1 EXECUTIVE SUMMARY

ADR Environmental Group, Inc. (ADR) was retained by Citibank, N.A. to perform a Phase I Environmental Site Assessment (ESA) for the site located at 25673 Nickel Place in Hayward, California (subject Property). At the time of the subject Property, the subject Property consisted of two contiguous irregular-shaped parcels of land totaling approximately 0.69 acre irregular-shaped that is developed with a single-story light-industrial building totaling approximately 13,120 square feet. The subject Property was occupied by Haig's Delicacies, a food processing and packaging business specializing in Mediterranean products. The remaining portion of the subject Property consists of asphalt- and concrete-paved parking areas and drives, a railroad spur, and modest landscaping. Vehicle access onto the subject Property is provided by one driveway off Nickel Place to the north and from a shared driveway and parking area to the east. At the time of the site inspection, the subject Property appeared in good condition and well maintained. The subject Property is located in a light-industrial and commercial area of Hayward.

From a review of available historical information, it can be concluded that from as early as 1939 until the late 1970s, the subject Property was structurally undeveloped land. Between 1966 and 1974, a railroad spur was constructed on the southern portion of the subject Property. In 1979, the subject Property was developed with the light-industrial building and associated parking area observed during the site inspection. Since its construction, this subject Property has been occupied by a trade school (1982), printing company (1982), golf club manufacturing operation (1982-2000), countertop manufacturing operation (2001-2005), and a food processing and packaging business (2008 to present). In 1939, all adjoining properties were structurally undeveloped land with the exception of the eastern adjoining property, which was occupied by a barn or similar agricultural structure. Agricultural development (pasture or grain) was to the north and east. Sometime between 1966 and 1974, the present-day railroad spur was built along the southern boundary of the subject Property and light-industrial structures were built to the northwest, west, south, and east. By the early 1980s, Nickel Place and the light-industrial structures on the northern and eastern adjoining properties were built. By 1993, the commercial structure observed on the western adjoining property was completed. Since sometime between 1966 and 1974, the southern adjoining property beyond the railroad spur has been used as an exterior storage yard for operations further to the southeast.

This ESA was performed in conformance with the scope and limitations of ASTM International (ASTM) Standard Practice E 1527-13 and the scope of services identified in the *Master Agreement for Consulting Services* document dated January 26, 2012, between Citicorp North America, Inc. and ADR. This ESA has identified no evidence of recognized environmental conditions, as defined by ASTM, in connection with the subject Property with the exception of:

- Based on historical information, the subject Property has been utilized for light-industrial operations from 1975 to the present. From at least the mid-1980s to 2000, the Orlimar Golf Co. operations included the use and storage of hazardous materials (i.e., petroleum products, lacquer thinner, and halogenated solvents), the operation of a degreaser, and the generation of hazardous waste as a function of their business. There are potential environmental risks associated with these operations including the release of hazardous materials to the subsurface during a time of lesser environmental awareness. Inspection reports from the 1980s and 1990s indicated that these materials were stored inside and outside the subject Property building and did not have secondary containment. As a result, ADR

recommends a subsurface investigation to determine if the past tenants have environmentally impacted the subject Property.

In addition, the following business risk was identified:

- A railroad spur traverses the southern portion of the subject Property, although does not service the subject Property. This spur has been present from sometime between 1966 and 1974 and services properties to the east and west of the subject Property. No evidence of staining or hazardous materials was observed in the area of the railroad spur. Railroad spurs can present an environmental concern due to chemicals associated with train operations, railroad ties, and track maintenance. However, based on the current industrial or commercial use of the subject Property, and the expected low volatility and mobility of the any potential contaminants, the potential impact to the subject Property appears limited. Therefore, ADR recommends no further action or investigation at this time. However, in the event of future subsurface work (i.e., trenching, redevelopment) at the area of the spur, the encountered soils should be sampled, and if identified to contain elevated levels of suspected contaminants, should be handled in accordance with all applicable regulations.

Lastly, the following non-ASTM scope environmental concern was identified:

- At the time of the site inspection, the following suspect asbestos-containing materials (ACMs) were observed on the subject Property: drywall/joint compound, vinyl floor products and associated mastic, suspended acoustic ceiling tile, and roofing materials. No significant damage to the suspect materials was observed during the site inspection was observed. Pursuant to federal and state regulations, all suspect ACMs should either be presumed to contain asbestos or adequate rebuttal sampling should be conducted by an accredited Building Inspector prior to renovation, including maintenance or demolition, if these activities will disturb the material(s).

2 INTRODUCTION

2.1 Purpose

The purpose of this ESA is to identify recognized environmental conditions in connection with the subject Property. The term *recognized environmental conditions*, as defined in *ASTM Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process* (ASTM Standard Practice E 1527-13) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. In addition, this ESA will identify *historical recognized environmental conditions*, *controlled recognized environmental conditions* and *business environmental risks*. A *historical recognized environmental condition* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. A *controlled recognized environmental condition* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. A *business environmental risk* is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate but is not considered a *recognized environmental condition*.

This ESA was performed in a manner that complies with Scope and Limitations of the ASTM Standard Practice E 1527-13, and ADR's contractual obligations to Citibank, N.A., identified in the Master Agreement for Consulting Services document dated January 26, 2012, between Citicorp North America, Inc. and ADR.

The procedure for this ESA was to perform in practical and reasonable steps an investigation to ascertain the possibility, presence, or absence of recognized environmental conditions as delineated by the Scope of Work. This was accomplished by employing currently available technology, existing regulations, and generally acceptable engineering practices.

2.2 Significant Assumptions

The following assumptions are made by ADR in this report. ADR relied on information derived from secondary sources including government agencies, the client, designated representatives of the client, property contacts, property owner, property owner's representatives, computer databases, and/or personal interviews. Except as set forth in this report, ADR has made no independent investigation as to the accuracy and completeness of the information derived from secondary sources including the government agencies, the client, designated representatives of the client, property contacts, property

owner, property owners representatives, computer databases, and/or personal interviews and has assumed that such information is accurate and complete. ADR assumes information provided by or obtained from government agencies including information obtained from government websites is accurate and complete. Groundwater flow and depth to groundwater, unless otherwise specified by on-property well data or off-site subsurface investigation, are assumed based on contours depicted on the United States Geological Survey topographic maps. ADR assumes the subject Property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and/or property owner's representative.

2.3 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in the methodologies referred to in ASTM Standard Practice E 1527-13 that are intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property. Other specific limitations and exceptions (also known as Data Gaps) to the ESA are more specifically set forth below:

- Title records were not provided to ADR for review.

ADR believes that the Data Gap identified above has a low potential to affect the conclusions and recommendations of this report.

2.4 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard Practice E 1527-13 and the *Master Agreement for Consulting Services* document. ADR warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.5 Environmental Assessment Report Special Terms and Conditions

This ESA was performed in accordance with the Scope of Services set forth in the contract document. No other warranty or guarantee, expressed or implied, is made or offered.

The conclusions and recommendations (if applicable) stated in this ESA are based upon observations made by employees of ADR and also upon information obtained by ADR. While reasonable attempts have been made to verify this information, we cannot guarantee its accuracy.

The observations contained within this ESA are based upon site conditions readily visible and present at the time of our site inspection. These site observations are unable to specifically address conditions of subsurface soil, groundwater, or underground storage tanks, if applicable, unless specifically mentioned.

2.6 User Reliance

The enclosed ESA has been performed for the exclusive use of Citibank, N.A. and/or its subsidiaries, as their interest may appear, for the transaction at issue concerning the subject Property located at 25673 Nickel Place in Hayward, California.

2.7 General Information

Ms. Rita Takvorian, owner and familiar with the subject Property since 2008, was identified as the "Key Site Manager." The Key Site Manager is that person having the most reliable knowledge as to the previous uses and current conditions of the subject Property, and in a position to provide reasonably accurate information for the Environmental Site Assessment Questionnaire (Questionnaire). Ms. Takvorian completed the ESA Questionnaire subsequent to the site visit. A completed copy of the Questionnaire is included in the appendix of this ESA report.

Mr. Steven P. Ashe, Environmental Assessor with ADR, conducted the on-site inspection on September 14, 2016. The ADR Assessor was accompanied by Ms. Lisa Dinis, Quality Assurance Manager with Haig's Delicacies, during the site inspection. Weather conditions for the site inspection consisted of clear skies with temperatures in the 60s.

The following individuals were interviewed to obtain information relevant to the historical development and/or issues associated with possible recognized environmental conditions associated with the subject Property.

Name	Title or Position/Employer
Ms. Rita Takvorian	CEO/Haig's Delicacies
Ms. Lisa Dinis	Quality Assurance Manager/Haig's Delicacies
Ms. Liang Yu Ma	Records/Department of Toxic Substances Control
Ms. Rochelle Reed	Records/Bay Area Air Quality Management District
Ms. Melinda Wong	Records/Regional Water Quality Control Board
Ms. Alicia Foott	Records/Alameda County Department of Environmental Health

3 USER PROVIDED INFORMATION

Ms. Takvorian was identified as the best candidate to complete the User Questionnaire. The User is defined by ASTM Standard Practice E 1527-13 as the party seeking to use this ASTM Practice to complete an environmental assessment of a property. The User Questionnaire consists of inquiries as to specific knowledge regarding the purchase of a site as specified by ASTM Standard Practice E 1527-13. This knowledge consists of environmental liens against the subject Property, purchase price, limitations at a site, and spills. A copy of this Questionnaire is included in the appendix.

3.1 Title Records

Title records were not provided to ADR to review.

3.2 Environmental Liens or Activity and Use Limitations (AUL)

Ms. Takvorian is not aware of any environmental liens or AULs such as engineering controls, land use restrictions, or institutional controls associated with the subject Property.

3.3 Specialized Knowledge

Ms. Takvorian has no specialized knowledge of the operations associated with the subject Property in relation to past chemicals used on-site.

3.4 Commonly Known or Reasonable Ascertainable Information

Ms. Takvorian is unaware of commonly known and reasonably ascertainable information for the environmental issues associated with the subject Property.

3.5 Valuation Reduction for Environmental Issues

Ms. Takvorian indicated that the purchase price for the subject Property reasonably reflects the fair market value of the property.

3.6 Owner, Property Manager, and Occupant Information

The following information regarding the Owner, Property Manager and Occupants was provided by the User and Key Site Manager.

Owner:	Ms. Rita Takvorian
Property Manager:	Ms. Rita Takvorian
Occupants:	Haig's Delicacies, a food processing and packing business

3.7 Reason for Performing ESA

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard Practice E-1527-13) in connection with the subject Property. This ESA was also performed to permit the *User* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard Practice E-1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35) (B).

ADR understands that the findings of this study will be used by Citibank, N.A. to evaluate a pending financial transaction in connection with the subject Property.

4 GENERAL SITE CHARACTERISTICS

4.1 Location and Legal Description

The subject Property is located at the following address: 25673 Nickel Place in Hayward, California, and its location is shown on maps included in the appendix. In addition, an aerial site plan of the subject Property is included in the appendix.

For further geographic reference, the subject Property is located approximately 490 feet south of the intersection of Nickel Place and Enterprise Avenue as identified on the Alameda County Assessor's Parcel Map. A copy of this map is included in the appendix.

