Phone call with Alan Statman (former Trustee to the site). The following items were discussed:

- Inquired from him as to what happened to the dry cleaning equipment and associated chemicals at the site. Were there waste manifests or records of the removed equipment available? He indicated that he had no knowledge of any of the information asked and that the property was sold “as is”. He asked me to inquire further from the agent that sold the property (Gary Robinson – 510-914-6531)
- He was also going to forward me the Phase I, and any other environmental documents that he has on file.
