location just in case the water level was lower than the basement slab floor at the time of sampling, and concrete coring and hand auger drilling may be necessary to recover sample.

Please contact us with any further questions.

Thank you,

Brent

Hi Brent,

I've reviewed the work plan and have a quick question. I notice that in Figure 3 of the site plan there is a B-6 borehole in the southeast corner of the site that I don't see referenced anywhere else in the report. Is that an error on the figure? Please let me know. Thank you.

On behalf of Mercedes-Benz of Oakland, Wheeler Group Environmental, LLC has uploaded a PDF copy of its March 17, 2017 Site Investigation Work Plan for the subject property to the Alameda County DEH's FTP website. A copy has also been uploaded to the State GeoTracker Database. We have attached a PDF copy of the Site Investigation Work Plan to this email for client distribution.

Please contact us with any questions.