Legal Description:

Lot 5, Track 4112, filed May 25, 1979, Map Book 110, Page 68, Alameda County Records.

4.2 Site and Vicinity Characteristics

At the time of the site visit, light-industrial and commercial properties occupied the general area surrounding the subject Property. An active railroad spur line is along the southern boundary. Commercial/light-industrial structures are to the north and west. A truck and trailer storage area is to the west. The storage yard for a crane business is to the south. No gas stations, dry cleaners, major manufacturing, or heavy industrial facilities, were located in the immediate vicinity of the site. No pits, ponds, lagoons, or wetlands were observed on the subject Property or in the general vicinity.

4.3 Site Description and Current Site Uses/Operations

At the time of the subject Property, the subject Property consisted of two contiguous irregular-shaped parcels of land totaling approximately 0.69 acre irregular-shaped that is developed with a single-story light-industrial building totaling approximately 13,120 square feet. The subject Property was occupied by Haig's Delicacies, a food processing and packaging business specializing in Mediterranean products. The remaining portion of the subject Property consists of asphalt- and concrete-paved parking areas and drives, a railroad spur, and modest landscaping. Vehicle access onto the subject Property is provided by one driveway off Nickel Place to the north and from a shared driveway and parking area to the east. At the time of the site inspection, the subject Property appeared in good condition and well maintained.

4.3.1 Surface Characteristics

The subject Property consists of approximately 95 percent relatively impermeable surfaces including the building and asphalt and concrete paved areas. The remaining portion of the subject Property's surface consists of a railroad spur and landscaped areas. No significant surface staining was observed on the subject Property during the site inspection. The overall topography of the subject Property appears to slope to the southwest.

4.3.2 Structure Construction

At the time of the site inspection, the subject Property was developed with a light-industrial building. The exterior walls of the structure are concrete tilt-up panels, with roll-up doors and commercial glass set on concrete footings. The flat roof is covered with built-up roofing. Interior office partitions are framed and are covered with gypsum board or institutional wall panels. Finished office ceilings are gypsum board or acoustic ceiling tiles. The warehouse area ceilings are exposed steel beam trusses. Office floor coverings consist of carpet and vinyl flooring. The warehouse area of the structure has finished concrete floors. Fluorescent fixtures provide lighting in the building.

4.3.3 Interior Configuration

The light-industrial structure is divided into a front office and reception area, dry storage areas, food processing and assembly areas, cold storage areas, and restrooms.

4.3.4 Potable Water Supply, Sewer, and Natural Gas Service

At the time of the site inspection, the City of Hayward provided potable water service and sanitary sewer service to the subject Property. During the course of the on-site inspection, no evidence of active or abandoned water supply wells or septic systems were observed on the subject Property. In addition, Pacific Gas & Electric provides electricity and natural gas service to the subject Property for electrical power, heating and hot water.

Since the subject Property is serviced by a municipally operated, public water system, it is regulated by the Safe Drinking Water Act of 1974. This Act requires that public water supplies be tested for the presence of various metals, microbiological bacteria and organic chemicals. Information supplied by the City of Hayward states that the water quality delivered to the subject Property complies with applicable regulatory requirements and the water is routinely tested.

4.4 Environmental Liens

A specific search for Environmental Liens and Activity and Use Limitations was not included in the scope of this ESA. However, based on information obtained from the Key Site Manager, User and the Environmental Data Resources (EDR) Radius Map Report, no evidence of environmental liens recorded against the subject Property was found. In addition, according to the EDR-provided information for the subject Property, no evidence of institutional controls, land use restrictions and/or engineering control requirements recorded against the subject Property were reported.

4.5 Current Site Uses

At the time of the site inspection, the subject Property was occupied by Haig's Delicacies, a food processing and packaging business specializing in Mediterranean products. According to information obtained from the City of Hayward Planning Department, the subject Property is zoned industrial (I).

4.6 Physical Setting Sources

The subject Property's physical location was researched employing the current United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad Map) section relevant to the subject Property. The Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features such as wetlands, water bodies, roadways, mines, and buildings. A portion of this map showing the subject Property is included in the appendix of this ESA.

The Hayward, CA Quad Map (dated 1996) shows the following physical features: the subject Property and adjoining properties are identified as urban land (gray shaded); the present-day roadway system is identified; a railroad spur line is along the southern boundary; State Route 92 is approximately 1,500 feet southeast; a marshy area is approximately 2,000 feet southwest; a sewer treatment facility is approximately 2,000 feet northwest; a railroad right-of-way is approximately 2,000 feet northeast; and salt evaporating ponds are approximately 1 mile northwest and southwest. No wetlands, aboveground storage tanks, mines, or landfills were noted in the immediate area of the subject Property. The elevation of the subject Property is approximately 15 feet above mean sea with a topographic gradient to the southwest.

4.6.1 Soil Conditions

According to information provided by the United States Department of Agriculture (USDA) Soil Conservation Service (SCS), the soil underlying the subject Property is identified as Willows clay. The Willows soil is a very deep, poorly drained soil on basin rims. It formed in alluvium that derived mainly from sedimentary rocks. Typically, the surface layer is black, moderately alkaline clay about 19 inches thick. The next layer is a mottled, dark gray, moderately alkaline clay about 10 inches thick. The underlying material consists of mottled, grayish brown, calcareous clay and extends to a depth of more than 60 inches. Permeability is very slow.

It should be noted that the characterization previously described is extrapolated from available regional soil data. In actuality, the subsurface of the subject Property has likely been modified by cuts and fills for building foundations and underground utilities.

4.6.2 Geologic Conditions

According to the 1979 United States Geologic Survey Professional Paper 947, *Flatland Deposits of the San Francisco Bay Region, California, Their Geology and Engineering Properties and Their Importance to Comprehensive Planning*, prepared by E. J. Helley and K. R. Lajoie, the Hayward area lies on the eastern side of the San Francisco Bay Area. The San Francisco Bay Area region has been subject to tectonic evolution during most of the Cenozoic Era as the ancestral California Margin underwent transition from a convergent to a transform plate margin. This transition continues today due to the San Andreas Fault system. Crustal blocks that now comprise the San Francisco Bay Area appear to have been divided into smaller sinking areas that formed basins and embayments, interspersed with areas of uplift that formed highland areas. Clay, silt, and sand eroded from these upland areas were deposited on alluvial fans or beneath the sea in the subsided structural basins. To further complicate the history, the positions of the basins and uplands shifted from time to time, and areas that had been basins of sediment accumulation were uplifted and vice versa.

4.6.3 Groundwater Conditions

Site specific groundwater information was not available for the subject Property. However, information obtained from the State Water Resources Control Board's *GeoTracker* website (www.geotracker.swrcb.ca.gov) for the closest site with available groundwater data (Runnels Site at 3590 and 3636 Enterprise Avenue approximately 750 feet northeast) indicates groundwater has been reported at a depth's between 5 and 8 feet below ground surface (2010 data). Based on the general topography of the area, the groundwater flow direction is likely to the southwest.

It should be noted that estimated groundwater levels may vary due to fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

5 HISTORICAL USE INFORMATION

From a review of available historical information, it can be concluded that from as early as 1939 until the late 1970s, the subject Property was structurally undeveloped land. Between 1966 and 1974, a railroad spur was constructed on the southern portion of the subject Property. In 1979, the subject Property was developed with the light-industrial building and associated parking area observed during the site inspection. Since its construction, this subject Property has been occupied by a trade school (1982), printing company (1982), golf club manufacturing operation (1982-2000), countertop manufacturing operation (2001-2005), and a food processing and packaging business (2008 to present). In 1939, all adjoining properties were structurally undeveloped land with the exception of the eastern adjoining property, which was occupied by a barn or similar agricultural structure. Agricultural development (pasture or grain) was to the north and east. Sometime between 1966 and 1974, the present-day railroad spur was built along the southern boundary of the subject Property and light-industrial structures were built to the northwest, west, south, and east. By the early 1980s, Nickel Place and the light-industrial structures on the northern and eastern adjoining properties were built. By 1993, the commercial structure observed on the western adjoining property was completed. Since sometime between 1966 and 1974, the southern adjoining property beyond the railroad spur has been used as an exterior storage yard for operations further to the southeast.

5.1 Aerial Photographs

Aerial photographs were reviewed to obtain information on past land use patterns of the subject Property. These photographs date back to 1939 and were provided by EDR. Copies of the EDR provided aerial photographs for the subject Property are included in the appendix. From this search, the following information was gathered:

- 1939: The subject Property and northern, southern, and western adjoining properties are structurally undeveloped land. A small storage or agricultural structure is to the east. Agricultural land (pasture or grain) is approximately 300 feet north and east. A light-duty roadway (Clawiter Road) is approximately 2,500 feet east. Residential and/or agricultural use structures are visible along Clawiter Road.
- 1946: The subject Property and the adjoining properties appear as they did in the 1939 aerial photograph.
- 1958: The subject Property and the adjoining properties appear as they did in the 1946 aerial photograph. Properties to the north and east appear to be used as vineyard or similar agricultural crop. A light-duty roadway (Enterprise Avenue) is visible approximately 600 feet north. There is moderately more structural development in the general area.
- 1963: The subject Property and the adjoining properties appear as they did in the 1958 aerial photograph. Properties along Clawiter Road to the east are being commercially developed.
- 1966: The subject Property and the adjoining properties appear as they did in the 1963 aerial photograph. Stored materials, debris and/or disturbed soils are visible to the north, east, and southeast of the subject Property. A commercial structure is visible along Enterprise Avenue to the northeast.

- 1974: The subject Property and northern adjoining property are structurally undeveloped vacant land. The present day railroad spur traverses the southern portion of the subject Property. In addition, the southern and western adjoining properties are structurally undeveloped and are utilized as storage areas for piled materials and/or vehicles. The previously identified storage structure is visible on the eastern adjoining property. A significant amount of commercial development is visible to the south, west, and east.
- 1982: The subject Property is developed with the light-industrial structure observed during the site inspection. A cul-de-sac (Nickel Place) is to the immediate northeast. The northern and eastern adjoining properties are developed with the commercial structures observed during the site inspection. The southern and western adjoining properties are structurally undeveloped. Commercial in-fill development is visible to the north and east. There is considerably more structural development in the general area.
- 1993: The subject Property and the adjoining properties appear as they did in the 1982 aerial photograph. The western adjoining property has been developed with the commercial structure observed during the site inspection. The southern adjoining property beyond the railroad right-of-way remains structurally undeveloped.
- 1998: The subject Property and the adjoining properties appear as they did in the 1993 aerial photograph. The southern adjoining property is used as an exterior storage yard.
- 2005: The subject Property and the adjoining properties appear as they did in the 1998 aerial photograph.
- 2006: The subject Property and the adjoining properties appear as they did in the 2005 aerial photograph.
- 2009: The subject Property and the adjoining properties appear as they did in the 2006 aerial photograph.
- 2010: The subject Property and the adjoining properties appear as they did in the 2009 aerial photograph.
- 2012: The subject Property and the adjoining properties appear as they did in the 2010 aerial photograph.

5.2 Building Permits

In an attempt to determine the prior uses and date of initial development of the subject Property, the ADR Assessor obtained permit information on file at the City of Hayward Building Department. From this search of the subject Property address, the following information was obtained:

Permit Number	Date	Issued To	Description
B53912	May 29, 1979	Dunn Properties	Application for a building permit for a 31,938 square foot industrial building (Building #5)
B72798	May 8, 1986	Orlimar Golf Co.	Application for a building permit for tenant improvements, dust collection system, spray booth, and partitions
B-2008-4620	December 12, 2008	Vahram & Rita Takvorian	Permit to add sample box to grease interceptor

In addition to the above listed documents, various tenant improvement permits were reviewed; however, these permits did not contain information regarding potential environmental impacts to the subject Property. No underground tank permits were found in the subject Property's file. Copies of the above referenced permits are included in the appendix of this ESA.

5.3 Fire Insurance Information

The ADR Assessor attempted to review Sanborn Maps for the area of the subject Property. Sanborn Maps are detailed drawings that show the location and use of structures on a given property during specific years. These maps were originally utilized by insurance companies to assess fire risk, but are now utilized as a valuable source of historical and environmental risk information. However, no Sanborn Maps were available that covered the subject Property. A copy of the "Certified Sanborn Map Report" provided by EDR indicating that the subject Property is an "unmapped property" is included in the appendix.

5.4 City Street Directories

To determine the prior uses and occupants of the subject Property, the ADR Assessor reviewed city directory information provided by EDR which is compiled in *The EDR-City Directory Abstract*. City street directories list property occupants by address, allowing an historical search of tenants on the subject Property and neighboring properties. Selected directories from the years between 1920 and 2013 (in approximate 5 year intervals) were researched and identified the following information:

Address	Year	Listing
25673 Nickel Place (subject Property)	1920-1979	Address not listed
	1982	California Trade School, East Bay Rotary, Econo-Quick Printing
	1992	Orlimar Golf Company
	2002	Surface Technology Corp.
	2013	Haigs Delicacies, Locksmith

5.5 Interviews

According to Ms. Rita Takvorian, CEO with Haig's Delicacies and familiar with the subject Property since 2008, the subject Property was developed with the current light-industrial building in the late 1970s. When purchased in 2008, the building was empty and was previously occupied by a countertop manufacturing and sales business. Prior to the food processing operations at the site, Ms. Takvorian indicated that the building was cleaned, the interior drains were installed, and the food processing area (identified as the "kitchen") was built. Ms. Takvorian is unaware of adverse environmental conditions associated with the subject Property.

5.6 Assessors Tax Records

In an effort to determine the prior uses of the subject Property, the ADR Assessor reviewed public records available from the Alameda County Assessor's (ACA) website. Tax assessment records typically identify adjustments in property tax, which possibly indicate property development, or contain records of building permits or other useful information regarding a property. No significant information was obtained from this review.

5.7 Recorded Land Title Records

Recorded land titles are records usually maintained by the municipal clerk or county recorder of deeds which detail ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against the subject Property in the local jurisdiction having control for or reporting responsibility to the subject Property. Due to state land trust regulations and laws, land title records will often only provide trust names, bank trust numbers, owner's names, or easement holders, and not information concerning previous uses or occupants of the subject Property. For these reasons, this ESA has relied upon other standard historical information sources assumed to be either more accurate or informative than recorded land titles.

6 INFORMATION FROM SITE RECONNAISSANCE AND INTERVIEWS

6.1 Hazardous Materials Handling and Storage

At the time of the site inspection, hazardous materials on site consisted of small amounts of various cleaning agents for the food products, janitorial products used for cleaning the facility, and paint. These materials are stored in quantities that are unlikely to represent an environmental concern to the subject Property. The building and grounds of the subject Property appeared relatively free of staining or evidence of poor material handling procedures. No staining or other evidence of improper material handling was observed in the areas where these materials are stored.

6.2 Wastestream Processing and Disposal

At the time of the site inspection, four 55-gallon drums of waste fry oil were located in an exterior covered storage area along the northern wall of the subject Property structure. These drums were set on a secondary containment tray and properly secured. According to Ms. Takvorian, the waste cooking oil is generated during food production from the on-site deep fryers. This waste is picked-up and recycled by San Luis Tallow on a periodic basis.

During the site inspection, no improper wastestream processing or disposal practices were observed on the subject Property. No additional suspect containers that might be used for the storage or disposal of hazardous materials or regulated substances were observed. No signs of improper material disposal were observed at the subject Property.

6.3 Wastewater and Stormwater Discharges

Interior wastewater at the site is limited to effluent from the food preparation and processing areas, restroom fixtures, and sinks. Trench drains were located throughout the food processing areas and at the doorways to the cold storage areas in the subject Property structure. According to Ms. Takvorian, these drains were installed after the building was purchased. Ms. Takvorian indicated that the building was vacant and that no floor drains were located in the warehouse area of the structure.

Wash water generated from the subject Property flows into the municipal sanitary sewer system. A three-stage interceptor located in the northern parking lot area of the subject Property also installed in 2008 and is connected to the sewer system. According to Ms. Takvorian, the interceptor is maintained once per year by Bay Pumping and no issues are known regarding its operation. A sampling point is located in the vicinity of the interceptor. Ms. Takvorian was unaware of any sampling or issues associated with this feature. No sumps were observed inside the subject Property structure.

Two steel-grated surface drains were observed on the subject Property. The asphalt pavement where these drains are located was designed to direct surface water run-off into the drains. These drains were inspected and appeared to be in good visible condition, with no staining observed around their perimeter or interior. Surface and stormwater run-off from the subject Property would also be expected to flow onto the adjoining properties and roadways. No other catch basins, drip pads, clarifiers or sumps were observed. In addition, no evidence of major spills around surface drains, pipes, gutters, spouts, or tubes was observed.

6.4 Local/State Waste Disposal Compliance

At the time of the site visit, the subject Property appeared to comply with local and state waste disposal regulations.

6.5 Storage Tanks

6.5.1 Aboveground Storage Tanks (ASTs)

No ASTs or evidence of past ASTs was observed on the subject Property.

6.5.2 Underground Storage Tanks (USTs)

During the site inspection, no evidence of USTs was noted on the subject Property. In particular, the Assessor searched for: fill pipes, vent pipes, areas of abnormal or heavy staining, manways, manholes, access covers, concrete pads not homogeneous with surrounding surfaces, concrete build-up areas potentially indicating pump islands, abandoned pumping equipment, or fuel pumps.

In addition, the ADR Assessor contacted the City of Hayward Fire Department (HFD) and Alameda County Department of Environmental Health (ACDEH) and searched the Regional Water Quality Control Board (RWQCB) on-line *GeoTracker* website in an effort to determine if USTs have been reported at the subject Property address. No records of USTs at the subject Property address were located. Also, Ms. Rita Takvorian indicated that no USTs are located on the subject Property.

6.6 Indications of Polychlorinated Biphenyls (PCBs)

6.6.1 PCB-Containing Exterior Electrical Transformers

At the time of the site inspection, no pole-mounted or pad-mounted electrical transformers were located on the subject Property.

6.6.2 PCB-Containing Fluorescent Light Fixture Ballasts

Fluorescent light fixtures were observed on the subject Property. Based on the age of the structure (circa 1979), it is possible that the ballasts associated with these fixtures contain PCBs. Therefore, if a light ballast is found to be leaking, require replacement, or contents are subject to disposal, it would be prudent to identify the chemical content of the fluids.

6.6.3 PCB-Containing Interior Capacitors, Equipment, or Electrical Transformers

During the on-site inspection, no evidence was observed of any other items that could possibly contain PCB-contaminated fluid.

6.7 Solid Waste Disposal

At the time of the inspection, four municipal trash dumpsters were observed near the southeast corner of the subject Property. According to stenciled information on the units, these trash dumpsters are owned and serviced by Waste Management. At the time of the site inspection, the containers were partially filled with municipal waste, recyclable materials, and food waste, and appeared to comply with local and state solid waste disposal regulations. The waste containers appeared to be in good condition with no obvious signs of spills or improper disposal. At the time of the inspection, an inspection of the ground surface around these units was conducted to search for evidence of chemical or liquid waste staining or improper disposal; however, none was observed.

6.8 Other Conditions of Potential Concern

6.8.1 Suspect Asbestos-Containing Building Materials (ACMs) Observations

At the time of the site inspection, the following suspect asbestos-containing materials (ACMs) were observed on the subject Property: drywall/joint compound, vinyl floor products and associated mastic, suspended acoustic ceiling tile, and roofing materials. No significant damage to the other suspect materials was observed during the site inspection. Pursuant to federal and state regulations, all suspect ACMs should either be presumed to contain asbestos or adequate rebuttal sampling should be conducted by an accredited Building Inspector prior to renovation, including maintenance, or demolition if these activities will disturb the material(s).

6.8.2 Lead Based Paint

Based upon the age of the building observed on the subject Property (circa 1979), it is possible that painted building surfaces contain lead-based paint. No peeling, chipping, flaking or other failure or damage to these materials was observed during the site inspection. Pursuant to federal and state regulations, all suspect lead-based paint should either be presumed to contain lead or adequate rebuttal sampling should be conducted prior to renovation, including maintenance, or demolition if these activities will cause a disturbance of any suspect lead-based paint or otherwise create a lead hazard.

6.8.3 Air Quality: Indoor and Visible Emissions

Unusual smells, noxious odors, or visual emissions were not observed during the inspection of the subject Property.

6.8.4 Radon

According to the USEPA, the county in which the subject Property is located has a Radon Zone Level of 2, which has a predicted average indoor screening level of between 2.0 picocuries per liter (pCi/L) and 4.0 pCi/L. This level is below the EPA response level of 4.0 pCi/L. The subject Property exhibited an unlikely potential for radon contamination based upon the geological characteristics of the area and subject building construction.

6.8.5 Limited Mold Evaluation

During on-site observations, a limited mold evaluation was conducted to identify mold growth in the building on the subject Property. This evaluation concentrated on the identification of visible mold growth and areas of water intrusion that may present optimal conditions for mold growth. No suspect mold growth was observed in the structure on the subject Property.

6.8.5 Railroad Right-of-Way

A railroad spur traverses the southern portion of the subject Property, although does not service the subject Property. This spur has been present from sometime between 1966 and 1974 and services properties to the east and west of the subject Property. No evidence of staining or hazardous materials was observed in the area of the railroad spur. Railroad spurs can present an environmental concern due to chemicals associated with train operations, railroad ties, and track maintenance. However, based on the current industrial or commercial use of the subject Property, and the expected low volatility and mobility of the any potential contaminants, the potential impact to the subject Property appears limited. Therefore, ADR recommends no further action or investigation at this time. However, in the event of future subsurface work (i.e., trenching, redevelopment) at the area of the spur, the encountered soils should be sampled, and if identified to contain elevated levels of suspected contaminants, should be handled in accordance with all applicable regulations.

6.8.6 Underground Pipelines

No indicators or evidence of underground pipelines were observed on the subject Property during the site inspection. In addition, ADR reviewed the National Pipeline Mapping System (NPMS) website (<https://www.npms.phmsa.dot.gov/>) to obtain information related to possible underground oil pipelines. According to the NPMS website, no underground pipelines are in the immediate vicinity of the subject Property.

6.8.7 Wetlands

Wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plants and animal communities living in the soil and on its surface. Wetlands can be further defined through classification according to the length of time that an area is inundated or saturated by water, and the type of plants and animals an area supports. There are five major wetland classifications: marine, estuarine, lacustrine, riverine, and palustrine. Marine and estuarine wetlands are associated with the ocean and include coastal wetlands, such as tidal marshes. Lacustrine wetlands are associated with lakes, while riverine wetlands are found along rivers and streams. Palustrine wetlands may be isolated or connected wet areas and include marshes, swamps, vernal pools, and bogs. At the time of the site inspection, no visual or physical indicators of wetlands were observed on the subject Property.

7 CURRENT USES OF ADJOINING PROPERTIES

For the scope of this ESA, properties are defined and categorized based upon their physical proximity to the subject Property. An adjoining property is any real property whose border is contiguous or partially contiguous with the subject Property or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream. A neighboring property is any real property located within 0.25 mile of the subject Property's border.

7.1 Adjoining and Neighboring Properties - General Description

At the time of the site inspection, the general area surrounding the subject Property was occupied by light-industrial and commercial properties. The subject Property is bordered by the following:

- North: immediately by a vacant commercial structure (25655 Nickel Place), and further by commercial development.
- South: immediately by an active railroad spur, then by a light-industrial property (3503 Breakwater Court) occupied by Malcolm Drilling, Co., and further by light-industrial development.
- East: immediately by a commercial structure (25670 Nickel Place) used by Floratech Landscape Management, and further by commercial development.
- West: immediately by a building (3440 Enterprise Avenue) used by Crystal Creamery for truck storage, and further by light-industrial development.

7.2 Adjoining and Neighboring Properties Materials Storage

The adjoining and neighboring properties appear to store routine office and cleaning materials in quantities that are unlikely to represent an environmental concern to the subject Property. No unusual or suspicious materials handling storage practices were observed on the publicly accessible portions of the remaining adjoining and neighboring properties. Based on cursory observations of materials storage and handling practices and the environmental database review, the current use of the remaining adjoining and neighboring properties are unlikely to have represent an environmental concern to the subject Property.

7.3 Adjoining and Neighboring Properties Wastestream Disposal

No unusual or suspicious wastestream disposal activities were observed on the adjoining and neighboring properties. A cursory inspection of the adjoining properties did not reveal any improper disposal practices at the sites.

7.4 Railroad Right-of-Way

A railroad spur is located immediately south of the subject Property. This spur has been present from sometime between 1966 and 1974. Railroad spurs can present an environmental concern due to chemicals associated with train operations, railroad ties, and track maintenance. At the time of the site visit, an inspection was performed on the adjoining portion of this railroad spur to look for signs of improper chemical or liquid waste staining that could potentially impact the subject Property; however, no improper staining was observed. In addition, the graveled ground surface along the tracks appeared to be free of significant staining. Based on the observations at the time of the site inspection, ADR recommends no further investigation of this issue at this time.

8 RECORDS REVIEW

8.1 Standard Environmental Records Sources

ADR states that all databases reviewed as part of this ESA were determined in to be sufficiently complete and sufficiently current to serve as the basis for ADR's opinions expressed. The subject Property is identified in the HAZNET, RCRA-SQG, FINDS, and ECHO databases as reported by EDR. Refer to sections 8.1.1 and 8.1.2 for discussion of the subject Property listings. A detailed listing and a map showing all sites are included in the appendix.

8.1.1 Review of Federally Reported Environmental Data

Results of the federal regulatory records search follow. Each section begins with a description of the database searched and the agency that compiles it.

National Priorities List (NPL) of Superfund Sites:

The NPL is the EPA's database of over 1,200 hazardous waste sites currently identified and targeted for priority cleanup action under the Superfund Program. A search of the 2016 National Priorities List identified no Superfund sites within the 1.0 mile database search range.

Superfund Enterprise Management System (SEMS):

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. A search of the 2016 SEMS database identified no SEMS site within the 0.5 mile database search range.

Superfund Enterprise Management System Archives (SEMS-ARCHIVES):

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL

site. A search of the 2016 SEMS-ARCHIVES database identified two (2) sites within the 0.5 mile database search range. Based on their distance from the subject Property (>0.2 miles), their regulatory status (no further action required), and/or their down- or cross-gradient location with respect to groundwater flow direction, it is unlikely that these sites represent an environmental concern to the subject Property.

Emergency Response Notification System (ERNS):

The ERNS database is the historical record of all reported releases of oil and other hazardous substances. A search of the 2016 ERNS database did not identify a release on the subject Property.

Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposals (TSD) Facilities:

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA-TSD facilities database is the composite of reporting facilities that store, transport, treat, or dispose of controlled or hazardous waste. Identification on this list does not indicate that a site has impacted the environment. A search of the 2016 RCRA-TSD facilities database identified no site within the subject Property's database search range of 0.5 miles.

Resource Conservation and Recovery Act (RCRA) Facilities:

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA facilities database is the composite of reporting facilities that generate hazardous waste. Identification on this list does not indicate that a site has impacted the environment. A search of the 2016 RCRA facilities database identified twelve (12) small quantity generator sites (including the subject Property [specifically the former tenant Orlimar Golf Company], the northern adjoining AJ Daw Printing Ink (25655 Nickel Place), and the western adjoining Foster Dairy Farms property (3440 Enterprise Avenue), one (1) large quantity generator site, no conditionally exempt sites, and no former generator sites within the 0.25 mile database search range. According to the EDR Radius Report, no violations have been reported for the Orlimar Golf Company. Refer to the Hazmat subsection in section 8.1.3 for additional information regarding waste generation by Orlimar Golf Company.

According to the EDR Radius Report, no violations have been reported for the northern adjoining AJ Daw Printing Ink property or the western adjoining Foster Dairy Farms property. A cursory inspection of these properties did not reveal any indication of improper materials handling or storage practices. Based on their regulatory status (no violations), it is unlikely that these listings represent an environmental concern to the subject Property. Based on their distance from the subject Property (>0.1 miles), their regulatory status (no violations or are not identified on any databases that indicate an impact to the environment), and/or their down- or cross-gradient location with respect to groundwater flow direction, it is unlikely that any of the remaining sites represent an environmental concern to the subject Property.

RCRA Corrective Action (RCRA-CA) Sites:

The RCRA-CA (CORRACTS database) report contains information pertaining to facilities that have conducted, or are currently conducting corrective actions as regulated by the Resource Conservation and Recovery Act. A search of the 2016 RCRA-CA list identified no sites within the 1.0 mile database search range.

Facility Index System (FINDS) Report:

The FINDS Report is a computerized inventory of all facilities that are regulated or tracked by the U.S. Environmental Protection Agency. These facilities are assigned a unique identification number that serves as a cross-reference for databases in the EPA's program system. Identification on this database does not indicate that a site has impacted the environment. A search of the 2015 FINDS database identified the subject Property, specifically the former tenant Orlimar Golf Company, as a FINDS site. According to the EDR Radius Report, this listing is the result of being cross-referenced with the RCRA database and no violations have been reported under this database. Refer to the RCRA subsection above for additional information regarding this listing.

Enforcement & Compliance History Information (ECHO):

The EPA's ECHO system provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. Identification on this database does not indicate that a site has impacted the environment. A search of the 2015 ECHO database identified the subject Property, specifically the former tenant Orlimar Golf Company, as an ECHO site. This listing is the result of Orlimar Golf Company being identified on the RCRA database. Refer to the RCRA subsection above for additional information regarding this listing.

8.1.2 Review of California Reported Environmental Data

Results of the California regulatory records search follow. Each section begins with a description of the database searched and the state agency that compiles it.

Historic CalSites Database:

The Historic CalSites Database contains potential or confirmed hazardous substance release properties and includes the former ASPIS (Abandoned Sites Program Information System) database. This database was created since the Department of Toxic Substances and Control (DTSC) no longer up-dates the CalSites database. A search of the 2005 Hist CalSites database identified no sites within the 1.0 mile database search range.

Response Database (Response):

The Response Database identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk sites. A search of the 2016 Response database identified no site within the 1.0 mile database search range.

EnviroStor Database:

The DTSC's Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including military facilities, and State Superfund; Voluntary Clean-up sites; and school sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly contaminated properties that have been released for re-use, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. A search of the 2016 EnviroStor database identified twelve (12) sites within the 1.0 mile database search range. Based on their distance from the subject Property (>0.1 mile), their cross- or down-gradient location with respect to groundwater flow direction and/or their regulatory status (No Further Action), it is unlikely these sites represent an environmental concern to the subject Property.

California Bond Expenditure Plan (BEP):

The BEP database identifies sites for which a site-specific expenditure plan has been prepared as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. A search of the 1989 BEP database identified no sites within the 1.0 mile database search range.

Leaking Underground Storage Tanks (LUSTs):

The California Water Resources Control Board, in cooperation with the Office of Emergency Services, maintains an inventory of LUSTs in a statewide database. A search of the 2016 LUST database identified thirty (30) reported LUST sites within the 0.5 mile database search range. According to the EDR Radius Report, twenty-five (25) of the identified LUST sites have case closure. Based on the distance from the subject Property (>0.1 miles), cross- to down-gradient location with respect to the inferred direction of groundwater flow from the subject Property, case type (soil only), and/or regulatory status (closed), it is unlikely any of these LUST sites represent an environmental concern (with respect to soil, soil vapor and groundwater) to the subject Property.

Cortese Database:

The Cortese list contains hazardous waste and substance sites compiled pursuant to Assembly Bill 3750 (Cortese, Chapter 1048, Statutes of 1986). The information included in this list comes from the State Department of Health Services (public drinking water wells with detectable levels of contamination; hazardous substance sites selected for remedial action; historic Cortese sites; and sites with known toxic material identified through the abandoned site assessment program). This includes the State Water Resources Control Board (sites with known USTs having a reportable release), and the California Waste Management Board (solid waste disposal facilities from which there is a known migration). A search of the 2001 Historic Cortese database and the 2016 Cortese database identified twenty-one (21) reported Historic Cortese sites within the 0.5 mile database search range. Based on the distance from the subject Property (>0.1 miles), cross- to down-gradient location with respect to

the inferred direction of groundwater flow from the subject Property, case type (soil only), and/or regulatory status (closed), it is unlikely any of the Cortese sites represent an environmental concern (with respect to soil, soil vapor and groundwater) to the subject Property.

Solid Waste Facilities/Landfill Database (SWF/LF):

Solid Waste Facilities/Landfill Database (SWF/LF) records comprise an inventory of solid waste disposal facilities or landfills. A search of the 2016 SWF/LF database identified one (1) listing within the 0.5 mile database search range. Based on its distance from the subject Property (>0.1 miles), its regulatory status (not identified on any databases that indicate an impact to the environment), and/or its cross-gradient location with respect to groundwater flow direction, it is unlikely that this site represents an environmental concern to the subject Property.

Solid Waste Assessment Test Database (SWAT):

The SWAT database comprises an inventory of landfills investigated for potential groundwater impacts. A search of the 2000 SWAT database identified no sites within the 0.5 mile database search range.

Underground Storage Tanks (USTs):

USTs are regulated under Subtitle I of the RCRA and must be registered with the state of California. These are registered USTs only, and identification on this list does not indicate that the site has impacted the environment. A search of the 2016 California State Water Resources Control Board (SWRCB), the 1994 California Environmental Protection Agency UST, 1994 SWEEPS UST, and the 1990 SWRCB historical UST databases identified twenty (20) sites within the 0.25 mile database search range. Many of these listings are redundant. Based on their distance (>0.1 miles) from the subject Property, their regulatory status (no release reported or tanks removed), and/or their cross-gradient location with respect to groundwater flow direction, it is unlikely that the sites represent an environmental concern to the subject Property.

Waste Discharger System (WDS) Report:

The WDS report contains information for all regulated wastewater and hazardous waste discharges to public waterways, groundwater or sewer systems in California. Identification on this list does not necessarily indicate that a site has impacted the environment. A search of the 2007 WDS database did not identify the subject Property.

California Spill, Leaks, Investigations and Cleanups (SLIC) Database:

The California Spill, Leaks, Investigations and Cleanups (SLIC) database contains information for all reported hazardous material/waste surface or groundwater contamination investigations in California. A search of the 2016 SLIC database identified twelve (12) SLIC sites within the 0.5 mile database search range. Based on their distance from the subject Property (>0.1 miles), cross- to down-gradient location with respect to the inferred direction of groundwater flow from the subject Property, and/or regulatory status (closed), it is unlikely these SLIC sites represent an environmental concern (with respect to soil, soil vapor and groundwater) to the

subject Property.

Facility and Manifest Data (HAZNET):

The HAZNET Database is information extracted from the copies of hazardous waste manifests received each year by the Department of Toxic Substances Control (DTSC). Inclusion on this list identifies a site as a likely generator of hazardous waste. However, identification on this list does not indicate that a site has impacted the environment. The subject Property, specifically former tenant Orlimar Golf Co., is identified on the 2014 HAZNET database. ADR also reviewed the DTSC Hazardous Waste Tracking System (HWTS). Information obtained from the DTSC HWTS database and information regarding the subject Property is summarized in the table below.

Business Name and Address	Generator No.	Additional Information
Orlimar Golf Co. 25673 Nickel Place	CAR000084442	The generator number was entered into the HWTS in April 2001 and inactivated in June 2001. A manifest covering the disposal of approximately 0.22 tons of "Blank/unknown" chemical, approximately 0.41 tons of "waste oil and mixed oil", approximately 0.02 tons of "unspecified oil containing waste", and approximately 0.66 tons of "off-spec, aged, or surplus organics" generated in 2000 were associated with this generator number.

A copy of the EPA ID Profile report obtained from the DTSC HWTS database is included in the appendix.

Cleaners:

The Department of Toxic Substances Control maintains a list of dry cleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaning agents; linen supply; coin-operated laundries and cleaning; dry cleaning plants, except rugs; carpet and upholstery cleaning; industrial launderers; laundry and garment services. A search of the 2016 Cleaners database did not identify the subject Property as a Cleaners site.

California Hazardous Material Incident Reporting System (CHMIRS):

CHMIRS contains information on reported hazardous material incidents (accidental releases or spills). A search of the 2015 CHMIRS database did not identify the subject Property as a CHMIRS site.

Emissions Inventory (EMI):

The EMI database contains information for all reported air quality related emissions in California. A search of the 2014 EMI database did not identify the subject Property.

California Department of Conservation - Division of Oil and Gas (DOG):

The Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) prepares and publishes oil, gas, and geothermal maps for the State of California. The California Division of Oil, Gas and Geothermal Resources updates these comprehensive maps weekly with the most current well data and post the information on its website at <http://maps.conservation.ca.gov/doms/index.html>. According to the DOGGR website for the area of the subject Property, no active or abandoned wells are located on or in the vicinity of the subject Property.

National Pollution Discharge Elimination System Database (NPDES):

The NPDES database contains permit information including stormwater data. According to the EDR Radius Report, the subject Property is not listed as having a NPDES permit.

8.1.3 County/Local Agency Records Search

Following is a discussion of records searches performed or personal/telephone contacts made with the appropriate local government agencies for environmental issues, relative to the subject Property.

Regional Water Quality Control Board – San Francisco Bay Region (RWQCB):

The ADR Assessor contacted the RWQCB and reviewed the RWQCB on-line *GeoTracker* database in an effort to determine whether hazardous material incidents or USTs/LUSTs have been reported at the subject Property address. According to Ms. Melinda Wong with the RWQCB, the RWQCB has no records pertaining to the subject Property. In addition, the subject Property address is not listed on the *GeoTracker* database.

Bay Area Air Quality Management District (BAAQMD):

The ADR Assessor contacted the BAAQMD in an effort to determine whether any air discharge permits or violations are on file for the subject Property address. According to Ms. Rochelle Reed with the BAAQMD, the BAAQMD has no files for the subject Property.

Alameda County Department of Environmental Health (ACDEH):

The ADR Assessor contacted the ACDEH in an effort to determine whether hazardous material incidents, USTs or LUSTs have been reported at the subject Property address. According to Ms. Alicia Foott with the ACDEH, the ACDEH has no files for the subject Property.

City of Hayward Fire Department (HFD):

The ADR Assessor contacted the HFD in an effort to determine whether hazardous material incidents, USTs or LUSTs have been reported at the subject Property address. Information obtained from the HFD consisted of various inspection reports (1986, 1987, 1990, 1991, 1993, 1997, 2001, 2003, 2004, 2005, and 2009), a 1993 *Hazardous Materials Business Plan*, a *Claim of Exemption* document [stating that the business is exempt from filing a 2004 *Hazardous Materials Business Plan* due to the

amount of hazardous materials/wastes generated], and similar documents. No USTs or spill issues were reported in the subject Property file. No chemical storage or environmental issues were reported for the current tenant of the subject Property, Haig's Delicacies. Historic inspection reports indicated that chemical storage of the former tenants (Orlimar Golf) included lacquer waste, 111-Trichloroethylene, trichloroethane, methyl ethyl ketone, waste oil, acetone, thinner and the operation of a degreaser.

A 1990 inspection report for Orlimar Golf recommended secondary containment for 55-gallon drums located in an outside storage area. A 1991 inspection report required that Orlimar "Clean the area outside where oil spilled, under the stored bench-type machinery along the neighbor's wall." A 1997 inspection report indicates that the "facility no longer used large amounts of solvent-based lacquers, acetone, MEK, etc." Information from a 2001 inspection report for Surface Technology identified that a "4x4 deep pit" used to "catch sludge" is used in the "Granite Room" at the site. The specific location of this pit was not indicated nor did ADR observe evidence of this feature during the site inspection. A 2005 inspection report referenced this feature as a "solid sump" [based on the evidence described and purpose of this sump, ADR concludes it is unlikely to represent an environmental concern to the subject Property]. Copies of the above referenced documents are included in the appendix.

California Department of Toxic Substances Control (DTSC):

The ADR Assessor contacted the DTSC and reviewed the DTSC on-line *EnviroStor* database in an effort to determine whether hazardous material incidents or USTs/LUSTs have been reported at the subject Property address. According to Ms. Liang Yu Ma with the DTSC, the DTSC has no files for the subject Property. The subject Property is not identified on the *EnviroStor* database.

8.2 Synopsis of Previous Environmental Investigations

No previous environmental investigations regarding the subject Property were provided to the ADR Assessor.

9 FINDINGS, OPINIONS AND CONCLUSIONS

This section presents a summary of available information on known or suspected *recognized environmental conditions*, *historical recognized environmental conditions*, *controlled recognized environmental conditions*, non-scope ASTM environmental concerns, environmental concerns not considered *recognized environmental conditions*, and *de minimis conditions* (if any) at the subject Property. It also includes ADR's opinion and rationale for concluding that a condition is, or is not, currently a *recognized environmental condition*. Based on a review of the information presented in this ESA, ADR presents the following relevant findings and opinions:

Recognized environmental conditions:

- Based on historical information, the subject Property has been utilized for light-industrial operations from 1975 to the present. From at least the mid-1980s to 2000, the Orlimar Golf Co. operations included the use and storage of hazardous materials (i.e., petroleum products, lacquer thinner, and halogenated solvents), the operation of a degreaser, and the generation of hazardous waste as a function of their business. There are potential environmental risks associated with these operations including the release of hazardous materials to the subsurface during a time of lesser environmental awareness. Inspection reports from the 1980s and 1990s indicated that these materials were stored inside and outside the subject Property building and did not have secondary containment.

Historic recognized environmental conditions:

- None

Controlled recognized environmental conditions:

- None

Non- ASTM scope environmental concerns:

- At the time of the site inspection, the following suspect asbestos-containing materials (ACMs) were observed on the subject Property: drywall/joint compound vinyl floor products and associated mastic, suspended acoustic ceiling tile, and roofing materials. No significant damage to the other suspect materials was observed during the site inspection was observed. Pursuant to federal and state regulations, all suspect ACMs should either be presumed to contain asbestos or adequate rebuttal sampling should be conducted by an accredited Building Inspector prior to renovation, including maintenance, or demolition if these activities will disturb the material(s).

Business Environmental Risk:

- A railroad spur traverses the southern portion of the subject Property, although does not service the subject Property. This spur has been present from sometime between 1966 and 1974 and services properties to the east and west of the subject Property. No evidence of staining or hazardous materials was observed in the area of the railroad spur. Railroad spurs can present an environmental concern due to chemicals associated with train operations, railroad ties, and track maintenance.

However, based on the current industrial or commercial use of the subject Property, and the expected low volatility and mobility of the any potential contaminants, the potential impact to the subject Property appears limited. Therefore, ADR recommends no further action or investigation at this time. However, in the event of future subsurface work (i.e., trenching, redevelopment) at the area of the spur, the encountered soils should be sampled, and if identified to contain elevated levels of suspected contaminants, should be handled in accordance with all applicable regulations.

ADR has performed an ESA on the site located at 25673 Nickel Place in Hayward, California. This ESA was performed in accordance with ASTM Standard Practice E 1527-13 and the scope of services identified in the *Master Agreement for Consulting Services* document dated January 26, 2012, between Citicorp North America, Inc. and ADR. Any exception to or deletions from this practice are described in Section 2.3 of this report. This ESA has identified no evidence of recognized environmental conditions as defined by ASTM in connection with the subject Property with the exception of:

- Based on historical information, the subject Property has been utilized for light-industrial operations from 1975 to the present. From at least the mid-1980s to 2000, the Orlimar Golf Co. operations included the use and storage of hazardous materials (i.e., petroleum products, lacquer thinner, and halogenated solvents), the operation of a degreaser, and the generation of hazardous waste as a function of their business. There are potential environmental risks associated with these operations including the release of hazardous materials to the subsurface during a time of lesser environmental awareness. Inspection reports from the 1980s and 1990s indicated that these materials were stored inside and outside the subject Property building and did not have secondary containment.

10 RECOMMENDATIONS

Based upon the conclusions of this ESA, ADR recommends no further investigation or additional action for the subject Property at this time with the exception of:

- ADR recommends a subsurface investigation to determine if the past tenants have environmentally impacted the subject Property.
- Pursuant to federal and state regulations, all suspect ACMs should either be presumed to contain asbestos or adequate rebuttal sampling should be conducted by an accredited Building Inspector prior to renovation, including maintenance, or demolition if these activities will disturb the material(s).

11 SIGNATURE PAGE

This ESA was prepared in accordance with generally accepted environmental practices and procedures, employing the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental professionals practicing in this area, as of the date of this ESA.

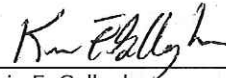

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and the individuals conducting this ESA have the specific qualifications based on education, training, and experience to assess a *property* of nature, history, and setting of the subject Property. ADR has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ADR Environmental Group, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

EXECUTIVE SUMMARY

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HENKEL ADHESIVES COR	25817 CLAWITER ROAD	E 1/8 - 1/4 (0.177 mi.)	32	81

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/02/2016 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

Not reported OES Incident Number: 4-6544	25500 WHITE CELL	SSW 1/8 - 1/4 (0.239 mi.)	46	110

Other Ascertainable Records

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2014 has revealed that there are 6 HAZNET sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 21 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto

EXECUTIVE SUMMARY

sites within approximately 0.25 miles of the target property.

 Reclamation: Not reported
 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
Facility ID: San Francisco Bay 011000716
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil

Potential Contaminants of Concern: * Metals/Heavy Metals - Chromium 6

Site History: The Site is located approximately 1\% miles east of the San Francisco Bay shoreline and \% mile east of marshlands and salt evaporation ponds. The Site and surrounding land use is commercial/industrial, and is anticipated to remain so in the future. A large building located near the center of the Site is used by a construction company for storage, maintenance, and office space. Two abandoned sumps (dip tanks) used by a former Site tenant for chrome plating operations are located within the northwestern portion of the building. The dip

tanks were filled with soil and paved over with cement by the current Site owner. The remainder of the Site was paved by the current Site owner and is used as an outdoor storage yard for construction equipment. The western portion of the property and a narrow easement along the northern border of the Site is leased by a third party for storage of mobile containers and trailers.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

HAZARDOUS WASTE BIENNIAL REPORTER

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 RB Case Number: 01S0564
 File Location: Regional Board
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Under Investigation
 Potential Contaminants of Concern: * Metals/Heavy Metals, * Petroleum - Diesel fuels
 Site History: The site historically operated as an industrial metal-pipe refinisher, and included sandblasting and painting operations. The site was operated by various companies for the past several decades, most recently as Runnels Industries, Inc. Sandblasting grit containing various metals, including zinc, copper, and chromium was used at the site. The site also formerly contained three underground storage tanks (USTs) containing gasoline, diesel, and methyl ethyl ketone, and a single aboveground storage tank (AST) for diesel. In April 2001, Anacapa Land Company, LLC, purchased the property for redevelopment. Runnels Industries vacated the property in January of 2002.

Baseline Flow: 0
 Reclamation: Not reported
 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Status: Open - Site Assessment
Status Date: 07/13/1990
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker: KEB
Local Agency: HAYWARD, CITY OF
RB Case Number: 01-1650
LOC Case Number: 01-1650
File Location: Local Agency
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Transfer of oversight from the Hayward Fire Department to the Regional Board on 12/30/2013. The site is located in the center of the Waste Water Treatment Plant located at 3700 Enterprise Avenue, Hayward, California, just south of the Maintenance Building. The Waste Water Treatment Plant is currently active. On December 12, 1989, WD Construction removed one 1000‐gallon unleaded gasoline underground storage tank (UST), one fuel dispenser, and associated product piping. WaterWorks observed the UST removal activities and conducted confirmatory soil sampling. No visible holes were noted during UST removal activities. However, WaterWorks noted moderate odor emanating from the UST pit. Additionally, a concrete slab was noted beneath the UST. Groundwater was not encountered during UST removal activities.(Additional Site Characterization Report, December 31, 2009)

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Lead Agency: ALAMEDA COUNTY LOP
 Lead Agency Case Number: RO0002629
 Latitude: 37.636807
 Longitude: -122.129648
 Case Type: Cleanup Program Site
 Case Worker: MD
 Local Agency: ALAMEDA COUNTY LOP
 RB Case Number: NA
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Under Investigation
 Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
 Site History: A site inspection found a number of improperly stored 55-gallon drums of waste oil and smaller waste containers with evident surface spillage. Three USTs were also located and removed; confirmation soil samples do not appear to have been collected / submitted. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

Amount (Lbs): WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
6674.1

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 24318.7

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 10094

Waste code: F003

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affected: Under Investigation
Potential Contaminants of Concern: * Solvents
Site History:

From 1963 to 1997, White Cap (formerly Continental White Cap) manufactured container closures at 24493 Clawiter Road. The manufactured products consisted of metal caps, typically for glass food and beverage containers. Hazardous materials were managed and released during this period, including paint thinners. The site is currently operated by Con-X-Tech to fabricate structural steel. Areas of soil impact were primarily associated with releases of paint thinners from six underground tanks and a dry sump. Shallow groundwater was impacted in the areas of soil contamination, extending a short distance in the direction of groundwater flow (southwest). Chemicals of concern include xylenes and ethylbenzene. In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems. Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site. White Cap continues to conduct periodic monitoring at the site. It is expected that these activities will continue until drinking water standards are reestablished in onsite groundwater and Water Board concurrence is provided to terminate treatment and monitoring. Treatment activities are anticipated to be completed in 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 11/13/2008
Comments: DTSC approved the Workplan. The supplemental site characterization activities under the Workplan include drilling of five soil borings to 20 feet below ground surface and collection of grab groundwater samples and analysis for metals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/17/2009
Comments: VOCs and nickel were found in groundwater at concentrations that exceed maximum contaminant levels. Because these contaminants will remain at the site, DTSC will require a land use covenant to restrict the use of groundwater so that it can not be used as a drinking water source.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 07/07/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/17/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 07/07/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2016	Telephone: 703-603-8704
Date Made Active in Reports: 05/20/2016	Last EDR Contact: 07/06/2016
Number of Days to Update: 135	Next Scheduled EDR Contact: 10/17/2016
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/21/2016

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 06/06/2016	Source: DTSC and SWRCB

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ALAMEDA, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06001C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> HAYWARD	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Willows

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 7.4
2	18 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5

Soil Map ID: 2

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	20 inches	53 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
3	53 inches	79 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Reyes

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.1
2	5 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 0.42 Min: 0.01	Max: 6 Min: 3.6

Soil Map ID: 4

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	25 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Dear Linda,

I would like to review any information that is on file for the following site(s) in Hayward:

Commercial property

25673 Nickel Place, Hayward, CA 94545

Specifically I am looking for hazardous material releases, records of underground storage tanks, or material handling violations. If you have any comments, or know when I can come in, please call me at (916) 921-0600. Thank you.

Sincerely,

Steven Ashe

Subject: Public Records Request Number. 2016-09-0047

Importance: High

Dear Steve Ashe:

We have received your public records request of 9/6/2016 5:02:49 PM PST. We have assigned 2016-09-0047 as your Request Number in order to track your request. You requested the following:

Facility Information

Facility Street: 25673 Nickel Place
Facility City: Hayward
Facility State: CA
Facility Zipcode: 94545
Period Covered: all

Print Outs Requested

- Episode
- Permit Application
- Violation
- Complaint

Other Requests: Warehouse structure

Within 10 days we will determine whether you have requested disclosable records. If we need more time to make that determination, we will let you know within 10 days. If your request is unclear we will also contact you within the 10 days.

If you have requested disclosable records, and your request is simple, we may respond within 10 days by providing you with the records requested or with our finding that we have no records. If you have requested disclosable records and your request is more complicated, we will notify you promptly of our determination and provide you with our estimate of when the records will be made available.

If you have requested records that are exempt from disclosure, we will explain why the records are being withheld.

You can follow our progress in responding to your request by using the [PRA Login](#) webpage.

Subject: RE: 25673 Nickel Place, Hayward

Thank you for contacting Alameda County Department of Environmental Health (ACDEH) Certified Unified Program Agency (CUPA) File Review Request:

We show NO CUPA Hazmat records for the addresses you requested.

*Some LOP, LUFT/SLIC information may be available online.

<http://www.acgov.org/aceh/lop/ust.htm>

<http://www.acgov.org/MAPS/deh/InspectionResults/?SITE=LOP>

<http://geotracker.waterboards.ca.gov/>

Consider the following in making your request:

1. Make sure you have a Physical Site Address. (i.e. 1234 Burch Lane Oakland, CA 94603)
2. Only having directional information will limit the ability to locate the file you are looking for. (i.e. The location is by or on Burch Lane in Oakland CA)
3. None of the following are needed, and they do not assist in locating your file.
 - APN
 - Parcel Number
 - Longitude and Latitude information

A physical site address is needed to administer a search.

**Please note that ACDEH only has files for sites within its jurisdiction. Many cities within Alameda County are not part of ACDEH CUPA jurisdiction.

In those cases we advise that you try contacting that cities Fire or Planning Departments for any records.

Please view our Jurisdiction List:

<http://www.acgov.org/aceh/documents/CUPA-jurisdictions.pdf>

Our office makes files available by appointment only for review on Thursdays and Fridays from 9:00 AM until 12:00 noon.

Please send all requests to dehcupafilereview@acgov.org

Dear Mr. Ashe,

We have received your Public Records Act Request for information from the Department of Toxic Substances Control.

After a thorough review of our files, we have found that no such records exist at this office pertaining to the site(s) referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request or would like an appointment to visit Berkeley's Central Files, please contact me at (510) 540-3800.

Sincerely,

Liang Yu Ma

Regional Central Files Coordinator

Section X - WASTE DISPOSAL

List the types of wastes generated from this facility under each category. Enter 3-digit waste identification numbers from Appendix C - List of Common Wastes Regulated in California. Briefly describe the nature of the waste, and estimate quantity generated in one year.

A. Waste discharged directly to the sanitary sewer without pretreatment:

<u>California Waste ID No.</u>	<u>Description</u>	<u>Generated Per Year</u>	
		<u>Quantity</u>	<u>Units</u>
_____	_____	_____	_____
_____	_____	_____	_____

B. Waste discharged to the sanitary sewer after being processed through a facility treatment system:

<u>California Waste ID No.</u>	<u>Description</u>	<u>Generated Per Year</u>	
		<u>Quantity</u>	<u>Units</u>
_____	_____	_____	_____
_____	_____	_____	_____

C. Waste hauled off-site with Uniform Hazardous Waste Manifest, for treatment and/or disposal:

<u>California Waste ID No.</u>	<u>Description</u>	<u>Generated Per Year</u>	
		<u>Quantity</u>	<u>Units</u>
_____	_____	_____	_____
_____	_____	_____	_____

D. Waste recycled on-site or off-site:

<u>California Waste ID No.</u>	<u>Description</u>	<u>Generated Per Year</u>	
		<u>Quantity</u>	<u>Units</u>
<u> 12</u>	<u>Waste lacquer/solvent</u>	<u>60</u>	<u>gal</u>
_____	_____	_____	_____

E. Other waste generated/disposal method:

<u>California Waste ID No.</u>	<u>Description</u>	<u>Generated Per Year</u>	
		<u>Quantity</u>	<u>Units</u>
_____	_____	_____	_____
_____	_____	_____	_____

Disposal Method: (Describe) _____

F. No waste generated:

- This facility does not generate hazardous waste, or other regulated wastes other than domestic sanitary waste.

Section IX - SEPARATION, SECONDARY CONTAINMENT, AND MONITORING OF STORAGE AREAS

Part A - Aboveground Storage Areas

Make copies of this page and complete one for each storage area defined in the facility storage maps. Check all applicable information given in the boxes below:

Page 1 of 1

Storage area location code: A 3 B
(as shown on facility map)

Storage area description or name: Metal Cabinets / Shed outside

1. Type of storage containers found in this area

Requirements:

1. Submit HMMP by October 31, 1990 if you have not done so yet.
 2. Label containers of regulated materials
 - FLAMMABLE
 - WASTE OIL
 3. Label Storage Areas - the 2 cabinets with Flammable liquids
 4. Post NFPA placard outside the metal storage ^{"building"} ~~cabinet~~, outside.
 5. Provide Secondary Containment for the storage outside - the metal building with 55-gal drums.
- (I will re-inspect the Labels and Containment by October 31, 1990.)

FAILURE TO COMPLY WITH THE REQUIREMENTS ESTABLISHED IN THIS FIELD INSPECTION REPORT OR IN SUBSEQUENT CORRESPONDENCE MAY RESULT IN THE ISSUANCE OF A NOTICE OF NONCOMPLIANCE AS PROVIDED IN SECTION 3-8.55 OF THE HAYWARD MUNICIPAL CODE. NONCOMPLIANCE IS PUNISHABLE BY CRIMINAL AND/OR CIVIL PENALTIES UNDER SECTIONS 3-8.64 AND 3-8.65 OF THE HAYWARD MUNICIPAL CODE, OR OTHER APPLICABLE FEDERAL AND STATE LAWS AND REGULATIONS.

NO

For members of the Emergency Response Team:

- * Procedures for shutdown of operations Yes No
- * Procedures for using, maintaining, and replacing facility's emergency and monitoring equipment Yes No
- * All employees are trained in emergency response procedures within 6 months of hiring Yes No
- * Refresher training is provided at least annually Yes No

2b. Training records

Training records should be maintained for all employees:

- * Verification that training was completed by employee Yes No
- * Description of type and amount of introductory and continuing training Yes No
- * Training records of current and former employees, retained for at least three years. Yes No
- * Documentation on facility emergency response drills conducted during the year Yes No
- * All training documentation and records are maintained and are available for review Yes No

2c. Person responsible for training of employees on emergency response:

Name: RICHARD ON Title: VICE PRESIDENT

Contact Telephone: 783-1883

Section XIV - MAINTENANCE, REVISION, AND UPDATE OF HMMP

At least once a year, the entire Hazardous Materials Management Plan must be reviewed by a responsible company officer to determine if a revision is needed. He or she must then certify in writing to the administrating agency that a review was made and that any necessary changes were made to the HMMP. A copy of the revised plan and certification must be sent to the Hayward Fire Department, Hazardous Materials Office. If the review determines that no changes are necessary, a certification to that effect must be sent instead.

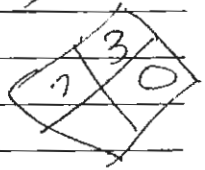

The HMMP must also be amended as a whole or in sections if any of the following occurs:

- a) any change in the nature of chemicals or other hazardous materials stored at the facility;
- b) substantial change in the quantities of chemicals or other hazardous materials stored at the facility;
- c) change in ownership of business or facility;
- d) change in business name and/or nature of operations conducted in the facility;
- e) change in building occupancy classification;
- f) change in structure and/or layout of facility and buildings; or
- g) any other substantial change in any piece of information contained in the HMMP.

Section XII - EMERGENCY RESPONSE PLAN AND PROCEDURES

State regulations (Title 19, CCR, Chapter 2, Subchapter 3, Article 4, Section 2731) require that business plans include emergency response procedures for a release or threatened release of hazardous materials, "scaled appropriately for the size and nature of the business, the nature of damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations."

For this section, check the box that indicates your answer to each of the following questions:

1. Does this facility have a written emergency response or contingency plan? Yes No

2. If you answered "yes" to (1) above, review the following list. For each item, check "Yes" if your written plan contains the element listed. Check "No" if it does not. (Consider amending the plan to include all elements in the list.)

If you do not have a written plan, it would be advisable for you to prepare one that will contain at least all the elements listed below. A written plan is required if you generate hazardous waste (at least 55-gal per year) or if you handle acutely hazardous materials. This written plan should be made available to inspectors upon request. Presently, however, without a written plan, assess the knowledge of all of your employees who handle hazardous materials, regarding emergency response. Check "Yes" if your employees know the emergency response plan elements listed.

2a. Notification Yes No

- * Call 911 - Hayward Fire Department Yes No
- * Call 911 - Medical Emergency Yes No
- * Notify on-site responders Yes No
- * Call designated local emergency medical facility Yes No
- * Notify State Office of Emergency Services (1-800-852-7550) Yes No

2b. Evacuation Yes No

- * Activate local alarm system for evacuation Yes No
- * Assembly areas designated Yes No
- * Evacuation route maps posted Yes No
- * Reentry procedures defined Yes No

2c. Equipment Yes No

- * Location and description of on-site emergency response equipment Yes No
- * Use and operation of on-site emergency response equipment Yes No
- * Location and description of monitoring devices such as toxic gas detectors Yes No
- * Use and operation of monitoring devices Yes No

2d. Emergency Response Procedures Yes No

- * Procedures for the handling of a release or a threatened release of any hazardous material listed in the inventory Yes No

(HAZARDOUS MATERIALS MANAGEMENT PLAN)

*Posted
Aug
16/92*

Prepared and submitted to the Hayward Fire Department in fulfillment of reporting requirements contained in the following laws, codes, and ordinance:

- (a) Federal Superfund Amendments and Reauthorization Act of 1986 (SARA Title III);
- (b) Chapter 6.95 of the California Health and Safety Code;
- (c) Title 19 of the California Code of Regulations;
- (d) Chapter 3, Article 8 of the Hayward Municipal Code; and
- (e) Article 80 of the Uniform Fire Code as adopted by the State of California and the City of Hayward.

REPORTING YEAR 1993
for

FACILITY ADDRESS: 25673 Nickel Place

Hayward, CA **ZIP:** _____

FACILITY NAME: ORLIMAR GOLF COMPANY

Section I - CERTIFICATION

I hereby certify under penalty of perjury that the information contained in this Hazardous Materials Management Plan is, to the best of my knowledge, true, accurate, and correct. I understand that I may be required to show proof of compliance with all City, County, State, and federal laws and regulations during any facility inspection conducted by City, County, State, or Federal authorities.

I further certify that I am duly authorized to execute this certification on behalf of the business or facility named above.

Authorized Signature: *Dolores J. Ortiz*

Section VII - FACILITY STORAGE MAP

On the space provided, or on a separate 8½ x 11 paper, draw a diagram that shows hazardous materials storage areas inside and outside buildings. The Facility Storage Map should contain the following features:

1. Designate each storage location with a letter corresponding to the building where it is located (or adjacent to) and a number (e.g., A-1, A-2, B-1, B-2, etc.). This location code should correspond to the location code entered in the Hazardous Materials Inventory Statement (HMIS).
2. Indicate North direction on the upper right hand corner of the page.
3. Draw to a legible scale and indicate scale use.
4. Fill in facility name, address, and date that the storage map is prepared.

(If separate pages are submitted, each page should also contain the required information at the bottom of the page.)

5. Use additional, separate pages if a one-page map proves too complicated, cluttered, or cramped. Each page must be identified. Indicate Building Numbers that correspond to those in the General Site Plan. Indicate also how each page fits in to form the whole Facility Storage Map.
6. Show and label the locations of the following features:
 - a. Aboveground and belowground tanks and pipelines containing hazardous materials. Indicate direction of flow and location of shut-off points.
 - b. Walls, rooms, doorways, corridors, exits, windows, and other access points.
 - c. Production or process areas where hazardous materials are used. Indicate hazard class and quantity present in each area.
 - d. Emergency response apparatus equipment like foam generating equipment, SCBA, hoses, etc.
7. If known, indicate occupancy rating or classification of each room. (e.g., B1, B2, H1, H2, H7.)
8. If applicable, label the drawing "**Confidential - Not for Disclosure.**"

Section VI - GENERAL SITE PLAN

On the space provided, or on a separate 8½ x 11 paper, draw a diagram that shows the location of the facility relative to adjacent streets, properties, and other buildings.

As a minimum, the map should contain the following features:

1. Indicate North direction on the top right hand corner of the page.
2. Draw to a legible scale, and indicate scale used.
3. Fill in facility name, address, and date that the map is prepared.

(If a separate page is submitted, it should also contain all the required information at the bottom of the page.)

4. Use additional, separate pages if a one-page map proves too complicated, cluttered, or cramped. Each additional page must be identified. Indicate how each part fits in to form the whole General Site Plan.
5. Show and label the locations of the following structures.

(A LEGEND may be included in the map in lieu of labels.):

- a. Buildings and other aboveground structures.
(Identify each building as a reference, using alphabets, starting with A, B, C, etc.)
- b. Underground storage tank locations.
- c. On-site hydrants.
- d. Off-site hydrants within 500 feet of facility boundaries.
- e. Fire protection systems auxiliary connections.
- f. Emergency equipment.
- g. Permanent access ways and evacuation routes.
- h. Secondary containment areas outside any building.
- i. Equipment clearing areas.
- j. Loading areas.
- k. Internal roads.
- l. Parking lots.
- m. Property line.
- n. Adjacent properties/facilities.
- o. Adjacent streets.

INSPECTION REPORT

Page 1 of 1

Street Address: 25673 NICKEL PLACE
 Name of Facility: ORLIMAR GOLF COMPANY
 Facility Representative: _____ Tel. No.: 510-783-1883

Hazardous Materials Storage Permit up to date.

Work bench:

2 x 1-gal combustible explosives (No more than 4 gals)
~~Wet~~ Converting to metal clubs. No more wood clubs being produced.

3 x 5-gal flam. liquids.

Lockers:

lacquers & solvents 6 x 5-gal cans
 Miscellaneous flammable liquids (small ~~off~~ 1 qt cans)

1 - 55-gal drum

*REQUIREMENTS

1) label the flammable liquids locker with the words "FLAMMABLES".

Failure to comply with the requirements established in this inspection report or in subsequent correspondence may result in the issuance of a Notice of Noncompliance as provided in Sec. 3-8.55 of the Hayward Municipal Code. Noncompliance is punishable by criminal and/or civil penalties under Sec. 3-8.64 and Sec. 3-8.65 of the Hayward Municipal Code, or other applicable Federal and State laws or regulations.

INSPECTION REPORT

Page 1 of 1

Street Address: 25673 Nickel Place
 Name of Facility: Orlimer Golf Company
 Facility Representative: Richard On Tel. No.: 510-783-1883

Assistance given to facility operator for completion of the C.U.P.A. registration forms.

It was noted during the inspection that there has been a significant reduction in the use of hazardous materials at the facility. The C_2H_2/O_2 welding unit is no longer in use and the operator is planning on removing it from the site.

The facility no longer uses large amounts of solvent-based lacquers, acetone, MEK, etc. since wood golf club heads are no longer being produced. Metal graphite heads only being used.

Note: With ~~less~~ lesser amounts of hazardous materials (less than 55 gallons) this facility shall be changed to a ~~class~~ quantity range 1A facility.

Failure to comply with the requirements established in this inspection report or in subsequent correspondence may result in the issuance of a Notice of Noncompliance as provided in Sec. 3-8.55 of the Hayward Municipal Code. Noncompliance is punishable by criminal and/or civil penalties under Sec. 3-8.64 and Sec. 3-8.65 of the Hayward Municipal Code, or other applicable Federal and State laws or regulations.

HAYWARD FIRE DEPARTMENT

CORIAN ZODIAQ GRANITE

Fire Department, Hazardous Waste Materials Office
777 B Street
Hayward, CA.94541

Dear Mr. Murphy,

In accordance with your request that we submit a business Plan (HMBP), we have determined that we carry less than 55 gallons of hazardous waste at our facility.

According to the rules as explained to by A Danny Galan from your office, this makes us exempt from needing to submit the business plan you have requested.

Attached is a copy of your letter dated Feb. 1,2002 and a copy of permit issued to STC by the Hayward Fire Dept.

I trust that this will meet with your compliance regulations.

Yours truly,

Richard Glick
General Manager

CLAIM OF EXEMPTION

FOR REPORTING YEAR 2004

HAYWARD FIRE DEPARTMENT

HAZARDOUS MATERIALS BUSINESS PLAN / HAZARDOUS MATERIALS INVENTORY

You may be exempted from the filing of a Hazardous Materials Business Plan (HMBP) by completing, signing, and submitting this Claim of Exemption... **ONLY IF ALL OF THE FOLLOWING APPLY:**

- (1) You have no hazardous materials or you do not generate hazardous waste at this facility; OR not one type of hazardous material or hazardous waste found in your facility exceeds 55 gallons (if liquid), 500 pounds (if solid), or 200 cubic feet at standard temperature and pressure (if gaseous); OR you meet any one of the following exemption conditions:
 - A. If you are a physician, dentist, podiatrist, veterinarian and or pharmacist and you store up to 1,000 cu. ft. of **medical gases like oxygen, nitrogen, or nitrous oxide** you are exempt from filing an HMBP. (You may have 1,000 cu. ft. of each and still claim the exemption). IF YOU ARE A NEW BUSINESS, YOU MUST STILL NOTIFY THE HAYWARD FIRE DEPARTMENT AND COMPLETE THE FORMS, ONE TIME ONLY.
 - B. Up to 275 gallons of **lubricating oils and related materials** (e.g. hydraulic fluids, crankcase oils, grease, or transmission fluid) is EXEMPT, IF you do not have more than 55 gallons of any one type of product. WASTE OIL IS NOT EXEMPT AND MUST BE REPORTED AT OR ABOVE 55 GALLONS, EVEN IF YOU QUALIFY FOR THE LUBRICATING OIL EXEMPTION. Submit an HMBP if you have over 55 gallons of waste oil or over 55 gallons of one type of lubricating oil.
 - C. Hazardous materials contained solely in a **consumer product** for direct distribution to, and for use by the general public is EXEMPT. WAREHOUSE QUANTITIES ARE NOT EXEMPT.
- (2) You, as the business owner or its officially designated representative, can sign and attest to all the statements in this Claim of Exemption; AND
- (3) You have not been required expressly by the Hayward Fire Department to submit an HMBP despite the low level of inventory. (In exceptional cases, the Fire Department may require an HMBP from a facility even if its inventory does not meet the thresholds in (1) above, if the materials involved are radioactive or otherwise extremely or acutely hazardous.)

I CERTIFY UNDER PENALTY OF LAW THAT :

I have personally investigated and am familiar with the information referred to in this document as it applies to this facility. Based on my inquiry, I believe that this facility is exempted from the requirement to prepare and submit a Hazardous Materials Business Plan, at this time. Should the inventory change and this facility no longer meets the exemption conditions described above, I will file the required HMBP within 30 days of such change.

- * Authority to make decisions for the facility in case of an emergency Yes No

Section XIII - EMERGENCY RESPONSE TRAINING PLAN

State regulations also require that business plans include a training program which is reasonable and appropriate for the size of the business and the nature of the hazardous materials handled. The training program shall take into account the responsibility of the employees to be trained. It shall also include provisions for ensuring that all appropriate personnel receive initial and refresher training.

1. Does this facility have a written emergency response training plan? Yes No

2. If you answered "Yes" to (1) above, review the following list of training requirements and training records that need to be maintained. For each item, check "yes" if your written plan contains the element listed. Check "No" if it does not. (Consider amending the training program to include all elements in the list.)

If you do not have a written training program, it would be advisable for you to prepare one that will contain, at least, all the elements listed below. Presently, however, without a written program, assess your current practices on the training of employees who handle hazardous materials. Check "Yes" if your employees have some degree of training in the elements listed.

2a. Training Requirements

For all employees:

- * Procedures for internal alarms Yes No
- * Procedures for notification of proper agencies Yes No
- * Procedures for notification of on-site emergency responders Yes No
- * Procedures for notification of external emergency responders Yes No
- * Location and content of emergency response plan Yes No

For chemical handlers:

- * Safe methods for handling and storage of hazardous materials Yes No
- * Proper use of personal protective equipment Yes No
- * Locations and proper use of fire and spill control equipment Yes No
- * Specific hazards of each chemical to which employee may be exposed, including routes of exposure; i.e., skin absorption, inhalation, ingestion. Yes No

RICHARD GLICK, GENERAL MANAGER
SURFACE TECHNOLOGY
25673 NICKEL PL
HAYWARD, CA 94545-3221

Subject: HMBP for 25673 NICKEL PL

Dear RICHARD GLICK, GENERAL MANAGER:

You got this letter because our records show that although you have a Unified Program Consolidated Permit from the Fire Department, you have been **exempted** from submitting a Hazardous Materials Business Plan (HMBP).

We would like to verify that you still meet the HMBP exemption requirements.

Please review the enclosed information sheet titled "Are you exempted from filing an HMBP?"

If your inventory of hazardous materials still falls below HMBP levels, please complete and submit the CLAIM OF EXEMPTION attached to the information sheet by March 1, 2005.

If your inventory exceeds or is at HMBP levels, please call (510) 583-4910 and ask that an HMBP Package be sent to you. In Hayward, state law requires you to file and maintain an HMBP with the Fire Department. Submit your completed HMBP by March 1, 2005. *(The HMBP Package is available online. Go to www.hayward-ca.gov and type in "HMBP Package" in the site's search bar.)*

Not filing an HMBP when required is a violation of the law. State law also provides for fines of up to \$2,000 for each day of violation. After notice, a knowing violation of this law creates liability of up to \$5,000 for each day of the violation.

If you have any questions about the HMBP program, please call Danny Galang of the Hazardous Materials Office at (510) 583-4925.

Sincerely,

Hugh Murphy
Hazardous Materials Program Coordinator

LEADER

I hereby affirm that I am licensed under provisions of Chapter 9, (commencing with Section 7000) of Title 9 of the Business and Professions Code and my license is in full force and effect.

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 70315 Business and Professions Code): Any city or county which requires a permit to construction, alter, improve, demolish, or repair any structure prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Section 7007 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 70315 by an applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I, as owner of the property, or my employees with wages as their sole compensation, and as the work, and the structure is not intended to be altered for sale (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply in an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply in an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____ B.A.P.C. for this reason: _____

I hereby affirm that I have a certificate of consent to sell issued by a certificate holder (Sec. 7044, Business and Professions Code) or a certificate holder (Sec. 7044, Business and Professions Code).

CONTRACTOR

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Sec 7000) of Div 3 of the Business and Professions Code (B & PC), and my license is in full force and effect.

I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason: Sec 7031.5, B & PC. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Sec 7000) of Div 3 of the B & PC) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec 7044 B & PC. The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work for himself or through their own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement(s) is sold within one year of completion, the owner/builder will have the burden of proving that they did not build or improve for the purpose of sale).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec 7044, B & PC. The Contractor's License Law does not apply to an owner of the property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractor's License Law).

I am exempt under Sec _____ B & PC

For this reason _____

I hereby affirm under penalty of perjury one of the following declarations: I have and will maintain a certificate of consent to self-insure for workers' compensation as provided for by Sec 3700 of the Labor Code or have and will maintain workers' compensation insurance as required by Section 3700 of the Labor Code for the performance of the work for which this permit is issued.

How long have you been familiar with the property? Since 2008

Property size (acreage or square feet): 12,800

Building size(s) (individual square footages): 12,800

Age(s) of existing structure(s): unknown

Age of current operation: since 3/2009 7 years & 7 months

Property Owner: Rita Takvorian Year purchased: 2008

Property Manager: Rita Takvorian

Past/Prior use(s) of the property/structures include approximately time periods:

Name of utility/service providers: (if not applicable, insert "NA")

Natural Gas: PG & E

Electricity: PG & E

Water: Hayward Water System

Sewer: Hayward Water System

Municipal Trash Hauler: Waste Management

Elevator Service (if HYDRAULIC): N/A
(name and telephone number)

User Environmental Questionnaire

Yes No Unkwn

(1) Are you aware of any environmental clean-up liens against the subject Property that are filed or recorded under federal, tribal, state, or local law?

Yes No Unkwn

(2) Are you aware of any *Activity and Use Limitations* (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

Yes No Unkwn

(3) As the User of this Environmental Site Assessment (ESA) do you have any specialized knowledge or experience related to the subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No Unkwn

(4) Does the purchase price being paid for this subject Property reasonably reflect the fair market value of the property? If no or unknown answer 4b.

Yes No Unkwn

(4b) If you concluded there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject Property?

Yes No Unkwn

(5) Are you aware of commonly known or reasonably ascertainable information about the subject Property that would help the environmental professional (i.e. ADR consultant) to identify conditions indicative of releases or threatened releases?

Yes No Unkwn

(6) Do you know the past uses of the subject Property? If so, please list:

Yes No Unkwn

(7) Do you know the specific chemicals that are present or once were present at the subject Property? If so, please list:

Yes No Unkwn

(8) Do you know of spills or other chemical releases that have taken place at the subject Property? If so, please list:

Yes No Unkwn

(9) Do you know of any environmental clean-ups that have taken place at the subject Property? If so, please list:

Yes No Unkwn

(10) As the User of this ESA, based on your knowledge and experience related to the subject Property are there any obvious indicators that point to the presence or likely presence of contamination at the subject Property?

PLEASE INCLUDE ASSET / WR / BUSINESS TRACKING NO. ON REPORT AND INVOICE

Dear Mr. Kern,

This Work Order hereby authorizes you, pursuant to and in accordance with the terms and conditions of the Contract dated January 26, 2012, between ADR Environmental Group, Inc. and to conduct an environmental site assessment on the above-referenced property. The type of assessment, fee, delivery date, and property contact are as stated above. It is understood that sampling, if necessary, for friable asbestos, damaged and peeling lead-based paint, and/or radon is not included in the above fee.

Please email an electronic PDF copy of your report (password protected to prevent modifications) along with the invoice to susan.s.wells@citi.com.

ADR Environmental Group, Inc. understands that this assessment will be utilized and relied upon by an affiliate of CITIBANK N.A.. All provisions of the contract with ADR Environmental Group, Inc. shall remain in effect.

Please acknowledge your agreement with these terms and conditions by signing this letter where indicated and returning the same to me within seven days of your receipt of this letter.

Please feel free to call (415) 627-6464 (phone) or email susan.s.wells@citi.com if you have any questions or concerns.

Mr. Ron Kern, Principal
ADR Environmental Group, Inc.

Sincerely,

Susan Wells
